Nude Photography Masterpieces From The Past 150 Years:

Nude Photography Peter-Cornell Richter,1998 The dawn of the daguerrotype 150 years ago has brought not only the birth of photography but a renaissance in the study of nudes as well This book tells the story of nudes in the photographic medium from the world s most important photographers Starting with the pioneer Daguerre whose 1839 photograph of a nude sculpture set artistic precedent this book spans the decades to early twentieth century greats such as Alfred Steiglitz Man Ray and Brassai to contemporary photographers such as Robert Mapplethorpe David Levinthal and Duane Michals The volume is a tour through a photographic gallery which treats the viewer to aspects of female beauty from the perspective of the camera lens Set against a historical background this book contrasts the art of taking pictures and its technological innovations with the academic tradition of painting nudes The appearance of a new means of capturing the nude the camera introduced an entirely new dimension to the fine arts The volume highlights the once fervent competition between the two media of photography and painting with refinements in technology allowing the newer art form to come into its own Each photograph is accompanied by a short essay that explains its story and interprets the photographic subjects Biographical entries summarize the information belonging to each work

Transcultural Turbulences Christiane Brosius,Roland Wenzlhuemer,2011-09-25 Today hardly anything moves as fast across the globe as images and media This fact opens new avenues to explore social and cultural change but also poses new theoretical challenges of how to grasp and better understand these changes and flows Moreover such movements across geophysical and cultural borders have a historical depth that enables us to explore globalisation and localisation in new ways Transculturality is still a relatively new field of research in the Humanities through which we sharpen our competence and literacy to come to terms with the complexity of globalised cultures This volume ventures into new domains of research on the transculturality of images and addresses the need to develop new or modify established often ethno and Eurocentric interpretations of what happens when images travel It does so by bringing together cutting edge research from fields such as art history cultural anthropology colonial history Islamic studies religious studies and literary criticism

The Nude Peter Weiermair,2004 This volume presents a selection of 200 extraordinary images that reflect the central role played by the genre of the nude in the history of photography and in its experimentation Ever since the invention of photography in 1839 the nude has constituted a favorite subject among the practitioners of the medium Through numerous extraordinary examples this volume documents the historical and stylistic development of the nude from its origins with the first daguerreotypes to the provocative images of contemporary photographers
