Memory in the Ontopoiesis of Life Anna-Teresa Tymieniecka, 2009-09-30 From Aristotle to the present memory has been grasped as a trace or impression of lost reality bridging physiological experience and

consciousness Philosophers have vainly sought the nature of this bridge The present day physiologizing naturalizing of consciousness is not resolving their congenital continuity in which the very existence and practice of life is rooted We have to change our approach Erwin Straus The Aristotelian congenital ties between memory and temporality acquire crucial significance in our primogenital onto-poiesis of life Tymieniecka It reveals memory to be the factor that carries this coalescence and the becoming of life itself This can be the fruit only of the generative springs of life first phenomenology philosophy the onto-poietic logos of life In this collection we explore memory in the constitution of reality remembering and interpretation consciousness action facts imagination history myths self realization metamorphosis Human Associative Memory John R. Aristotle's theories of memory and recollection are basically very similar to ours. By means of a new critical edition of the Greek text, an essay on Aristotle's own theories, and an essay on these theories as they were received in the Latin West, the present book offers material that challenges the *opinio communis*. The result is a new interpretation of Aristotle's *De Memoria et Reminiscentia* and its relevance to the concerns of 21st-century philosophers both regarding the concepts of memory and recollection and regarding Aristotle's philosophical methodology. *Middle English Romance and the Craft of Memory* Jamie McKinstry, 2015. Memory Bennett Davlin, 2007-01-02. If your memories aren't your own, then whose are they? One man is about to find out as he accidentally ingests a mysterious drug that throws him into a hallucination so vivid that it seems real. Now Dr. Taylor Briggs will embark on a journey to unlock the mysteries of his own mind and to find the killer of the innocent victims whose last moments are being played out in his head in a stunning psychological thriller that explores memory's crucial role in our consciousness and its power to deceive. Also, a major motion picture starring Billy Zane, Dennis Hopper, and Ann Margaret.

Memory's Ghost Philip J. Hilts, 1996-08-02. In an experiment that occurred some forty years ago, Henry M.'s memory was stolen from him during a highly controversial operation performed to cure his epilepsy. Henry has lived in the immediate present ever since, unable to connect a past moment with the next, incapable of retaining or recalling any physical or emotional experience. Philip J. Hilts, one of the few people to spend time with Henry, who is sequestered in a hospital, draws on Henry's bizarre situation as well as current cutting-edge research into the functions of the brain in a revealing investigation of how an individual's memory is constructed. When and why memory fails. The efficacy of mnemonic devices. The validity of recovered memories. Part poetic reflection and philosophical meditation, part popular science and investigative journalism, *Memory's Ghost* is an unforgettable journey into the mysteries of the human mind.

Memory in Vergil's Aeneid Aaron M. Seider, 2013-09-12. Tracing the path from Troy's destruction to Rome's foundation, the *Aeneid* explores the transition between past and future. As the Trojans struggle to found a new city and the narrator sings of his audience's often painful history, memory becomes intertwined with a crucial leitmotif: the challenge of being part of a group that survives violence and destruction only to face the daunting task of remembering what was lost. This book offers a new reading of the *Aeneid* that engages with critical work on memory and questions the prevailing view that Aeneas must forget his disastrous history in order to escape from a cycle of loss. Considering crucial scenes such as Aeneas's reconstruction of Celaeno's prophecy and his slaying of Turnus, this book demonstrates that memory in the *Aeneid* is a reconstructive and dynamic process, one that offers a social and narrative mechanism for integrating a traumatic past with an uncertain future.
