Object Concept:

Infant Development Sushila Srivastava, 2007-08-20 This book presents a compilation of research findings and conceptualizations in the area of infancy. It is a well known fact that research in the area of Infancy in our country is still in infant stage. Hence the author made a humble effort to compile the research findings factually oriented review of literature and discussions in the diverse areas of the infant development. It is believed that Infant Development will add a great deal of information to existing literature in this field. This book is a valuable source for all those specializing in Medicine Paramedical science Psychology Home science Sociology Social work Anthropology as well as for Policymakers and Parents. **Object**

Categorization Sven J. Dickinson, 2009-09-07 This edited volume presents a unique multidisciplinary perspective on the problem of visual object categorization. The result of a series of four highly successful workshops on the topic, the book gathers many of the most distinguished researchers from both computer and human vision to reflect on their experience, identify open problems, and foster a cross disciplinary discussion with the idea that parallel problems and solutions have arisen in both domains. Twenty seven of these workshop speakers have contributed chapters including fourteen from computer vision and thirteen from human vision. Their contributions range from broad perspectives on the problem to more specific approaches collectively providing important historical context, identifying the major challenges, and presenting recent research results. This multidisciplinary collection is the first of its kind on the topic of object categorization, providing an outstanding context for graduate students and researchers in both computer and human vision. **Reliable**

Object-Oriented Software Ed Seidewitz, Mike Stark, 1995 This 1998 book presents the underlying principles associated with object orientation and its practical application. **Formal Concept Analysis** Rokia Missaoui, Jürg Schmid, 2006-02-01 This

book constitutes the refereed proceedings of the 4th International Conference on Formal Concept Analysis held in February 2006. The 17 revised full papers presented together with four invited papers were carefully reviewed and selected for inclusion in the book. The papers show advances in applied lattice and order theory and in particular scientific advances related to formal concept analysis and its practical applications: data and knowledge processing including data visualization, information retrieval, machine learning, data analysis, and knowledge management. **Concept Data Analysis** Claudio

Carpineto, Giovanni Romano, 2004-10-22 With the advent of the Web along with the unprecedented amount of information available in electronic format, conceptual data analysis is more useful and practical than ever because this technology addresses important limitations of the systems that currently support users in their quest for information. Concept Data Analysis: Theory Applications is the first book that provides a comprehensive treatment of the full range of algorithms available for conceptual data analysis, spanning creation, maintenance, display, and manipulation of concept lattices. The accompanying website allows you to gain a greater understanding of the principles covered in the book through actively working on the topics discussed. The three main areas explored are interactive mining of documents or collections of

documents including Web documents automatic text ranking and rule mining from structured data The potentials of conceptual data analysis in the application areas being considered are further illustrated by two detailed case studies

Concept Data Analysis Theory Applications is essential for researchers active in information processing and management and industry practitioners who are interested in creating a commercial product for conceptual data analysis or developing content management applications

Logic Alexander Pfänder, 2013-05-02 Alexander Pfänder's classical phenomenological logic a masterwork of unmatched clarity is presented here for the first time in English The book unfolds the general essence of logic its object not acts of thinking but objective thoughts meanings and higher unities formed by them the nature and kinds 1 of judgments propositions and their truth and truth claims 2 of concepts and 3 of inferences 4 the first foundational principles of logic the principles of identity contradiction excluded middle and sufficient reason and of valid inferences their foundation in ontological principles as well as the valid forms of reasoning recognized in traditional logic and the reasons of their validity Being a new phenomenological exposition of traditional logic it reduces the symbolic language used to a minimum in order to concentrate on the logical meanings and laws themselves for which these symbols are signs

Psychoanalysis Arnold D. Richards, Martin S. Willick, 2013-05-13 Over the course of three decades in works spanning questions of theory technique and clinical practice Charles Brenner has emerged as one of the preeminent analysts of his generation a thinker whose probing estimation of mental conflict has promoted the evolutionary growth of analysis as theory even as it has clarified the clinical import of analysis as therapy In *Psychoanalysis The Science of Mental Conflict* distinguished theorists and clinicians pay homage to Brenner by presenting original essays that converge in their estimation of analysis as the science of mental conflict In sections that encompass The Theory of Psychoanalysis The Concepts of Psychoanalysis The Technique of Psychoanalysis The Clinical Practice of Psychoanalysis The Teaching of Psychoanalysis and The Application of Psychoanalysis the contributors show how the perspective of conflict broadened and refined by the clinical findings of recent decades offers a vehicle for creative theory building and as such a conceptual handle for apprising the indications for and action of psychoanalytic therapy Arnold Richards comprehensive overview of Brenner's ranging contributions to theory and practice along with Martin Willick's critical introductions to the various sections of the book round out a collection whose scope is complimented by its unusual coherence and thematic unity Taken together the essays comprising this book present readers with a cogent summary of current psychoanalytic thinking along with an exciting preview of where it is heading in the future As such this volume will be welcomed not only by analysts but by all mental health professionals who draw on and learn from the psychoanalytic assessment of conflict in mental life It is a work that follows Brenner's own example in promoting the critical understanding of a generation of theorists clinicians and educators

Wilfrid Sellars on Truth Stefanie Dach, 2024-12-11 This book offers an innovative defense of Wilfrid Sellars's notion of ideal truth Sellars adopts two attractive ideas about truth the pragmatist idea that the concept of truth cannot be understood

independently from the norms and practices we find ourselves with and the realist idea that there is one ultimate truth about how the world is Sellars is thus committed both to an immanent notion of truth and an ideal notion of truth This book discusses these countervailing tendencies and tries to reconcile them The author s defense of Sellars s notion of truth minimizes problematic commitments while still being recognizably rooted in Sellars s texts Additionally the author defends several innovative claims with respect to Sellars s thinking for example about the relative unimportance of his controversial concept of pictorial adequacy and about the neglected significance of considerations concerning context sensitive expressions in his thought Wilfrid Sellars on Truth will be of interest to scholars and advanced students working on Wilfrid Sellars pragmatism and questions about truth naturalism and scientific realism Chapters 3 4 and 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license This work was supported by the University of West Bohemia

Perceptual Development in Early Infancy B. McKenzie, R. H. Day, 2013-08-21 First published in 1987 This book is not intended to be either a comprehensive reference work or a systematic handbook on perception in infancy Nor is it another published report of a recently held conference It is a collection of state of the art essays on perception during the first year or so of infant development Rather than first choosing the topics and then finding experts to write about them the editors first chose the experts and invited them to write about those topics in which we know them to be interested and closely involved The outcome of this approach is a collection of chapters in which the authors at the same time critically review earlier contributions to the topic report their own work identify numerous unresolved problems and key issues and point out directions for future inquiry Naturally the emphasis placed on these facets varies markedly with both topic and author The result is a collection of commentaries that we believe to be comprehensive informative interesting and provocative

Dynamic Being Aljoscha Berve, Adam C. Scarfe, 2015-09-10 One of the most important characteristics of present day ontological research is the growing interest in and emphasis on the dynamic aspects of being and the process relational character of being itself However many important questions still await detailed answers For example what is the meaning of the concepts of dynamics dynamicity and dynamic ontology among others Are they identical to or similar with respectively processes process ontology process relational ontology Is process ontology a type of dynamic ontology *Dynamic Being Essays in Process Relational Ontology* examines these and many other questions and suggests fruitful approaches in dealing with such questions The book carries out two main tasks first investigating developments in the theory of dynamic and process relational ontologies and second exploring developments in the application of these ontologies The second task is multidisciplinary in character The authors of the chapters in this volume are specialists not only in philosophy but also in other fields of science including psychology biology mathematics logic and computer science their work providing a seed bed of novel possibilities for cooperative interdisciplinary research

Geomatics Solutions for Disaster Management

Jonathan Li,Sisi Zlatanova,Andrea Fabbri,2007-07-28 Effective utilization of satellite positioning remote sensing and GIS in disaster monitoring and management requires research and development in numerous areas including data collection information extraction and analysis data standardization organizational and legal aspects of sharing of remote sensing information This book provides a solid overview of what is being developed in the risk prevention and disaster management sector

On Scientific Representations G. Boniolo,2007-04-25 Scientific concepts laws theories and models are representations but are uniquely different This book explores each within an original philosophical framework rooted in the Kantian tradition Through a revisionist historical approach it shows how this tradition helps us rethink contemporary issues in epistemology and the philosophy of science

Advances in Multimedia Modeling Shipeng Li,Abdulmotaleb El Saddik,Meng Wang,Tao Mei,Nicu Sebe,Shuicheng Yan,Richang Hong,Cathal Gurrin,2013-01-05 The two volume set LNCS 7732 and 7733 constitutes the thoroughly refereed proceedings of the 19th International Conference on Multimedia Modeling MMM 2012 held in Huangshan China in January 2013 The 30 revised regular papers 46 special session papers 20 poster session papers and 15 demo session papers and 6 video browser showdown were carefully reviewed and selected from numerous submissions The two volumes contain papers presented in the topical sections on multimedia annotation I and II interactive and mobile multimedia classification recognition and tracking I and II ranking in search multimedia representation multimedia systems poster papers special session papers demo session papers and video browser showdown

Essays on the Evolutionary-Synthetic Theory of Language Alexey Koshelev,2020-04-14 This book implements a multidisciplinary approach in describing language both in its ontogenetic development and in its close interrelationship with other human subsystems such as thought memory and activity with a focus on the semantic component of the evolutionary synthetic theory The volume analyzes among others the mechanisms for grammatical polysemy and brings to light the structural unity of artefact and natural concepts such as CHAIR ROAD LAKE RIVER TREE Additionally object and motor concepts are defined in terms of the language of thought and their representation in neurobiological memory codes is discussed finally the hierarchic structure of basic meanings of concrete nouns is shown to arise as a result of their step by step development in ontogeny

Objects and Pseudo-Objects Bruno Leclercq,Sebastien Richard,Denis Seron,2015-04-24 The development of science logic mathematics and psychology in the 19th century made it necessary to introduce a growing number of new entities of which classical empiricism and strong extensionalism were unable to give a wholly satisfying account One of the major issues confronting the 20th century philosophers was to identify which of these entities should be rationally accepted as part of the furniture of the world and which should not and to provide a general account of how the latter are nevertheless subject to true predication The 13 original essays collected in this volume explore some of the main approaches to this issue in the 20th century including Brentano Meinong Husserl Carnap Frege Twardowski Kotarbinski Nicolai Hartmann and realist phenomenologists

Semantic Technology Zhe Wang,Anni-Yasmin Turhan,Kewen

Wang,Xiaowang Zhang,2017-11-06 This book constitutes the thoroughly refereed proceedings of the 7th Joint International Semantic Technology Conference JIST 2017 held in Goldcoast QLD Australia in November 2017 The 19 full papers and 4 short papers presented were carefully reviewed and selected from 37 submissions They present applications of semantic technologies theoretical results new algorithms and tools to facilitate the adoption of semantic technologies and are organized in topical sections on ontology and data management ontology reasoning linked data and query information retrieval and knowledge discovery knowledge graphs and applications of semantic technologies **Ontology Made Easy**

Amie Lynn Thomasson,2015 Existence questions have been topics for heated debates in metaphysics but this book argues that they can often be answered easily by trivial inferences from uncontroversial premises This easy approach to ontology leads to realism about disputed entities and to the view that metaphysical disputes about existence questions are misguided

Sensory Individuals Aleksandra Mroczko-Wąsowicz,Rick Grush,2023 Sensory Individuals Unimodal and Multimodal Perspectives provides an interdisciplinary well balanced and comprehensive look at different aspects of unisensory and multisensory objects using both nuanced philosophical analysis and informed empirical work The research presented in this book represents the field s progression from treating neural sensory processes as primarily modality specific towards its current state of the art according to which perception and its supporting neural processes are multi modal modality independent meta modal and task dependent Even within such approaches sensory stimuli properties brain activations and corresponding perceptual phenomenology can still be characterized in a modality specific way The book examines the basic building blocks of human perception and whether they are best understood as sensory modality dependent units of different forms or multimodal perceptual objects The book combines a variety of innovative and integrative angles to explore the topic and acts as a catalyst for an increasingly diverse field of research which is in an exciting phase of growth and advancement New questions are arising as quickly as they are being answered and the collection Sensory Individuals provides an original and up to date addition to the field Formal Ontology in Information Systems Nathalie Aussenac-Gilles,Torsten

Hahmann,Antony Galton,2024-01-15 FOIS is the flagship conference of the International Association for Ontology and its Applications a non profit organization which promotes interdisciplinary research and international collaboration at the intersection of philosophical ontology linguistics logic cognitive science and computer science This book presents the papers delivered at FOIS 2023 the 13th edition of the Formal Ontology in Information Systems conference The event was held as a sequentially hybrid event face to face in Sherbrooke Canada from 17 to 20 July 2023 and online from 18 to 20 September 2023 In total 62 articles from 19 different countries were submitted out of which 25 were accepted for inclusion in the conference and for publication corresponding to an acceptance rate of 40 percent The contributions are separated into the book s three sections 1 Foundational ontological issues 2 Methodological issues around the development alignment verification and use of ontologies and 3 Domain ontologies and ontology based applications In these sections ontological

aspects from a wide variety of fields are covered primarily from various engineering domains including cybersecurity manufacturing petroleum engineering and robotics but also extending to the humanities social sciences medicine and dentistry A noticeable trend among the contributions in this edition of the conference is the recognition that improving the tools to analyze align and improve ontologies is of paramount importance in continuing to advance the field of formal ontology The book will be of interest to all formal and applied ontology researchers and to those who use formal ontologies and information systems as part of their work

Cognitive Developmental Change Andreas Demetriou, Athanassios Raftopoulos, 2005-01-06 Cognitive Developmental Change makes a fascinating contribution to the fields of developmental cognitive and educational science by bringing together a uniquely diverse range of perspectives for analysing the dynamics of change Connecting traditional Piagetian information processing and psychometric approaches with newer frameworks for the analysis of developmental change it provides the reader with an account of the latest theory and research at the time of publication The contributors to the volume all internationally respected experts were asked when writing to consider three main aspects of cognitive change Its object what changes in the mind during development its nature how does change occur and its causes why does change occur Or what are the internal and external factors responsible for cognitive change As a result chapters cover key theories of cognitive change the factors that affect change including neurological emotional and socio cultural factors and methods for measuring and modelling change
