Nuclear Winter M.A. Harwell, 2012-12-06 In 1982 three conservationists in the United States discussed a growing concern they shared about the long term biological consequences of nuclear war they wondered what such a war would do to the air the water the soils 1 the natural systems upon which all life depends I was one of those three the others were executives of two philanthropic foundations Robert L Allen of the Henry P Kendall Foundation and the late Robert W Scrivner of the Rockefeller Family Fund Together we began trying to find out what the scientific community was doing about the problem and what steps could be taken to alert the environmental movement to the need to address the subject We knew that a large scale nuclear war might kill from 300 million to a billion people outright and that another billion could suffer serious injuries requiring immediate medical attention care that would be largely unavailable But what kind of world would survivors face Would the long term consequences prove to humanity and survival of all species than the to be even more serious immediate effects We found that comparatively little scientific research had been done about the environmental consequences of a nuclear war of the magnitude that today's huge arsenal could unleash *Nuclear Winter and Its Implications* United States. Congress. Senate. Committee on Armed Services, 1986 **A Nuclear Winter's Tale** Lawrence Badash, 2009-07-10 The rise and fall of the concept of nuclear winter played out in research activity public relations and Reagan era politics The nuclear winter phenomenon burst upon the public's consciousness in 1983 Added to the horror of a nuclear war's immediate effects was the fear that the smoke from fires ignited by the explosions would block the sun creating an extended winter that might kill more people worldwide than the initial nuclear strikes In *A Nuclear Winter's Tale* Lawrence Badash maps the rise and fall of the science of nuclear winter examining research activity the popularization of the concept and the Reagan era politics that combined to influence policy and public opinion Badash traces the several sciences including studies of volcanic eruptions ozone depletion and dinosaur extinction that merged to allow computer modeling of nuclear winter and its development as a scientific specialty He places this in the political context of the Reagan years discussing congressional interest media attention the administration's plans for a research program and the Defense Department's claims that the arms buildup underway would prevent nuclear war and thus nuclear winter *A Nuclear Winter's Tale* tells an important story but also provides a useful illustration of the complex relationship between science and society It examines the behavior of scientists in the public arena and in the scientific community and raises questions about the problems faced by scientific Cassandras the implications when scientists go public with worst case scenarios and the timing of government reaction to startling scientific findings *Arthur H. Westing* Arthur H. Westing, 2012-08-20 Since the 1960s the environment has become an issue of increasing public concern in North America and elsewhere Triggered by the Second Indochina War Vietnam Conflict of 1961 1975 and further encouraged by the International Conference on the Human Environment held in Stockholm in 1972 the environmental impact of war emerged and grew as a topic of research in the

natural and the social sciences And in the late 1980s this led additionally to a focus and debate on environmental security Arthur Westing a forest ecologist was a major pioneer contributing and framing both of those debates conceptually theoretically and empirically starting with Harvest of Death Chemical Warfare in Vietnam and Cambodia 1972 co authored with wildlife biologist E W Pfeiffer and others As a Senior Researcher at the Stockholm and Oslo International Peace Research Institutes SIPRI and PRIO and as a Professor of Ecology at Windham and Hampshire Colleges Westing authored and edited books on Ecological Consequences of the Second Indochina War 1976 Weapons of Mass Destruction and the Environment 1977 Warfare in a Fragile World Military Impact on the Human Environment 1980 Herbicides in War the Long term Ecological and Human Consequences 1984 Environmental Warfare a Technical Legal and Policy Appraisal 1984 Explosive Remnants of War Mitigating the Environmental Effects 1985 Global Resources and International Conflict Environmental Factors in Strategic Policy and Action 1986 Cultural Norms War and the Environment 1988 Comprehensive Security for the Baltic an Environmental Approach 1989 and Environmental Hazards of War Releasing Dangerous Forces in an Industrialized World 1990 as well as authoring numerous UN reports book chapters and journal articles This volume combines six of his pioneering contributions on the environmental consequences of warfare in Viet Nam and in Kuwait on the environmental impact of nuclear war and on legal constraints and military guidelines for protecting the environment in wartime **The Climatic, Biological, and Strategic Effects of Nuclear War** United States. Congress. House. Committee on Science and Technology. Subcommittee on Natural Resources, Agriculture Research, and Environment, 1985

Horrendous Death, Health, and Well-being Daniel Leviton, 1991 A treatment of the incidence of horrendous death both inadvertent and deliberate which views the phenomenon as the greatest public health problem of modern times The author argues that as man causes such deaths he can also learn to eliminate them by collective action The Future of Anthropological Knowledge Henrietta Moore, 2003-12-16 The Future of Anthropological Knowledge the chapters explore the question of the nature of social knowledge from a variety of perspectives and locations such as China Africa the USA and elsewhere By examining the changing nature of anthropological knowledge and of the production of that knowledge this book challenges the notion that only western societies have produced social theories of modernity and of global scope Knowledge of society can no longer be restricted to a knowledge of face to face social relations but must encompass the effect of technology global consumption patterns and changing geo political configurations The Future of Anthropological Knowledge will be of interest to anthropologists and students of culture and society The ^AOxford Companion to Global Change Andrew Goudie, David Cuff, 2008-11-21 The Oxford Companion to Global Change is a fresh look at the world and the compelling environmental issues of the early 21st century including global warming and its technical and regional implications as well as the prospects for current energy supplies and the promise of new technologies In one convenient volume it brings together current knowledge about the relations between technological social demographic economic and

political factors as well as biological chemical and physical systems It is an essential reference work for law and policy practitioners researchers and other professionals seeking to understand any aspect of global change **Climate and Geo-Sciences** A.L. Berger,S. Schneider,J.Cl. Duplessy,2012-12-06 It has been widely recognized recently that in order to make scientific progress on large and important problems eg carbon dioxide effects on climate viability of various sites for nuclear waste disposal etc it is necessary to integrate knowledge from wide ranging sets of disciplines This is certainly true in the climate sciences for progress in understanding the cause of the ice ages or the effects of industrial pollution on the future climate or even the likelihood of severe climatic consequences in the aftermath of nuclear war All require state of the art input from many geoscience disciplines climatology oceanography meteorology chemistry ecology glaciology geology astronomy space technology computer technology mathematics etc Major international meetings have called for interaction of such geo science disciplines to solve real world problems To move beyond the rhetorical level the NATO Special Programme on Global Transport Mechanisms in the Geo Sciences whose activities started in 1983 decided to organise his closing symposium on such a topic which focus on the relationship between climate and geo sciences This symposium was held at the end of May 1988 at the Universite Catholique de Louvain Louvain la Neuve Belgium One hundred and thirty participants from the 16 NATO countries and a number of non NATO countries assembled for the Symposium Another feature was the attendance by special invitation of 16 promising young scientists who might well become leading scientists on climate and geo sciences in their respective countries in the next century Energy Abstracts for Policy Analysis ,1989
