Nova The Miracle Of Life:

NOVA - Life's Greatest Miracle John Lithgow, 2002 **Bits of Life** Anneke M. Smelik, Nina Lykke, 2010-07-01 Since World War II the biological and technological have been fusing and merging in new ways resulting in the loss of a clear distinction between the two This entanglement of biology with technology isn't new but the pervasiveness of that integration is staggering as is the speed at which the two have been merging in recent decades As this process permeates more of everyday life the urgent necessity arises to rethink both biology and technology Indeed the human body can no longer be regarded either as a bounded entity or as a naturally given and distinct part of an unquestioned whole *Bits of Life* assumes a posthuman definition of the body It is grounded in questions about today's biocultures which pertain neither to humanist bodily integrity nor to the anthropological assumption that human bodies are the only ones that matter Editors Anneke Smelik and Nina Lykke aid in mapping changes and transformations and in striking a middle road between the metaphor and the material In exploring current reconfigurations of bodies and embodied subjects the contributors pursue a technophilic yet critical path while articulating new and thoroughly appraised ethical standards **NOVA the Miracle of Life** ,1996

Icons of Life Lynn Morgan, 2009-09-09 Icons of Life tells the engrossing and provocative story of an early twentieth century undertaking the Carnegie Institution of Washington s project to collect thousands of embryos for scientific study Lynn M Morgan blends social analysis sleuthing and humor to trace the history of specimen collecting In the process she illuminates how a hundred year old scientific endeavor continues to be felt in today s fraught arena of maternal and fetal politics Until the embryo collecting project which she follows from the Johns Hopkins anatomy department through Baltimore foundling homes and all the way to China most people had no idea what human embryos looked like But by the 1950s modern citizens saw in embryos an image of ourselves unborn and embryology had developed a biologically based story about how we came to be Morgan explains how dead specimens paradoxically became icons of life how embryos were generated as social artifacts separate from pregnant women and how a fetus thwarted Gertrude Stein s medical career By resurrecting a nearly forgotten scientific project Morgan sheds light on the roots of a modern origin story and raises the still controversial issue of how we decide what embryos mean

Television and the Genetic Imaginary Sofia Bull, 2019-05-30 This book examines the complex ways in which television articulates

ideas about DNA in the early 21st century Considering television's distinct aesthetic and narrative forms as well as its specific cultural roles it identifies TV as a key site for the genetic imaginary The book addresses the key themes of complexity and kinship which function as nodes around which older essentialist notions about the human genome clash with newly emergent post genomic sensibilities Analysing a wide range of US and UK programmes from science documentaries science fiction serials and crime procedurals to family history programmes sitcoms and reality shows Television and the Genetic Imaginary illustrates the extent to which molecular frameworks of understanding now permeate popular culture **I Do**

Kari Quijas, 2019-09-18 While visiting Monterey California November of 2018 my friends Naarah Mary and Irene and I attended a CLC Christian Life Church Ladies conference We laughed a lot and cried together as Pentecostal ladies do at Holy Ghost filled church service with touching altar calls In the beautiful atmosphere that was created we felt safe to share funny stories and ask questions of each other Some of the ladies had lost their husbands after many years of working together pastoring They missed their husbands After we spoke together it occurred to us all We need more resources on marriage godly marriage that's found in our Christian Holy Bible In the evening hours walking outside the conference we agreed someone needs to write a book on it Why not us Each lady was given a chapter to write questions such as When you were little what was your idea of marriage As an adult what did you think marriage would be like Or how do you work through arguments How do you create a harmonious loving marriage How do you submit to your husband when you disagree with him How do you forgive After the Ladies event I immediately thought of my friend in Hawaii Panui Shepard She and her husband Greg pastor there on the Island of Maui I asked Panui if she would contribute to the book also and I gave her a list of questions As an experienced pastor's wife she blessed us with her wisdom I hope they minister to you The next friend I asked was Daisy Bennett She works in the ministry at CLC Christian Life Church in Stockton CA At the conference she was so anointed and flowed with her contribution to the book Waiting for My David I loved what she said and asked if I could record her thoughts on page Much of the book is from my perspective My husband and I open up on marriage through our nineteen years together This is our gift to you I hope it blesses you and helps work out the rough areas of combining two distinct individuals as one Husband and wife **The Visible Woman** Paula A. Science on American Television Marcel Chotkowski,2024-05-31 As television emerged as a major cultural and economic force many imagined that the medium would enhance civic education for topics like science And indeed television soon offered a breathtaking banquet of scientific images and ideas both factual and fictional Mr Wizard performed experiments with milk bottles Viewers watched live coverage of solar eclipses and atomic bomb blasts Television cameras followed astronauts to the moon Carl Sagan through the Cosmos and Jane Goodall into the jungle Via electrons and embryos blood testing and blasting caps fictional Frankensteins and chatty Nobel laureates television opened windows onto the world of science But what promised to be a wonderful way of presenting science to huge audiences turned out to be a disappointment argues historian Marcel Chotkowski LaFollette in *Science on American Television* LaFollette narrates the history of science on television from the 1940s to the turn of the twenty first century to demonstrate how disagreements between scientists and television executives inhibited the medium s potential to engage in meaningful science education In addition to examining the content of shows she also explores audience and advertiser responses the role of news in engaging the public in science and the making of scientific celebrities Lively and provocative *Science on American Television* establishes a new approach to grappling with the popularization of science in the television age when the medium s ubiquity and influence shaped how science was presented and the scientific community had increasingly less control over what appeared on the air
