Global Fissures Clara A.B. Joseph, 2006-01-01 The essays in this volume examine the tensions between two major political and intellectual structures the global and the postcolonial charting the ways in which such tensions are constitutive of changing power relations between the individual the nation state and global forces Contributors ask how postcolonialism with its emphasis on cultural difference and diversity can respond to the new neo imperialist imperatives of globalization Signalling the discursive grounds for debate is the fissures fusions title suggesting alternative categorizations of stereotypes like global homogenization and postcolonial resistance Interwoven are considerations of the intellectual or writer's position today Literary texts from a wide range of countries are analysed for their resistance to global hegemony and for representations of manipulative power structures in order to highlight issues such as environmental loss nationality migrancy and marginality Specific topics covered include westernizing the Indian academy ecotourism and the new media of computer technology the corporatization of creativity in re branding New Zealand including film and the hybrid forms of Latin American photography Writers discussed include Chinua Achebe Samuel Beckett Hafid Bouazza Bei Dao Mahmoud Darwish Witi Ihimaera James Joyce Yann Martel Rohinton Mistry Ellen Ombre Michael Ondaatje George Orwell Arundhati Roy Salman Rushdie and Edward Said Different essays stress the hegemony of global networks the technological revolution's revitalizing of niche marketing while marginalizing postcolonial resistance the implications of the internationalization of culture for the indigene and the potential of cultural hybridity to collapse cultural hierarchies

New Germans, New Dutch Liesbeth Minnaard, 2025-10-01 In the globalised world of today traditional definitions of national Self and national Other no longer hold The unmistakable transformation of German and Dutch societies demands a thorough rethinking of national boundaries on several levels This book examines how literature of migration intervenes in public discourses on multiculturalism in Germany and the Netherlands epitomised in the strikingly parallel debates on the German Leitkultur and the Dutch multicultural drama in the year 2000 By juxtaposing detailed analyses of literary work by the

Turkish German writers Emine Sevgi Zdamar and Feridun Zaimoglu and the Moroccan Dutch writers Abdelkader Benali and Hafid Bouazza *New Germans New Dutch* offers crucial insights into the specific ways in which this literature negotiates its national context of writing This book demonstrates how German literature of migration seeks alternative forms of community outside the national parameters whereas the Dutch literature negotiates difference and re imagines Dutchness within the national framework

Re-Thinking Europe ,2008-01-01 *Re Thinking Europe* sets out to investigate the place of the idea of Europe in literature and comparative literary studies The essays in this collection turn to the past in which Europe became synonymous with a tradition of peace and tolerance beyond national borders and enter into a critical dialogue with the present in which Europe has increasingly become associated with a history of oppression and violence The different essays together demonstrate how the idea of Europe cannot be thought apart from the tension between the regional and the global between nationalism and pluralism and can therefore be re thought as an opportunity for an identity beyond national or ethnic borders Engaging contemporary discourses on hybrid postcolonial and transnational identity this volume shows how literature can function as both a vital tool to forge new identities and a power subversive of such attempts at identity formation Like Europe it is always marked by the tension between integration and resistance The book will be of interest to students and scholars of modern literature comparative literature and European studies as well as people concerned with cultural memory and the relation between literature and cultural identity

New Germans, New Dutch Liesbeth Minnaard,2008 In today s globalized world traditions of a national Self and a national Other no longer hold This timely volume considers the stakes in our changing definitions of national boundaries in light of the unmistakable transformation of German and Dutch societies Examining how the literature of migration intervenes in public discourses on multiculturalism and including detailed analysis of works by the Turkish German writers Emine Sevgi Zdamer and Feridun Zaimoglu and the Moroccan Dutch writers Abdelkader Benali and Hafid Bouazza *New Germans New Dutch* offers crucial insights into the ways in which literature negotiates both difference and the national context of its writing

Writing the Earth, Darkly Isabel Hoving,2017-02-08 Why do we find so many references to nature and the environment in the many Caribbean literary texts that try to come to terms with the contemporary age of globalization Even when these novels and poems do not seem to be concerned with environmental issues at all they abound with fragrant creepy or dark references to flowers insects trees gardens and mud This book discusses a range of Anglophone and Dutch language Caribbean literary texts to propose an answer It shows that some writers evoke nature to question oppressive notions of what is natural and what is not when it comes to race gender and desire Other writers choose to counter the destructive dichotomies of wildness order nature culture nature human that marked colonialism Instead they represent the environment as a field of interconnectedness marked by intense semiotic interaction in which human beings are also implicated But writing about nature can also be a means to reconnect with the very foundations of life itself In the most dramatic cases references to nature evoke an extra

discursive space that then functions to subvert existing discourses That space may even mark the site of the annihilation of discourse or of the self These texts suggest that in times of globalization it is only the dark queer turn to matter that will free the path to imagining human existence in a new way The book's proposal to understand some of these fascinating texts as an effort to relate to the mind baffling explosive real is inspired by postcolonial trauma theory posthumanism and new materialism However Caribbean literature is a layered practice that does much more than merely explore the world's materiality It works simultaneously as cultural critique counter discourse and as the manipulation of affect This book therefore brings together ecocriticism with Caribbean and postcolonial studies the study of globalization trauma theory the study of gender and sexuality posthumanism and new materialism to bring out the full complexity of these wise texts Thus it hopes to show its readers their extraordinary innovative potential

European Neutrals and Non-Belligerents During the Second World War Neville Wylie, 2002 This collection provides a comprehensive English language survey of the conduct of neutral and non belligerent states during the war Instead of narrowly focusing on the few neutrals that survived the war intact the volume broadens our understanding of neutrality by including chapters on non belligerents and those neutrals of south east Europe such as Romania and Yugoslavia The essays focus on how individual neutral governments perceived international developments and throw light on the domestic political circumstances that critically affected their response to the course of the war They therefore provide the political context that has been overlooked in controversies surrounding their humanitarian and financial activities While based on the authors own research the essays draw widely on secondary literature and provide invaluable analytical introductions to the large amount of historical writing on these countries Europa Jan Frederik Jansen, 1872 *The Legacy of Nazi Occupation* Pieter Lagrou, 1999-02-13 This volume in Studies in the Social and Cultural History of Modern Warfare series examines how France Belgium and the Netherlands emerged from the military collapse and humiliating Nazi occupation they suffered during the Second World War Rather than traditional armed conflict the human consequences of Nazi policies were resistance genocide and labour migration to Germany Pieter Lagrou offers a genuinely comparative approach to these issues based on extensive archival research he underlines the divergence between ambiguous experiences of occupation and the univocal post war patriotic narratives which followed His book reveals striking differences in political cultures as well as close convergence in the creation of a common Western European discourse and uncovers disturbing aspects of the aftermath of the war including post war antisemitism and the marginalisation of resistance veterans Brilliantly researched and fluently written this book will be of central interest to all scholars and students of twentieth century European history *The Sorrows of Belgium* Martin Conway, 2012-01-12 The liberation of Belgium by Allied troops in September 1944 marked the end of a harsh German Occupation but also the beginning of a turbulent and decisive period in the history of the country There would be no easy transition to peace Instead the rival political forces of King Leopold III and his supporters the former government in exile in London and the Resistance movements which had emerged during the Occupation confronted each other in a bitter struggle for political ascendancy The subsequent few years were dominated by an almost continual air of political and social crisis as Resistance demonstrations strikes and protests for and against the King appeared to threaten civil war and the institutional dissolution of the country And yet by 1947 a certain stability had been achieved the Resistance groups had been marginalised the Communist Party was excluded from government the King languished in unwilling exile in Switzerland and most tangibly the pre war political parties and the parliamentary political

regime had been restored In this substantial contribution to the history of the liberation era in Europe Martin Conway provides the first account based on substantial new archival material of this process of political normalisation which provided the basis for the integration of Belgium into the post war West European political order That success however came at a cost the absence of any substantial political reform after the Second World War exacerbated the tensions between the different social classes linguistic communities and regions within Belgium providing the basis for the gradual unravelling of the Belgian nation state which occurred over the second half of the twentieth century

Wartime Schooling and Education Policy in the Second World War Sarah Van Ruyskensvelde, 2016-08-18 This book deals with the development of private secondary schooling during the Second World War in Belgium It focuses on how the German occupier used education to gain acceptance of the regime and discusses the attitudes of Belgian education authorities schools teachers and pupils towards the German occupation Suggesting that the occupation forced Belgian education authorities such as the Roman Catholic Church to take certain positions the book explores the wartime experiences and memories of pupils and teachers It explains that the German Culture Department was relatively weak in establishing total control over education and that Catholic schools were able to maintain their education project during the war However the book also reveals that in some cases the German occupation did not need total control over education in order to find support for some authoritarian ideas As such Van Ruyskensvelde's analysis presents a nuanced view of the image of the Catholic Church schools teachers and pupils as mere victims of war

De beiaard Marnix Beyen, Luc Rombouts, Staf Vos, 2009 Sinds vijf eeuwen is beiaardmuziek een typisch kenmerk van de steden in de Lage Landen De beiaard maakt zozeer deel uit van het klankbeeld dat hij nauwelijks nog wordt opgemerkt Toch heeft precies zijn alomtegenwoordigheid ervoor gezorgd dat mensen allerhande betekenissen aan hem hebben toegekend Die betekenissen overstijgen het domein van de zuivere muziek De beiaard werd beschouwd als de stem van bevolkingsgroepen en als een symbool van de waarden die hun leden met elkaar deelden Over de afbakening van die groepen en over de inhoud van die waarden bestonden echter uiteenlopende meningen en rezen conflicten De beiaard werd dus onvermijdelijk een politiek instrument In België een land dat doortrokken was van maatschappelijke tegenstellingen werd hij dat meer dan waar ook Soms was de beiaard een toonbeeld van burgerlijk liberale waarden dan weer van een strijdbaar katholicisme Nu eens was hij Vlaams dan weer Belgisch Door de manieren te onderzoeken waarop de beiaard werd verbeeld
