Nuclear Weapons Databook Vol 2 U S Nuclear Warhead Production

Bruce Cumings

Nuclear Weapons Databook Vol 2 U S Nuclear Warhead Production:

Bulletin of the Atomic Scientists, 1988-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world International Control of Tritium for Nuclear Nonproliferation and Disarmament Martin B. Kalinowski, 2004-03-29 Tritium is used by all nuclear weapons states to increase the explosive yield of atomic bombs and to miniaturize them However this radioactive material has not yet been put under appropriate international control comparable to the nuclear safeguards applied for plutonium and uranium It is a neglected material in efforts to control the spread and **The A to Z of Nuclear, Biological and Chemical Warfare** Benjamin C. Garrett, John Mason Hart, 2009-09-16 Human experience with nuclear biological and chemical NBC warfare has been limited especially in comparison to conventional forms of warfare Our experience with nuclear warfare is confined to a period of less than one week during the end of World War II when the United States successfully used two nuclear weapons against targets in Japan The course of biological warfare and modern use of biological weapons are difficult to track owing to the difficulty of differentiating deliberate use from natural outbreaks However the keen potential of biological weapons in acts of terror was shown in the mass disruption caused in the fall 2001 experience in the U S with the release of anthrax through the American postal system Chemical weapons have been used in a handful of conflicts since their introduction to modern warfare during World War I most recently during the Iran Iraq War during the 1980s Despite this limited experience NBC warfare continues to exert a certain fascination among states The A to Z of Nuclear Biological and Chemical Warfare covers the development and use of NBC weapons as well as efforts to limit or control the use of these weapons through a chronology a bibliography an introductory essay and dictionary entries Over 500 cross referenced dictionary entries provide a unique selection of terms related to NBC warfare ranging from basic descriptions of substances used in NBC warfare to details on incidents and episodes where NBC weapons were used Entries are structured around historical events persons important to NBC warfare countries where such weapons have been developed or used and international treaties and treaty related organizations

Security Without Nuclear Weapons? Stockholm International Peace Research Institute, 1992 This book examines the question Is the elimination of nuclear weapons feasible Individual chapters address the major conceptual technical and economic issues in the design of a non nuclear security regime Other chapters explore more specialized issues as they relate to the feasibility of the elimination of nuclear weapons elite perceptions and the decision making process verification nuclear proliferation fissile materials and warheads alliance and regional hegemonies and deterrence **Nuclear Weapons Databook**, 1987 *Nuclear Wastelands* International Physicians for the Prevention of Nuclear War, Institute for Energy and Environmental Research, 2000 A handbook for scholars students policy makers journalists and peace and environmental activists A handbook for scholars students policy makers journalists and peace and environmental activists Nuclear

Wastelands provides concise histories of the development of nuclear weapons programs of every declared and de facto nuclear weapons power as well as detailed surveys of the health and environmental effects of this development both in these countries and in non nuclear nations involved in nuclear weapons testing and uranium mining Among the more obvious but largely deferred costs of the Cold War are those related to the management of radioactive waste The world is burdened with thousands of unwanted nuclear devices and mounting surpluses of weapons grade plutonium and enriched uranium In addition the process of weapons production and testing has left many lands aquifers rivers lakes and seas contaminated by a multitude of weapons related poisons This book follows the production process step by step and country by country from uranium mining to the final assembly and storage of weapons analyzing the potential hazards of each step and compiling the most complete information available on the actual health and environmental effects in each country involved Nuclear Wastelands includes a wealth of information that has only recently come to light particularly on the nuclear weapons program of the former Soviet Union It also features critical analyses of official public communications concerning the health and environmental consequences of nuclear weapons production bringing to light governmental secrecy and outright deception that have led to the subversion of democratic principles and have camouflaged the damage done to the very people and lands the weapons were meant to safeguard

A Global History of the Nuclear Arms Race Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime

Atomic Testing in Mississippi David Allen Burke, 2012-11-05 In *Atomic Testing in Mississippi* David Allen Burke illuminates the nearly forgotten history of America's only nuclear detonations east of the Mississippi River The atomic tests conducted in the mid 1960s nearly 3 000 feet below ground in Mississippi's Tatum Salt Dome posed a potential risk for those living within 150 miles of the site which included residents of Hattiesburg Jackson Gulfport Biloxi Mobile and New Orleans While the detonations provided the United States with verification methods that helped limit the world's nuclear arsenals they sparked widespread public concern In 1964 and 1966 the Atomic Energy Commission conducted

experiments at the salt dome code named Dribble surrounded by a greater population density than any other test site in the United States Although the detonations were not weapons tests they fostered a conflict between regional politicians interested in government funded science projects and a population leery of nuclear testing near their homes Even today residents near the salt dome are still fearful of long term negative health consequences Despite its controversy Project Dribble provided the technology needed to detect and assess the performance of distant underground atomic explosions and thus verify international weapons treaty compliance This technology led to advanced seismological systems that now provide tsunami warnings and detect atomic activity in other nuclear nations such as Pakistan and North Korea *North Korea* Bruce Cumings, 2011-05-10 Depicted as an insular and forbidding police state with an insane dictator at its helm North Korea charter member of Bush's Axis of Evil is a country the U S loves to hate Now the CIA says it possesses nuclear chemical and biological weapons as well as long range missiles capable of delivering them to America's West Coast But as Bruce Cumings demonstrates in this provocative lively read the story of the U S Korea conflict is more complex than our leaders or our news media would have us believe Drawing on his extensive knowledge of Korea and on declassified government reports Cumings traces that story from the brutal Korean War to the present crisis Harboring no illusions regarding the totalitarian Kim Jong Il regime Cumings nonetheless insists on a more nuanced approach The result is both a counter narrative to the official U S and North Korean versions and a fascinating portrayal of North Korea a country that suffers through foreign invasions natural disasters and its own internal contradictions yet somehow continues to survive **World Inventory of Plutonium and Highly Enriched Uranium, 1992** David Albright, Frans Berkhout, William Walker, 1993 From the John Holmes Library collection

Embark on a breathtaking journey through nature and adventure with Crafted by is mesmerizing ebook, **Nuclear Weapons Databook Vol 2 U S Nuclear Warhead Production** . This immersive experience, available for download in a PDF format (*), transports you to the heart of natural marvels and thrilling escapades. Download now and let the adventure begin!
