Nuclear Mentalities:

Nuclear Mentalities? B. Heuser, 1998-08-10 Concepts associated with nuclear strategy often go beyond any objective logic of deterrence Nuclear weapons have special roles in different national belief systems myths surround them they have catalysed tensions already existing in societies become symbols of power or of past sins This book delves into the conscious and subconscious beliefs in Britain France and the Federal Republic of Germany all voiced in debates about nuclear strategy about society the State and power structures each country's place in the world the international system allies and enemies

Nuclear Mentalities? Beatrice Heuser, 1998 *Nuclear Mentalities?* Beatrice Heuser, 1998 This book shows that political culture values and beliefs taking the form of belief systems or logically less coherent belief clusters that have grown over many years are central to understanding nuclear strategy preferences and that it is often pointless to surmise another country's national interest without a deep understanding of these factors BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Nuclear Fictions Michael Gardiner, 2024-11-30 In this book Michael Gardiner suggests that the conception of the war ending weapon was tied up with a longer commitment to unified space and singular progress The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outskirts of commercial empire and the post war consensus with deterrence as its foundation The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s Nuclear Criticism and readers of nuclearism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick

Preventing the Use of Weapons of Mass Destruction Eric Herring, 2013-01-11 These studies concentrate on preventing the use of weapons of mass destruction A common argument runs through all of the papers that while complacency must be avoided much of the post Cold War focus among Western governments on the threat posed by weapons of mass destruction is alarmist

Insurgencies and Counterinsurgencies Beatrice Heuser, Eitan Shamir, 2016 A study of the evolving national styles of conducting insurgencies and counter insurgency as influenced by transnational trends ideas and practices

Nuclear France Benoît Pelopidas, 2023-12-13 This book offers the first non official history of French nuclear policies which goes beyond the divide between nuclear weapons and nuclear energy policies It addresses the sizing of France's nuclear forces technological assistance to countries with nuclear weapons programs uranium prospection nuclear testing its health effects and protests against it as well as plans to prevent and

manage accidents in nuclear power plants It is based on new questions and new sources from France and abroad The chapters in this volume show how independent and interdisciplinary scholarship free from conflicts of interests can uniquely advance our understanding of nuclear history and politics This is the case because it does not treat the categories and judgments of official discourse as neutral starting points of the analysis This volume is based on untapped primary sources from France the UK the US India South Africa and Iran on a new assessment of the health consequences of French nuclear testing in Polynesia thanks to a modern atmospheric particle transport code coupled with historical weather data open source information about radioactive debris mushroom clouds as well as data on the composition and particle sizes of the fallout and on new survey data about French knowledge of and attitudes towards nuclear weapons and nuclear energy They show notably that the first generation of French nuclear forces lacked technical credibility despite reliance on outside help Several French officials knew this as did France's allies and adversaries Moreover French strategic collaborations associated to nuclear programs extended to India and South Africa nuclear safety regulations changed fundamentally after the Cold War and approximately 110 000 people i e 90% of the French Polynesian population in the 1970s could have received doses that would qualify them for compensation according to French law The volume will be of interest to scholars and students of history politics international relations military history war studies conflict and global governance Most of the chapters in this book were originally published as a special issue in Cold War History A few chapters were first published in the Nonproliferation Review Diplomacy Statecraft and Science Global Security

The Ethics of Nuclear Weapons Dissemination Thomas E. Doyle, 2015-02-11 This book examines the moral dilemmas of nuclear dissemination and the justifications of both nuclear pursuit and avoidance by contemporary states Applying Constructivist methodologies and moral theory the author analyses a core set of moral dilemmas that ensnare decision makers amongst state and non state nuclear aspirants as well as amongst states committed to preventing horizontal proliferation The book shows that the character structure and implications of these dilemmas have not yet been adequately understood or appreciated and that such an understanding is necessary for an effective set of nonproliferation policies Furthermore it shows that the dilemmas force and political policy import are evident in the discourses that diverse actors undertake to defend their nuclear choices and how the dilemmas of nuclear aspirants are implicated in those of nuclear preventers The author advocates a number of policy recommendations that reinforce some already made by scholars and experts but more importantly others that advise significantly different courses of action The book reveals how the moral dilemmas of nuclear aspiration avoidance and prevention constitute the security dilemmas and paradoxes that comprise much of the 21st century security environment This book will be of much interest to students of nuclear proliferation international relations ethics and international security studies

Charter of the North Atlantic Treaty Organization Ian Shapiro, Adam Tooze, 2018-05-22 The most powerful military alliance in history NATO shaped the geopolitical contours of the Cold War and continues to structure the contemporary international system The

NATO agreement is reprinted here with speeches and essential historical documents concerning the alliance's founding and subsequent evolution. Accompanying essays by major scholars discuss debates about NATO's evolving governance, its role in nuclear politics, and its appropriate mission during and since the Cold War.

Empire of Deterrence Michael Gardiner, 2025-10-14

A nuclear extinction unconscious has worked over the last 30 years to automate much political thinking and recuperate it into individualist culture wars that reaffirming the extinction regimes. *Empire of Deterrence* reveals how nuclear strategy once framed as a tool for security has become an invisible but ever-present law shaping the very foundations of political authority, economic order, and cultural imagination in the Anglosphere. Rather than merely deterring conflict, nuclear logic now smothers dissent, flattens alternatives, and enforces a regime of stasis masquerading as stability. Drawing on a vast range of Cold War era thought and culture, from the strategic philosophy of Paul Virilio to the haunting dramas of Stephen Poliakoff, the aesthetics of Folk Horror, and the metaphysical critiques of the Kyoto School, this book traces how deterrence became hardwired into governance ideology and the feedback loops of Western managerial culture. At once theoretical and urgent, *Empire of Deterrence* asks: How did nuclear logic come to rule us? Can we break its psychic grip? And is it still possible to think and act beyond the empire it sustains?
