become extremely hot topics in the academy Given the changing nature of war one of the more promising areas of scholarly
investigation has been the development of new theories of war and war's impact on society War Citizenship Territory
features 19 chapters that look at the impact of war and militarism on citizenship whether traditional territorially bound
national citizenship or transnational citizenship The editors argue that while there has been an explosion of work on
citizenship and territory Western academia's avoidance of the immediate effects of war among other things has led them to
ignore war which they contend is both pervasive and well nigh permanent This volume sets forth a new geopolitically based
theory of war's transformative role on contemporary forms of citizenship and territoriality and includes empirical chapters
