Nuclear Deterrence Problems And Perspectives In The 1990s

Nuclear Deterrence Serge Sur (red.), 1993 **Global Nuclear Disarmament** Nik Hynek, Michal Smetana, 2015-12-22
This book examines the issue of nuclear disarmament in different strategic political and regional contexts. This volume seeks to provide a rich theoretical and practical insight to one of the major topics in the field of international security: global abolishment of nuclear weapons. Renewed calls for a nuclear weapons free world have sparked a wide academic debate on both the attainability of such goal and the steps that should be taken. Comparably less attention however has been paid to theoretically informed considerations of the consequences of nuclear abolition. Comprising essays from leading scholars and experts within the field, this collection discusses the fundamental theoretical and conceptual foundations of nuclear disarmament and subsequently tries to assess its hypothetical impact in global and regional contexts. The varied methodological approach of the contributors aims to advance a multi theoretical and multi perspectival view of the issue. The book is organized in three main sections: Strategic Perspectives dealing with the specific constraints and facilitators for the states to achieve their core objectives; Political Perspectives with the focus on the power of norms, belief systems and ideas; and Regional Perspectives with the analyses of seven regional and or state specific nuclear contexts. As a whole, the volume provides a detailed complex overview of the risks and opportunities that are embedded in the vision of a nuclear weapon free world. This book will be of great interest to students of nuclear proliferation, arms control, war and conflict studies, international relations and security studies.

Nuclear Weapons in the Changing World Patrick J. Garrity, Steven A. Maaranen, 1992-06-30
Lawrence Freedman: One of the major bonuses of the collapse of communism in Europe is that it may never again be necessary to enter into a sterile debate about whether it is better to be red or dead. This appeared as the ultimate question in the great nuclear debate of the early 1980s. When put so starkly, the answer appeared obvious: better to live and struggle in a totalitarian system than to destroy totalitarian and democratic systems alike. There were a number of points to be made against this. Communist regimes had demonstrated the possibility of being both red and dead, while the West had managed successfully to avoid the choice. If we allowed nuclear disarmament to become an overriding priority, this might encourage excessive respect for Soviet interests and a desire to avoid any sort of provocation to Moscow, a point not lost on those in Eastern Europe who were then struggling against repression and could not see why disarmament should be given a higher priority than freedom. Now that the old communist states have liberated themselves and the West no longer risks conspiring in their enslavement, there is a correspondingly reduced danger of mass death. As a result, and with so much else of immediate relevance, Lawrence Freedman, Department of War Studies, King's College University of London, London WC2R 2LS, England, **Nuclear Weapons in the Changing World: Perspectives from Europe, Asia and North America**.

The War That Must Never Be Fought George P. Shultz, James E. Goodby, 2015-08-01
This book discusses the nuclear dilemma from various countries' points of view from Japan, Korea, the Middle East and others. The final chapter proposes a new solution for

the nonproliferation treaty review **Perspectives on Nuclear Deterrence in the 21st Century** Beyza Unal,Yasmin Afina,Patricia Lewis,2020 This collection of essays explores from the perspectives of eight experts four areas of deterrence theory and policymaking the underlying assumptions that shape deterrence practice the enduring value of extended deterrence the impact of emerging technologies and the blurring of the lines between conventional and nuclear weapons

Ethics and Nuclear Deterrence Geoffrey Goodwin,2020-11-19 As nuclear weapons become ever more sophisticated so the deterrence debate becomes increasingly complex The Ban the Bomb slogans of the 1950s had been replaced by cries for nuclear free zones and talk of megatonnage and fallout had given way to talk of tactical nuclear weapons and limited strike capability Originally published in 1982 this book considers the ethical issues raised by nuclear policies and by the debate between proponents of the multilateralist unilateralist approaches to disarmament and arms control at the time It is not like so many books on the subject an ideological statement there are essays by defence strategists which put the case for deterrence and essays by academics and churchmen which strenuously oppose it The book also includes an essay on attempts to mitigate the appalling brutality of the many conventional wars since 1945 At a time when the rhetoric and misinformation produced on both sides of the debate continued to obscure many vital issues this book was welcome sensible and necessary *Nuclear Disarmament* P. M. Kamath,2013-11-14 This volume presents a range of views on the current state of global nuclear disarmament from eminent scholars from India Israel and France Chapters present and analyse the relationships between India Pakistan and the USA Russia and the USA the position of the EU and of Israel **Nuclear Strategies and Nuclear Deterrence** Andrew Paul Valentine,1986 **Morality, Prudence, and Nuclear Weapons** Steven P. Lee,1996-11-13 This 1993 book is the first post Cold War assessment of nuclear deterrence providing a comprehensive normative understanding of nuclear deterrence policy **After the Cold War** Charles W.
