Nuclear Disarmament In The Twentyfirst Century:

Nuclear Disarmament in the Twenty-first Century Wade L. Huntley, Mitsuru Kurosawa, Kazumi Mizumoto, 2005-03-06 This work provides a comprehensive examination of the current state and future prospects for nuclear disarmament at the turn of the century The work juxtaposes a sober review of progress made during the last decade with a proactive agenda of proposals for new disarmament initiatives in the next decade Taken together the contributions to this volume suggest that contrary to current conventional wisdom the increasing global cache of nuclear weapons and the waning progress on nuclear disarmament of recent years need not become the defining features of the post Cold War era Rather by examining the new conditions that have emerged at the dawn of the 21st century through both national and issue based perspectives this work reveals how the likelihood of continuing uncertainty and change in world affairs creates opportunities as well as the need for renewed progress toward significant nuclear disarmament

Deterrence in the Twenty-first Century Max G. Manwaring, 2013-02-01 This anthology argues that facing the diverse threats in the new world disorder requires a new look and new approaches The requirement is to establish that contemporary deterrence demands replacing the old nuclear theology with new policy and strategy to deal with the myriad state non state and trans national nuclear and non nuclear menaces that have heretofore been ignored or wished away

Twenty-First Century Weapons Proliferation James M. Ludes, Henry Sokolski, 2014-01-14 Leading US security practitioners from the Ford Carter Reagan Bush and Clinton administrations plus other experts on proliferation clarify the weapons proliferation threats that the US and its allies will face and suggest what new policies their governments should consider

Nuclear Ethics in the Twenty-First Century Thomas E. Doyle, II, 2020-01-31 This book relates a complex ethical re assessment of the continued reliance by some states on nuclear weapons as instruments of state power This re assessment is more urgent considering the relatively recent intensification of great power conflict dynamics and the nuclear weapon states recommitments to modernizing augmenting or tailoring their nuclear forces to address vital state and alliance interests And especially since the beginning of the administration of U S President Donald J Trump these recommitments have accelerated the degree to which the political and moral dilemmas of the threat of nuclear use define and intensify existential risks for specific states and the international community at large To execute this re assessment this book details how strategic political legal and moral reasoning are deeply intertwined on the questions of vital state and global values Its ontological assumptions are taken from a broadly construed IR Constructivist stance and its epistemological approach applies non ideal moral principles informed by Kantian thought to selected problems of nuclear armed security competition as they evolved since President Barack Obama s 2009 Prague Declaration This non ideal moral approach employed is committed to the view that the dual imperatives of humanity s survival and the common security of states requires an international order which privileges considerations of justice over power political considerations This non ideal moral approach is a necessary element of theorizing a set of practices to

effectively address the challenges and dilemmas of reordering international politics in terms of justice **Nuclear India in the Twenty-First Century** D. SarDesai, R. Thomas, 2002-05-02 This collection of essays unlike other books on this subject emphasizes strategic technological and economic factors It includes contributions from a combination of academics and governmental experts from both the United States and India Nuclear India in the Twenty First Century provides an important picture of India s nuclear intentions and capabilities and should facilitate policies that the US may consider in response to regional and global proliferation *Italy's Foreign Policy in the Twenty-First Century* Bertjan Verbeek, Giampiero Giacomello, 2011-11-16 Italy s Foreign Policy in the Twenty First Century The New Assertiveness of an Aspiring Middle Power edited by Giampiero Giacomello and Bertjan Verbeek shows how changes in Italy s international and domestic environment since the early 1990s have affected Italy s foreign policy and raised its aspiration to become and be treated as a middle power The contributors theoretically engage with both rationalist and constructivist accounts of middle power behavior They reveal that the end of the Cold War the advent of globalization and the increase in institutionalized regional cooperation have increased Italy s freedom to maneuver by reducing its dependence on the United States while simultaneously causing Italy s policy freedom to decrease as a result of delegation of policy competencies to the EU and the need for cooperation in a globalized world Domestic changes notably the transition from the First to the Second Republic and the transformation of political leadership in Italy under Prime Minister Silvio Berlusconi have altered the specific way domestic politics is played out in foreign policy Rather than adopting the more common focus on Italy s bilateral relations with other countries or regions Italy s Foreign Policy in the Twenty First Century centers on actors issues and policy instruments in vital areas of Italy s foreign In addition it discusses the search for Italy s position in global affairs and emphasizes the importance of leadership styles domestic political agendas and party rhetoric in determining Italy s foreign policy As Giacomello and Verbeek s volume demonstrates being consistent with such strategic prescription has always been a problematic undertaking for various Italian governments Nato and the Transatlantic Alliance in the Twenty-First Century G. Williams, B. Jones, 2001-03-13 This book examines the nature of international politics in the twentieth century It encapsulates those essential and enduring features likely to be present in the twenty first century One important feature is the friction generated by nation states attempting to coexist in a still largely unequal and hierarchical system of states The possible impact of three powerful simultaneous and intersecting revolutions on international relations and the future of NATO is assessed in relation to the twenty first century **Challenges of the Twenty-first Century** , 1993 The Indira Gandhi Memorial Trust Holds Biennial International Conferences In Her Memory To Discuss Causes And Ideas Dear To Her Heart The First Was Held In January 1987 In New Delhi Under The Title Towards New Beginnings The Second In January 1989 On The Theme The Making Of An Earth Citizen And The Third In November 1991 On Challenges Of The Twenty First Century All The Three Conferences Have Been Interrelated One Deriving From The Other The Proceedings Of These

Conferences With Suitable Editing Are Published For The Benefit And Use Of Thinkers Scientists Policy Makers Social Activists And World Bodies Including Governments The Present Volume Contains The Deliberations Of The Third Conference The Challenges We Face Today Are Simply Galore The Decline And Fall Of Empires Old And New In This Century The Assertion Of Self Determination And Independence By Large And Small Groups Of People The Devastation Wrought By World Wars Local Wars And Internecine Strife The Creation And Demolition Of Ententes Blocs And Walls The Exhilarating Spectacle Of Yesterdays Implacable Foes Becoming Todays Eager Friends The Accumulation Of Armaments Of Fearful Lethality The Sunrise And Sunset Of Much Acclaimed Revolutions The Disillusionment Over Ideologies Doctrines And Dogmas Particularly That Of State Directed Economic Management The Uncheckable March Of Consumerism The Prevalence Of Hunger And Destitution Amidst World Wide Plenty The Fission Of The Atom And Excursions Into Outer Space The Communication Explosion Creating Illusions Of Omnipresence And Omniscience The Conquest Of Old Familiar Diseases And Epidemics But The Rise Of The Ailments Of Progress The Alarming Spread Of Planetary Pollution And The Remorseless Exploitation Of Nature Owing To The Growing Number Of Human Beings With Growing Appetites The Collapse Of Faith And Spiritual Tranquility Going Hand In Hand With The Rise Of Fundamentalism All These Demand Earnest Thinking About The Ways In Which Human Beings And Other Living Species Can Endure On Earth And Live In Harmony And Nope Freedom And Worthwhileness

Nuclear Weapons and Cooperative Security in the 21st Century Stephen J. Cimbala, 2009-09-10

This book looks at the prospects for international cooperation over nuclear weapons proliferation in the 21st century Nuclear weapons served as stabilizing forces during the Cold War or the First Nuclear Age on account of their capability for destruction the fear that this created among politicians and publics and the domination of the nuclear world order by two superpowers the United States and the Soviet Union The end of the Cold War the dissolution of the Soviet Union and the potential for nuclear weapons acquisition among revisionist states or even non state actors including terrorists creates the possibility of a wolves eat dogs phenomenon in the present century In the 21st century three forces threaten to undo or weaken the long nuclear peace and fast forward states into a new and more dangerous situation the existence of large US and Russian nuclear weapons arsenals the potential for new technologies including missile defenses and long range precision conventional weapons and a collapse or atrophy of the nuclear nonproliferation regime and the opening of the door for nuclear weapons to spread among more than the currently acknowledged nuclear states This book explains how these three weakening forces interact with one another and with US and Russian policy making in order to create an environment of large possibilities for cooperative security but also of considerable danger Instead the choices made by military planners and policy makers will create an early twenty first century story privileging nuclear stability or chaos The US and Russia can and should make incremental progress in arms control and nonproliferation This book will be of much interest to students of nuclear proliferation and arms control strategic studies international security and IR in general Stephen J Cimbala is

Distinguished Professor of Political Science at Pennsylvania State University He is the author of numerous works in the fields of international security defense studies nuclear arms control and other topics He has consulted for various US government agencies and defense contractors **Globalization, War, and Peace in the Twenty-first Century** W. Nester, 2010-11-14

This book explores humanity's most persistent and tragic problem by answering some crucial questions including How is military power created and asserted What are weapons of mass destruction and what is the likelihood of them being used What are the source methods and results of terrorism and counterterrorism
