Experiential Therapies for Eating Disorders Lynne M. Hornyak, Ellen K. Baker, 1989-03-24 It should not surprise us that so many are finding unique value in the experiential techniques The fact that eating disordered patients adopt physical and often complex metaphoric means of expressing their emotional pain suggests the difficulty we are likely to encounter in asking them to articulate the inarticulable In moving to spatial kinesthetic and symbolic expression we are in a sense agreeing to speak the patient's language rather than our own Given the very nature of eating disorders many clinicians are finding that experiential methods are particularly applicable for treating patients who suffer from them Providing a valuable new tool for practitioners EXPERIENTIAL THERAPIES FOR EATING DISORDERS is the first text to focus solely on the application of expressive

therapies and experiential techniques to the treatment of anorexia nervosa and bulimia. Each chapter of this innovative work systematically reviews a single experiential treatment approach. Among these are guided imagery, hypnosis, structured eating, family sculpting, psychodrama, and gestalt therapy, dance movement therapy, art therapy, music therapy, and metaphor poetry therapy. Throughout, important clinical issues that often accompany eating disorders also are addressed, including such topics as self-awareness, self-esteem, autonomy, identity, impulse regulation, affect modulation, body image, and interpersonal relationships. Countertransference issues are examined, and areas needing further exploration, such as father's role in the development of eating disorders, the hypnotizability of eating-disordered patients, and the role of family in the treatment process, are delineated. The contributing authors, experienced practitioners from a variety of disciplines, systematically establish the theoretical framework of each treatment approach, fully describe specific techniques, and then consider their practical applications in both inpatient and outpatient settings, providing numerous case examples for illustration. They also offer helpful recommendations for incorporating these techniques into ongoing treatment plans. **EXPERIENTIAL THERAPIES FOR EATING DISORDERS**, a valuable clinical resource for psychologists, psychiatrists, and all mental health professionals called on to treat patients suffering from anorexia and bulimia nervosa. This innovative work illustrates the use of guided imagery, hypnosis, structured eating, family sculpting, psychodrama, and gestalt therapy, and dance movement, art, music, and metaphor poetry therapy in the treatment of anorexia and bulimia nervosa. Systematically presented are the theoretical framework of each treatment approach, specific techniques, and their practical applications, illustrated by numerous case examples. All professionals who treat clients with eating disorders will find this volume a most valuable clinical resource.

Eating disorders involve complex psychological processes linked to self-worth that may challenge many mental health and allied practitioners, no matter how experienced. It is a topic little taught in clinical practice, and much of the information on the subject can seem contradictory or even inaccurate. Yet it is vital when working with such a client to have a solid understanding of what helps people improve their relationship with food and feel good about their bodies and themselves. Based on extensive clinical experience and the latest evidence base, this new work from noted eating disorder specialist Dr. Vivienne Lewis supports mental health practitioners who may be unsure how best to handle the issue in their daily practice. Throughout the book, clients' voices shine through in numerous brief real-life stories illustrating the personal and practical impacts of eating disorders and successful recovery. It is relevant for psychologists, counsellors, nurses, youth workers, psychiatrists, doctors, dietitians, and trainees, and

includes sections on Understanding complex client presentations Challenging common myths about eating disorders Structuring therapeutic sessions Motivating clients to change The importance of supervision Clinical psychologist Dr Vivienne Lewis has spent more than 20 years in private practice and academia specialising in treating people with eating disorders and training other health professionals Her knowledge skills and compassion have helped children young people and adults face and defeat the destructive mental and physical effects of eating disorders and improve body image Vivienne knows the professional challenges of working with these clients well but also understands the reward for practitioners is seeing someone who is very unwell go on to live a healthy and fulfilling life *Eating Disorders, Food and Occupational Therapy* Joan Martin,1998-12-08 Written for academics and professionals working with patients suffering a range of eating related disorders this volume provides guidance on a number of therapeutic approaches and information on the causes of such disorders *Occupational Therapy and Mental Health* Jennifer Creek,Lesley Lougher,2008-01-01 Psychiatrie sant mentale **Crouch and Alers Occupational Therapy in Psychiatry and Mental Health** Rosemary Crouch,Tania Buys,Enos Morankoana Ramano,Matty van Niekerk,Lisa Wegner,2024-10-21 Celebrating its evolution over thirty four years the sixth edition of Crouch and Alers Occupational Therapy in Psychiatry and Mental Health continues its legacy as a trailblazing guide reshaped to address the challenges of a post Covid globalised world Led by renowned expert Rosemary Crouch this edition embraces an inclusive perspective on human functionality social inclusion and participation in everyday life Highlighting the pressing need for occupational therapy s role in addressing the burden of mental health disorders it forecasts the staggering economic impact and emphasises prevention resilience building and adaptive participation in daily activities Featuring thirty interconnected chapters by seasoned practitioners and academics this book Aligns with international mental health standards and sustainable development policies emphasising universal health access and human rights Covers key aspects of occupational therapy exploring theoretical perspectives for mental health care practice ethical considerations and cultural sensitivity advocating for occupational justice and breaking barriers in mental health care Introduces case studies and reflective questions at the end of each chapter to foster the integration of theory with practical application for different age groups Reflects upon emerging trends such as human ecosystem disruptions spirituality and mental health the impact of trauma on individuals and collectives and maternal mental health concerns Crouch and Alers Occupational Therapy in Psychiatry and Mental Health is ideal for occupational therapy students and newly qualified practitioners as well as any health professional looking for an up to date evidence based resource on this aspect of mental health care Diverse roles for Occupational Therapists Jane Clewes,Rob Kirkwood,2016-11-30 Diverse roles for occupational therapists is a compilation of a range of roles for occupational therapists Authors show how they have embraced opportunities extended roles and developed services along with the ever changing world of statutory services policy Whilst many of the chapters allude to mental health fields care coordination a number of mental health specialities Mental Health
