Nuclear Magnetic Resonance Spectroscopy Of Nuclei And Other Protons:

Nuclear Magnetic Resonance Spectroscopy of Nuclei Other Than Protons T. Axenrod, Graham Alan Webb, 1974 NMR
— *From Spectra to Structures* Terence N. Mitchell, Burkhard Costisella, 2013-04-17 Nuclear magnetic resonance spectroscopy is one of the most important analytical methods available today This practice oriented textbook aims at teaching the use of NMR spectra in the elucidation of organic structures The emphasis of NMR from Spectra to Structures is on practical rather than on theoretical aspects which are treated only briefly The book is intended as a practical guide to today s standard NMR experiments for students and laboratory personnel A set of thirty five graded problems reinforces the reader s understanding of how problems of structure elucidation are solved by using NMR

Nuclear Magnetic Resonance Spectroscopy Pál Sohár, 1983 V 1 Theory of nuclear magnetic resonance spectroscopy NMR spectrometers recording techniques measuring methods v 2 Proton resonance spectroscopy The resonance spectra of nuclei other than hydrogen v 3 Structure determination problems

Nuclear Magnetic Resonance Spectroscopy Joseph B. Lambert, Eugene P. Mazzola, Clark D. Ridge, 2019-01-04 Combines clear and concise discussions of key NMR concepts with succinct and illustrative examples Designed to cover a full course in Nuclear Magnetic Resonance NMR Spectroscopy this text offers complete coverage of classic one dimensional NMR as well as up to date coverage of two dimensional NMR and other modern methods It contains practical advice theory illustrated applications and classroom tested problems looks at such important ideas as relaxation NOEs phase cycling and processing parameters and provides brief yet fully comprehensible examples It also uniquely lists all of the general parameters for many experiments including mixing times number of scans relaxation times and more

Nuclear Magnetic Resonance Spectroscopy An Introduction to Principles Applications and Experimental Methods 2nd Edition begins by introducing readers to NMR spectroscopy an analytical technique used in modern chemistry biochemistry and biology that allows identification and characterization of organic and some inorganic compounds It offers chapters covering Experimental Methods The Chemical Shift The Coupling Constant Further Topics in One Dimensional NMR Spectroscopy Two Dimensional NMR Spectroscopy Advanced Experimental Methods and Structural Elucidation Features classical analysis of chemical shifts and coupling constants for both protons and other nuclei as well as modern multi pulse and multi dimensional methods Contains experimental procedures and practical advice relative to the execution of NMR experiments Includes a chapter long worked out problem that illustrates the application of nearly all current methods Offers appendices containing the theoretical basis of NMR including the most modern approach that uses product operators and coherence level diagrams By offering a balance between volumes aimed at NMR specialists and the structure determination only books that focus on synthetic organic chemists

Nuclear Magnetic Resonance Spectroscopy An Introduction to Principles Applications and Experimental Methods 2nd Edition is an excellent text for students and post graduate students working in analytical and bio sciences as well as scientists who use NMR

Gutowsky, 1988-11-01 Nuclear Magnetic Resonance Spectroscopy Second Edition focuses on two dimensional nuclear magnetic resonance NMR spectroscopy high resolution NMR of solids water suppression multiple quantum spectroscopy and NMR imaging The selection first takes a look at the fundamental principles and experimental methods Discussions focus on the NMR phenomenon dipolar broadening and spin spin relaxation nuclear electric quadrupole relaxation saturation magnetic shielding and chemical shift magnetic field transitions between the nuclear energy levels and resolution and sensitivity considerations The manuscript then ponders on chemical shift coupling of nuclear spins and nuclear relaxation and chemical rate processes Topics include spin lattice relaxation spin spin relaxation spin decoupling and associated techniques and description and analysis of spin systems The text examines two dimensional NMR spectroscopy macromolecules and NMR of solids including magic angle spinning cross polarization proton dipolar broadening biopolymers and chain motion in macromolecules The selection is a valuable source of data for readers interested in nuclear magnetic resonance spectroscopy **Nuclear Magnetic Resonance** T.I. Atta-Ur-Rahman, 2012-12-06 Nuclear magnetic resonance spectroscopy is presently going through an explosive phase of development This has been brought about largely on account of the advent of Fourier transform NMR spectrometers linked to powerful microcomputers which have opened up a whole new world for structural chemists and biochemists This is exemplified by a host of publications especially on new pulse sequences which continue to provide new exciting modifications for recording two dimensional NMR Moreover NMR is no longer confined to structural chemists but has moved firmly into the area of medicine as a powerful nondestructive body scanning technique With this background I felt that there was need for a text which would provide a fairly comprehensive account of the important features of ^1H and ^{13}C NMR spectroscopy in one book as well as make available an up to date account of recent developments of new pulse sequences with particular reference to 2D NMR spectroscopy Since this book is written for students of chemistry and biochemistry as well as for biology students who have chemistry as a subsidiary it was decided to avoid a complex mathematical treatment and to present as far as possible without oversimplification a qualitative account of ^1H and ^{13}C NMR spectroscopy as it is today I hope that the book satisfactorily meets these objectives Nuclear Magnetic Resonance Spectroscopy in the Study of Neoplastic Tissue Raffaella Tosi, Vitaliano Tugnoli, 2005
