Nuclear Power and Its Fuel Cycle - Volume 6: Nuclear Power in Developing Countries International Atomic Energy Agency,1977 *Nuclear Power and Its Fuel Cycle* ,1977 Nuclear Power in the Developing World Daniel Poneman,2023-08-18 Nuclear Power in the Developing World 1982 explores the issue of nuclear power policies in developing countries The sharp oil price rises of the 1970s attracted widespread attention to nuclear power as an alternative energy source while some developing countries began attaining the technological ability to develop nuclear weapons programmes While the search for energy should not be thwarted the quest for nuclear weapons should not be promoted The tension between these two goals has often led to confused export policies in the nuclear supplier nations The author attacks this confusion at its source by examining first hand the motives which drive nuclear policies in the developing world He explores how security and economic objectives domestic policies and foreign influence shape nuclear policies enriching his analysis with examples from South American African and Asian experiences This volume also takes into account those without active nuclear programmes to better understand how such programmes are born This approach demonstrates that countries such as India Pakistan and Argentina entertain different priorities from countries such as Brazil Taiwan and the Philippines in promoting nuclear power **Nuclear Power and Its Fuel Cycle** International Atomic Energy Agency,1977 **Nuclear Power in India** David Hart,2019-03-28 Originally published in 1983 The Indian nuclear power programme both the earliest in the Third World and also one of the most comprehensive is an important and instructive subject for a wide ranging and detailed study This book examines the origins and rationale of the Indian programme in the context of energy resources and consumption It traces the progress of its historical development and leads up to an evaluation of its performance in both technical and economic terms of both individual reactors and the programme as a whole In addition the book discusses India's nuclear explosion of 1974 and the possibilities for novel developments in nuclear power and other energy sources such as coal biogas hydro and solar power The author then sets the Indian programme into the world picture by comparing developments in India with those of the Third World including developments in China and South Africa and discusses the overall prospects for the Third World This extremely informative account will appeal to readers with interest in energy science technology and Third World developments **Energy Abstracts for Policy Analysis** ,1984 **Energy Research Abstracts** ,1995 Fueling Development United States.
