is to identify methods that could either increase the likelihood of these nuclear processes or provide real time external manipulation over them In the last chapter the book revisits the process of nuclear photoabsorption in optical laser generated plasma through experimental efforts offering a fresh interpretation of existing literature results Overall the book delivers a clear and comprehensive overview aiming to assist newcomers and established scientists in quickly grasping the core aspects of the subjects possibly guiding their research endeavors Hopefully this resource will act as a catalyst for sparking new ideas while providing insights into the intricacies and opportunities presented by nuclear excitations within the realm of nuclear physics
