Noun phrase licensing and interpretation Jeffrey T. Runner, 1995 *The Elliptical Noun Phrase in English* Christine Günther, 2013 This book presents a detailed analysis of structural as well as pragmatic aspects underlying the phenomenon of noun ellipsis in English Here Günther examines the structure of elliptical noun phrases to account for the conditions on noun ellipsis and those on one insertion with special emphasis on the oft neglected parallels between the two She also examines the use of noun ellipsis with adjectives in order to shed light on this under researched phenomenon drawing on data from the British National Corpus The Polysynthesis Parameter Mark C. Baker, 1996-01-04 This book investigates in detail the

grammar of polysynthetic languages those with very complex verbal morphology Baker argues that polysynthesis is more than an accidental collection of morphological processes rather it is a systematic way of representing predicate argument relationships that is parallel to but distinct from the system used in languages like English Having repercussions for many areas of syntax and related aspects of morphology and semantics this argument results in a comprehensive picture of the grammar of polysynthetic languages Baker draws on examples from Mohawk and certain languages of the American Southwest Mesoamerica Australia and Siberia **Licensing Without Case** Theodore Frank Levin, 2015 Abstract Case is a conjectured syntactic property of noun phrases that accounts for aspects of their distribution and form that do not otherwise follow from their PF and LF content Chomsky 1981 1986 Chomsky Lasnik 2008 Traditionally Case Theory consists of two core components i noun phrase licensing noun phrases must be licensed through syntactic dependencies capturing their distribution and ii noun phrase morphology the licensing of noun phrases influences their morphological realization capturing their form In work over the past decade or two however the distribution of noun phrases is largely ensured by the properties of clausal heads independently of Case e.g. Schütze 1993 2001 Marantz 1991 2000 Chomsky Sigurdsson 1991 2009 These considerations have led to or been accompanied by theories that shift the determination of case morphology to PF e.g. Marantz 1991 McFadden 2004 Bobaljik 2008 Sigurdsson 2009 2010 If these analyses are correct there may be no role for Case in syntax at all In this dissertation I argue that nominals must indeed be licensed during the course of a well formed derivation However nominal licensing does not require Case feature valuation as is commonly assumed Chomsky 2000 2001 I demonstrate that Case features can survive the derivation unvalued Preminger 2011 2014 Kornfilt Preminger 2015 This conclusion invalidates the common view that nominals are licensed through obligatory Case feature valuation and phenomena that have commonly received Case theoretic explanations based on such obligatory valuation are accorded alternative analyses Nevertheless I demonstrate that presence absence of the functional head K₀ in the nominal projection

does affect the distribution of nominals in ways reminiscent of but not identical to traditional Case theory I identify three groups of nominals that enter the derivaton without K0 the objects of Pseudo Noun Incorporation constructions the objects of Antipassive constructions and the in situ subjects of Balinese and Malagasy In each case those nominals which entirely lack KP the locus of Case features display unique distributional constraints not captured under previous analyses of these phenomena I suggest that the conditions under which nominals can be licensed without Case K0 demonstrate that K0 is relevant for nominal licensing The result of this argumentation is a recasting of the core components of Case Theory Noun phrase licensing is achieved by the K0 head itself cf Bittner Hale 1996a b Its presence absence accounts for aspects of a nominal s distribution and form that do not otherwise follow from its PF LF content Noun phrase morphology is indirectly determined by how Case features hosted at K0 are valued if at all

The Design of Agreement Sandra Chung, 1998 Sandra Chung proposes that linguistic theory must recognize not one but two agreement relations a featural relation that lies behind agreement s impact on the form of words and a configurational relation that lies behind agreement s impact on syntactic structure She identifies the two relations and argues that neither can be reduced to the other Chung offers the most comprehensive analysis of the syntax of Chamorro that has appeared to date and relates her proposals to what is known about analogous constructions in English Italian Irish Japanese Maori and other languages

Adjective attribution Michael Rießler, 2016-07-15 This book is the first typological study of adjective attribution marking Its focus lies on Northern Eurasia although it covers many more languages and presents an ontology of morphosyntactic categories relevant to noun phrase structure in general Beside treating synchronic data the study contributes to historical linguistics by reconstructing the origin of new types specifically in the language contact area between the Indo European and Uralic families
