Novum Organum True Directions Concerning The Inter:

Views of Nature and Dualism Thomas John Hastings, Knut-Willy Sæther, 2024-01-19 In the face of the anthropogenic threats to the singular planetary habitat we share with other human beings and non human species humanities scholars feel a renewed sense of urgency 1 to acknowledge the ways our species has funded particular histories of environmental exploitation alienation and collapse 2 to unpack inherited assumptions that impact our views of nature and interspecies relations and 3 to suggest ways of thinking and acting that seek to repair the damage and promote mutual flourishing for all of earth inhabitants This volume brings together scholars in philosophy theology and religion who take up this urgent ethical task from a broad range of perspectives and locations The French Idea of History Carolina Armenteros, 2011-07-07 A fierce absolutist a furious theocrat the champion of the hardest narrowest and most inflexible dogmatism part learned doctor part inquisitor part executioner Thus did mile Faguet describe Joseph Marie de Maistre 1753 1821 in his 1899 history of nineteenth century thought This view of the influential thinker as a reactionary has with little variation held sway ever since In The French Idea of History Carolina Armenteros recovers a very different figure one with a far more subtle understanding of and response to the events of his day Maistre emerges from this deeply learned book as the crucial bridge between the Enlightenment and the historicized thought of the nineteenth century Armenteros demonstrates that Maistre inaugurated a specifically French way of thinking about past present and future that held sway not only among conservative political theorists but also among intellectuals generally considered to belong to the left particularly the Utopian Socialists The historical rupture represented by the French Revolution compelled contemporaries to reflect on the nature and meaning of history Some who remained religious during those years felt history with particular intensity awakening suddenly to the fear that God might have abandoned humankind This profound spiritual anxiety emerged in Maistre s work under his pen everything knowledge society religion government the human body had to be historicized and temporalized in order to be known The imperative was to end history by uncovering its essence Socialists positivists and traditionalists drew on Maistre s historical ideas to construct the collective good and design the future The dream that history held the key to human renewal and the obliteration of violence faded after the 1848 revolutions but it permanently changed French social political moral and religious thought **Art and Sustainability** Sacha Kagan, 2014-03-15 What is the cultural dimension of sustainability This book offers a thought provoking answer with a theoretical synthesis on cultures of sustainability Describing how modernity degenerated into a culture of unsustainability to which the arts are contributing Sacha Kagan engages us in a fundamental rethinking of our ways of knowing and seeing the world We must learn not to be afraid of complexity and to re awaken a sensibility to patterns that connect With an overview of ecological art over the past 40 years and a discussion of art and social change the book assesses the potential role of art in a much needed transformation process **A Discourse on the Method** René Descartes, 2008-04-17 In this work Descartes swept away all previous philosophical traditions and set out his

radical new philosophy It begins with the famous proof of the existence of self cogito ergo sum then the deduction of the existence of God and ends with an account of the physical world and human and animal nature **The Mind-Brain**

Continuum Susan Gordon, 2023-01-01 This insightful book proposes a holistic theory of the development of self drawing on interdisciplinary literature in existential phenomenology neurophenomenology intracrinology endocrinology and naturopathic medicine The psychoneurointracrine hypothesis bridges the gap between the mind and brain providing a framework to explain the complex system that facilitates development of one's sense of self and well being The book challenges assumptions in present day neuroscience and psychiatry placing the mind and brain on a continuum of health and growth rather than reducing the study of human consciousness to neurobiological terms and pathological classifications In this landmark book Susan Gordon presents a bold hypothesis one that underscores the importance of psychoneurointracrine activity and links it to female neurology and the development of one's sense of self She brilliantly places this activity which serves as a mind body bridge within the frameworks of neurophenomenology and non linear dynamics Her psychoneurointracrine hypothesis is a tour de force one that is holistic integrating intracrinology with psychology and neurology This hypothesis undercuts the current assumption that the mind is an epiphenomenon of the brain creating a paradigm that impacts science's understanding of behavior experience consciousness and human agency Stanley Krippner PhD Affiliated Distinguished Faculty California Institute of Integral Studies San Francisco CA In her fascinating book Susan Gordon develops a novel theory about the biological connection between mind brain and organism Drawing on empirical research on the role of the female hormonal system in basal states of self and mood she shows that the biochemistry of the endocrine system must be viewed as an indispensable foundation for the emergence of embodied self awareness The homeostasis and hormonal balance of the organism is integral to the sense of well being and the development of meaning but it is also continually modulated and influenced by the subject's experience of his or her world In this way she makes a decisive contribution to a theory of embodiment that goes far beyond a computational theory of the brain to focus on the biochemical organismic processes at the root of the mind Thomas Fuchs MD PhD Karl Jaspers Professor of Philosophy and Psychiatry University of Heidelberg DE **Geographies of Knowledge and Power** Peter Meusburger, Derek

Gregory, Laura Suarsana, 2015-06-24 Interest in relations between knowledge power and space has a long tradition in a range of disciplines but it was reinvigorated in the last two decades through critical engagement with Foucault and Gramsci This volume focuses on relations between knowledge and power It shows why space is fundamental in any exercise of power and explains which roles various types of knowledge play in the acquisition support and legitimization of power Topics include the control and manipulation of knowledge through centers of power in historical contexts the geopolitics of knowledge about world politics media control in twentieth century cartography in modern war the power of words the changing face of Islamic authority and the role of Millennialism in the United States This book offers insights from disciplines such as geography

anthropology scientific theology Assyriology and communication science *Autobiography* Harriet Martineau, 2006-12-21

Harriet Martineau lived an extraordinary literary life She became a reviewer and journalist in the 1820s when her family's fortune collapsed published a best selling series *Illustrations of Political Economy* 1832-34 that made her fame and fortune by the age of thirty overcame a hearing disability to become a literary lion in London society toured the United States and wrote two founding texts of sociology based on her experiences explored north Africa and the Middle East to observe non-European societies wrote leaders editorials on slavery for the *London Daily News* during the American Civil War and commented publicly on matters of politics history and religion in an era when women supposedly maintained their place in the sphere of domesticity This edition of her *Autobiography* reproduces the original 1877 text which Martineau composed in 1855 and had printed in anticipation of her death It includes illustrations of the author and her homes excerpts from the *Memorials* added by her editor Maria Chapman and reviews that praise and critique Martineau's method as an autobiographer and achievement as a Victorian woman of letters **Sources for Frameworks of World History** Lynne Miles-Morillo, Stephen Morillo, 2014 Each chapter in *Sources for Frameworks of World History* contains four to six sources including photographs graphics maps poetry and cartoons carefully chosen by coeditors Lynne Miles Morillo and Stephen Morillo to specifically compliment *Frameworks of World History* Chapter introductions headnotes and reading questions provide context while a general introduction examines problems and issues in working with and interpreting sources Back cover The Politics of Knowledge and Global Biodiversity Alice B.M. Vadrot, 2014-04-24 The establishment of the Intergovernmental Platform on Biodiversity and Ecosystem Services IPBES points to the crucial role attributed to science and knowledge for the successful implementation of biodiversity politics by both scientists and policy makers With the increased importance of biodiversity in international politics and in part inspired by the success the Intergovernmental Panel on Climate Change IPCC has had in raising awareness of global warming the call for an IPCC for Biodiversity was successful The *Politics of Knowledge and Global Biodiversity* gives a full overview of the process of its implementation as finalised in 2013 and proposes an innovative conceptual framework that puts this specific case into a more general perspective of international politics and relations It provides a detailed empirical analysis of the knowledge politics associated with the establishment of IPBES and its conceptual framework and methodological approach is grounded in a theoretical perspective This pioneering work is the first to examine IPBES in this way and is essential reading for researchers and scholars of International Relations Environmental and Biodiversity Politics Science Policy Interfaces and Global Environmental Governance It will also be of interest to political scientists and social scientists **Novum Organum, Or, True Suggestions for the Interpretation of Nature** Francis Bacon, 1859
