Occupying Power:

The 1949 Geneva Conventions Andrew Clapham, Paola Gaeta, Marco Sassòli, Iris van der Heijden, 2015 The four Geneva Conventions created in 1949 remain the fundamental basis of contemporary international humanitarian law They protect the wounded on the battlefield those wounded or shipwrecked at sea the treatment of prisoners of war and civilians in a war zone However since they were adopted warfare has changed considerably In this groundbreaking commentary over sixty experts from multiple disciplines within international law investigate how the Geneva Conventions are applied today It places the Conventions in the light of the developing obligations imposed by international law on states and individuals most notably through international human rights law and international criminal law The context in which the Conventions are applied and interpreted has changed considerably since they were first written The borderline between international and non international armed conflicts is not as clear cut as was once thought and is complicated further by the use of armed force mandated by the United Nations and the complex nature of certain internal armed conflicts The influence of other developing branches of international law such as human rights law and refugee law has been considerable The development of international criminal law has breathed new life into multiple provisions of the Geneva Conventions This commentary adopts a thematic approach to provide detailed analysis of each key article taking into account both judicial decisions and state practice Cross cutting chapters on issues such as transnational conflicts and the geographical scope of the Conventions also give readers a full understanding of the impact of the Geneva Conventions in their contemporary context This commentary on four of the most important treaties in international law is unmissable for anyone working in or studying situations of armed conflicts

Occupational Hazards David M. Edelstein, 2011-07-20 Few would contest that the U S occupation of Iraq is a clear example of just how fraught a military occupation can become In *Occupational Hazards* David M Edelstein elucidates the occasional successes of military occupations and their more frequent failures Edelstein has identified twenty six cases since 1815 in which an outside power seized control of a territory where the occupying party had no long term claim on sovereignty In a book that has implications for present day policy he draws evidence from such historical cases as well as from four current occupations Bosnia Kosovo Afghanistan and Iraq where the outcome is not yet known Occupation is difficult in Edelstein s view because ambitious goals require considerable time and resources yet both the occupied population and the occupying power want occupation to end quickly and inexpensively in drawn out occupations impatience grows and resources dwindle This combination sabotages the occupying power s ability to accomplish two tasks convince an occupied population to suppress its nationalist desires and sustain its own commitment to the occupation Structural conditions and strategic choices play crucial roles in the success or failure of an occupation In describing those factors Edelstein prescribes a course of action for the future

The Law of Occupation Yutaka Arai, 2009 This monograph analyses the historical evolution of the laws of occupation as a special branch of international humanitarian law IHL focusing

on the extent to which this body of law has been transformed by its interaction with the development of international human rights law. It argues that a large part of the laws of occupation has proved to be malleable while being able to accommodate changing demands of civilians and any other persons affected by occupation in modern context. Its examinations have drawn much on archival research into the drafting documents of the instruments of IHL including the aborted Brussels Declaration 1874, the 1899, 1907 Hague Regulations, the 1949 Geneva Conventions and the 1977 Additional Protocol I. After assessing the complementary relationship between international human rights law and the laws of occupation, the book examines how to provide a coherent explanation for an emerging framework on the rights of individual persons affected by occupation. It engages in a theoretical appraisal of the role of customary IHL and the Martens clause in building up such a normative framework.

The Handbook of Humanitarian Law in Armed Conflicts Dieter Fleck, Michael Bothe, 1999. This book offers the most authoritative commentary and analysis of international humanitarian law applicable in armed conflict available. It is based upon the Joint Service Regulation for the German Ministry of Defence augmented with extensive international references and accompanied by commentary by a team of distinguished and internationally renowned experts. Whilst the past decades have seen consistent development of international law applicable in armed conflict culminating in a series of International Covenants and Protocols, world events in recent years have made reassessment of the law both a timely and topical concern. This Handbook, available for the first time in paperback, will serve as an indispensable reference source for practising lawyers and academics working in the field of international humanitarian law and for military personnel worldwide.

The Handbook of International Humanitarian Law Dieter Fleck, 2013-08-29. This fully updated third edition of *The Handbook of International Humanitarian Law* sets out an international manual of humanitarian law accompanied by case analysis and extensive explanatory commentary by a team of distinguished and internationally renowned experts. The new edition takes account of recent developments in the law including the 2010 amendments to the ICC Statute, the progressive evolution of customary law and new jurisprudence from national and international courts and tribunals. It sheds light on controversial topics like direct participation in hostilities, air and missile warfare, belligerent occupation, operational detention and the protection of the environment in armed conflict. The book also addresses the growing need to consider the interface between international humanitarian law and human rights as well as other branches of international law both during armed conflicts and in post conflict situations. The commentary both deepens reflection on such innovations and critically reconsiders views expressed in earlier editions to provide a contemporary analysis of this changing field. Renowned international lawyers offer a broad spectrum of legal opinions restating the law in this area which is applicable worldwide. Particular attention is paid to problems of application of the law in recent military campaigns which are assessed and interpreted in a practice oriented manner. Based on best practice rules of global importance, this book gives invaluable guidance to practitioners and scholars of this important body of law.

The Occupation of Iraq: Volume 2 Stefan Talmon, 2014-07-18

The invasion and occupation of Iraq rank among the most controversial and complex issues in international law in recent history. This volume of documents covers the occupation of Iraq from the planning stages of the invasion of Iraq in early 2002 to the transfer of governing authority to the Iraqi Interim Government on 28 June 2004. The book presents 595 selected documents including the first complete set of all Regulations, Orders, Memoranda and Public Notices issued by the US led occupation administration of Iraq, the Coalition Provisional Authority (CPA), several of which were never published on the CPA's website or promulgated in *Al-Waqai Al-Iraqiya*, the Official Gazette of Iraq. Some of these legal acts have shaped the economic and political system of present day Iraq and will be part of the country's legal order for years to come. The book also includes some 120 other CPA and CPA related documents selected from more than 5000 unclassified CPA documents and received under freedom of information requests lodged in the United States, the United Kingdom, Australia and Switzerland. These documents include instructions and proclamations to the Iraqi people in the early stages of the occupation, organizational charts, internal legal opinions, diplomatic notes, international agreements concluded by the CPA with other States and numerous internal memoranda for the head of the CPA, Ambassador Paul L. Bremer, on legal, diplomatic and political issues. The book also presents for the first time all 235 resolutions passed by the Iraqi Governing Council (IGC) between July 2003 and June 2004. The resolutions as well as many of the 25 other important IGC documents including various political statements, press releases and decrees of the Council's Higher National De-Ba'athification Commission have been translated from Arabic and are presented here for the first time in English. These documents are complemented by the relevant United Nations documents on the occupation of Iraq as well as some 50 policy documents of the United States, the United Kingdom and the Iraqi opposition movement as well as all relevant fatwas, religious rulings of Grand Ayatollah Ali al-Sistani which shaped the internal Iraqi political process during the occupation. This collection archives these important documents for future use and makes them easily accessible to researchers and professionals. Considering that the main source of information for the occupying powers in Iraq were the precedents set during the First and Second World Wars, the occupation of Iraq will serve as a modern precedent for future administrations of occupied territory. The documents are made easily accessible by a comprehensive table of documents, a list of abbreviations, more than 1100 explanatory notes and cross references and a substantive subject index. This volume is the second on *The Occupation of Iraq*. It is complemented by a

monograph by the same author which on the basis of the documents collection presents a comprehensive analysis of The Governance of Occupied Territory in Contemporary International Law *The International Law of Belligerent Occupation* Yoram Dinstein, 2019-03-28 Addresses some fundamental issues underlying the regime of belligerent occupation

International Humanitarian Law Marco Sassòli, 2024-02-12 In this thoroughly updated second edition of what has quickly become the definitive text in the field of international humanitarian law IHL leading expert Marco Sass li evaluates the application of IHL the way in which hostilities should be conducted against an adversary and the pertinence of traditional distinctions such as that between international and non international armed conflicts **Documents on the Law of UN**
