Written in a clear and accessible style that would suit the needs of journalists and scholars alike, this encyclopedia is highly recommended for large news organizations and all schools of journalism. Starred Review Library Journal. Journalism permeates our lives and shapes our thoughts in ways we've long taken for granted. Whether we listen to National Public Radio in the morning, view the lead story on the Today show, read the morning newspaper headlines, stay up to the minute with Internet news, browse grocery store tabloids, receive Time magazine in our mailbox, or watch the nightly news on television, journalism pervades our daily activities. The six volume Encyclopedia of Journalism covers all significant dimensions of journalism, including print, broadcast, and Internet journalism. U.S. and international perspectives, history, technology, legal issues, and court cases, ownership, and economics. The set contains more than 350 signed entries under the direction of leading journalism scholar Christopher H. Sterling of The George Washington University. In the A to Z volumes 1 through 4, both scholars and journalists contribute articles that span the field's wide spectrum of topics, from design, editing, advertising, and marketing to libel, censorship, First Amendment rights, and bias to digital manipulation, media hoaxes, political cartoonists, and secrecy and leaks. Also covered are recently emerging media such as podcasting, blogs, and chat rooms. The last two volumes contain a thorough listing of journalism awards and prizes, a lengthy section on journalism freedom around the world, an annotated bibliography, and key documents. The latter edited by Glenn Lewis of CUNY Graduate School of Journalism and York College. CUNY comprises dozens of primary documents involving codes of ethics, media and the law, and future changes in store for journalism education. Key Themes: Consumers and Audiences, Criticism and Education, Economics, Ethnic and Minority Journalism, Issues and Controversies, Journalist Organizations, Journalists, Law and Policy, Magazine Types, Motion Pictures, Networks, News Agencies and Services, News Categories, News Media, U.S. News Media, World Newspaper Types, News Program Types, Online Journalism, Political Communications, Processes and Routines of Journalism, Radio and Television Technology. **NTC's Dictionary of Japan's Cultural Code Words** Boye De Mente, 1994. For centuries the Japanese used their language as a barrier to prevent non-Japanese from learning about the inner workings of Japanese society and to ward off foreign influence. In fact, for a long period

in Japan's history the teaching of Japanese to foreigners was a serious crime against the state. In this enlightening work renowned Japanologist Boye Lafayette De Mente discusses how the psychology of the social and political system that evolved over the centuries became imbued in and expressed by the language to a degree seldom seen in other cultures. The author brings more than 25 years of experience in Japan to the task of revealing the hidden cultural significance of current expressions in the Japanese language. With ample reference to history, psychology, philosophy and religion, the reader learns how the Japanese view certain behaviours and attitudes and why they are conditioned to respond in certain ways to specific situations. Features 230 quintessentially Japanese expressions that every Japanese knows and believes that non-Japanese cannot possibly understand. A 14 entry set of introductory readings designed to offer a broad cultural overview of Japan. Cross referencing of entries by thematic groupings such as Loyalty, Collective Behaviour and Leadership. This innovative text provides readers with the insights necessary for effective communication with their Japanese counterparts. Whatever your involvement with Japan, personal travel or business, NTC's Dictionary of Japan's Cultural Code Words is an invaluable and one of a kind reference.

The Audiovisual Cataloging Current Sandra K. Roe, 2013-10-18. Examine crucial issues for audiovisual cataloging from a variety of perspectives. This vital book addresses both current and historic issues related to audiovisual materials and cataloging. It covers the current cataloging rules for sound recordings, popular music and nonmusic recordings, videorecordings including DVDs, electronic resources whether accessed locally or remotely, three dimensional objects and realia and kits. Three historical articles chronicle the history of audiovisual catalog in general, the history of cataloging computer files and the history of The Thesaurus for Graphic Materials. A section on audiovisual materials and subject access issues includes a chapter which proposes form genre terms for moving image materials and a special library's creation and use of a new thesaurus and its availability to assist online catalog users. Finally, four contributions examine audiovisual materials and cataloging from the perspectives of different library types: school, public, academic and special. The Audiovisual Cataloging Current provides case studies that show how the National Library of Medicine produces, collects and catalogs non print materials, the differences between the Moving Image Genre Form Guide and Library of Congress Subject Headings with recommendations for improving LCSH as a tool, and an exhaustive list of LCSH terms. How libraries and organized cataloging groups developed the Chapter 9 descriptive cataloging rules in AACR2, how the Westchester Library System created a user friendly online catalog for audiovisual materials, how the Illinois Fire Service Library improved firefighters' subject access to nonprint fire emergency materials, how the National Library of Medicine promotes audiovisual formats and much more.
