Nova Musica And De Proportionibus:

The Renaissance Reform of Medieval Music Theory Stefano Mengozzi, 2010-02-11 A detailed study of the sight singing method introduced by the 11th century monk Guido of Arezzo in its intellectual context Magister Jacobus de Ispania, Author of the Speculum musicae Margaret Bent, 2016-03-09 The Speculum musicae of the early fourteenth century with nearly half a million words is by a long way the largest medieval treatise on music and probably the most learned. Only the final two books are about music as commonly understood; the other five invite further work by students of scholastic philosophy, theology, and mathematics. For nearly a century its author has been known as Jacques de Liège or Jacobus Leodiensis. Jacobus is certain; fixed by an acrostic declared within the text. Liège is hypothetical, based on evidence shown here to be less than secure. The one complete manuscript, Paris BnF lat 7207, thought by its editor to be Florentine, can now be shown on the basis of its miniatures by Cristoforo Cortese to be from the Veneto, datable c. 1434-40. New documentary evidence in an Italian inventory also from the Veneto describes a lost copy of the treatise dating from before 1419, older than the surviving manuscript and identifies its author as Magister Jacobus de Ispania. If this had been known eighty years ago, the Liège hypothesis would never have taken root. It invites a new look at the geography and influences that played into this central document of medieval music theory. The two new attributes of Magister and de Ispania, i.e. a foreigner, prompted an extensive search in published indexes for possible identities. Surprisingly few candidates of this name emerged, and only one in the right date range. It is here suggested that the author of the Speculum is either someone who left no paper trail or James of Spain, a nephew of Eleanor of Castile, wife of King Edward I, whose career is documented mostly in England. He was an illegitimate son of Eleanor's older half brother, the Infante Enrique of Castile. Documentary evidence shows that he was a wealthy and well-travelled royal prince who was also an Oxford magister. The book traces his career and the likelihood of his authorship of the Speculum musicae. **Prosdocimo de' Beldomandi's Musica Plana and Musica Speculativa**

Prosdocimo de' Beldomandi, 2024-05-13 Available in English for the first time. Prosdocimo's Tractatus plane musicae 1412 and Tractatus musicae speculative 1425 are exemplary texts for understanding the high sophistication of music theory in the early fifteenth century. Known for considering music as a science based on demonstrable mathematical principles, Prosdocimo praises Marchetto for his theory of plainchant but criticizes his influential Lucidarium for its heterodox mathematics. In dismissing Marchetto as a mere performer, Prosdocimo takes up matters as broad as the nature and definition of music and as precise as counterpoint, tuning, and ecclesiastical modes. The treatises also reveal much about Prosdocimo's understanding of plainchant, his work with Euclid's Elementa, and his familiarity with the music theory of Boethius, Macrobius, and Johannes de Muris. A foremost authority on Italian music theory of the Middle Ages and early Renaissance, Jan Herlinger consults manuscripts from Bologna, Cremona, and Lucca in preparing these valuable first critical editions. *The Harvard Biographical Dictionary of Music* Don Michael Randel, 1996 Biographical dictionary emphasizes classical and art music also

Matthew Balensuela, 1994-01-01 An anonymous fourteenth century treatise that borrows heavily from the *Libellus cantus mensurabilis* attributed to Johannes de Muris the *Ars cantus mensurabilis mensurata per modos iuris* differs from others *ars nova* treatises in its systematic application of scholastic philosophy and allusions to medieval law Using music as the subject of inquiry the writer addresses questions that occupied scholastic philosophers in other fields such as the natural minimum of a substance and the *potentia Dei absoluta* The writer quotes legal maxims and alludes to medieval legal issues such as the *lex regia* and the Becket controversy to justify and prove the rules of music A substantial portion of the treatise was first published as Anonymous V in Edmond de Coussemaker's *Scriptores de musica medii aevi* where it was paired with a counterpoint treatise beginning *Cum notum sit* The treatise published by Coussemaker however is not the entire work From textual and manuscript evidence the Greek and Latin Music Theory edition demonstrates that a set of three figures and an introduction are related to the mensural treatise the same evidence suggests that the counterpoint treatise *Cum notum sit* should not be considered part of the treatise The GLMT edition presents a complete critical text for the treatise together with a facing page English translation Annotations to the translation explain the numerous legal and scholastic allusions in the treatise Also presented are corrected versions of the approximately one hundred musical figures Preceding the critical text and translation an extended introduction explains the musical and intellectual sources of the work
