Cardiovascular Nuclear Medicine and MRI Johan H. C. Reiber, Ernst E. van der Wall, 2012-12-06 In recent years there have been major advances in the fields of cardiovascular nuclear medicine and cardiac magnetic resonance imaging In nuclear cardiology more adequate tomographic systems have been designed for routine cardiac use as well as new or improved quantitative analytic software packages both for planar and tomographic studies implemented on modern state of the art workstations In addition artificial intelligence techniques are being applied to these images in attempts to interpret the nuclear studies in a more objective and reproducible manner Various new radiotracers have been developed such as antimony labeled isonitriles metabolic compounds etc Furthermore alternative stress testing with dipyridamole and dobutamine has received much attention in clinical cardiac practice Magnetic resonance imaging is a relative newcomer in cardiology and has already shown its merits not only for anatomical information but increasingly for the functional aspects of cardiac performance This book covers almost every aspect of quantitative cardiovascular nuclear medicine and magnetic resonance imaging It will assist the nuclear medicine physician the radiologist the physicist image processing specialist and the clinical cardiologist in understanding the nuclear medicine techniques used in cardiovascular medicine and in increasing our knowledge of cardiac magnetic resonance imaging

Handbook of Nuclear Cardiology Gary V. Heller, Robert C. Hendel, 2012-10-01 This small handbook provides a just the

facts approach to the use of nuclear cardiology for the general cardiology population It is an adjunct to the existing literature in providing a simple case based approach to the methodology application and results of the use of nuclear cardiology It is a fast access pocket sized compendium of information heavily biased toward a clinical cardiology population As such it will be a low priced colorful and appealing reference resource that will be popular to a large number of cardiologists internationally As greater numbers of countries invest in the new techniques the hunger for information will increase vastly
