Economic Globalisation as Religious War Michael McKinley, 2007-06-28 Using a critical theory approach to analyze the globalization of the world

economy this provocative and topical new book presents economic globalization not as a recent development but rather as a familiar process that has occurred throughout history Michael McKinley argues that it is ultimately a self serving arbitrary and destructive imperial project that should be viewed as a religious war The Pacific Ranginui Walker, William M. Sutherland, 1988 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1973 **The Societal Learning Approach** Thomas D. Watts, 1981 **Ordinary Ecstasy** John Rowan, 2015-12-22 Humanistic Psychology ranges far and wide into education management gender issues and many other fields Ordinary Ecstasy first published in 1976 is widely regarded as one of the most important books on the subject Although this new edition still contains much of the original material it has been completely rethought in the light of postmodern ideas with more emphasis on the paradoxes within humanistic psychology and takes into account changes in many different areas with a greatly extended bibliography Ordinary Ecstasy is written not only for students and professionals involved in humanistic psychology anyone who works with people in any way will find it valuable and interesting **The Analysis of Psychological Theory** Henderikus J. Hartup, Jan de Wit, 2013-09-24 Determinants of Behavioral Development documents the proceedings of the International Society for the Study of Behavioral Development s first symposium at the University of Nijmegen in The Netherlands 4 July 1971 The symposium was planned under the general theme Genetic and Social Influences on Psychological Development Perhaps the major contribution of the Nijmegen Symposium and of this volume is the establishment of a new linkage between European and American research in developmental psychology This volume contains 64 papers organized into eight parts The papers in Part I deal with issues of research strategy Part II presents studies on biological determinants of development Part III examines cultural and societal factors in development while Part IV focuses on the concepts of deprivation and enrichment Part V presents selected studies on infants Part VI investigates cognitive process in child development Part VII contains papers on socialization themes while Part VIII takes up adult development **Models of Man** J.J. Dagenais, 2012-12-06 This essay is first a theoretical and historical study of some classical scientific ways of studying human being in the world The more readily accessible and more commonly discussed models of being human were chosen for review here but structuralism is included because I believe it will have the same impact in America as it has had in France and I hope that American readers might be forewarned about what may be ideologically at stake before the technical and fruitful aspects of the movement become an academic fad in the United States The subjects included are mainline experimental psychology from Wundt to Skinner with its relatively shortlived functionalist and Watsonian behaviorist formulations holistic psychology from Brentano through Stumpf Husserl and Goldstein to Maslow Rogers and contemporary third force psychology and the psychoanalytic model for which the only paradigm is Freud himself Preeminence is given to psychological paradigms since their subject matter lies closest to the classical philosophical tradition

from which philosophical anthropology emerged This book is in the final analysis a prolegomenon to an articulated philosophical anthropology Sociological models are also considered the classical tradition from Comte to the present and Marxist anthropology from the manuscripts of 1844 to the present The structuralist model from Durkheim to Chomsky is also considered since it cuts across and gives new dimensions to all the foregoing models The essay is second a phenomenological critique of these historico theoretical considerations Reconstructing the Psychological Subject Betty M Bayer, John Shotter, 1998-01-12 This major book offers a comprehensive overview of key debates on subjectivity and the subject in psychological theory and practice In addition to social construction's long engagement with social relations this volume addresses questions of the body technology intersubjectivity writing and investigative practices The internationally renowned contributors explore the tensions and opposing viewpoints raised by these issues and show how analyzing the psychological subject interrelates with reforming the practices of psychology Drawing on perspectives that include feminism dialogics poststructuralism hermeneutics Lacanian psychoanalysis and cultural or social studies of science readers are guided through pivotal Sixties Radicalism and Social Movement Activism Bryn Jones, Mike O'Donnell, 2012-10 This book's four main aims are to examine firstly why movements happened in the socio historical context of sixties radicalism secondly its distinctive legacy of crucial cultural societal and political interconnections thirdly continuing links between seminal ideas and movements and socio political activism today fourthly little discussed national instances and divergent impacts of sixties radicalism in relation to contemporary global social movements A conclusion traces all these dimensions from current social movements back to sixties radicalism's pioneering upheavals **The Open-Source Everything Manifesto** Robert David Steele, 2012-06-05 What the world lacks right now especially the United States where every form of organization from government to banks to labor unions has betrayed the public trust is integrity Also lacking is public intelligence in the sense of decision support knowing what one needs to know in order to make honest decisions for the good of all rather than corrupt decisions for the good of the few The Open Source Everything Manifesto is a distillation of author strategist analyst and reformer Robert David Steele life's work the transition from top down secret command and control to a world of bottom up consensual collective decision making as a means to solve the major crises facing our world today The book is intended to be a catalyst for citizen dialog and deliberation and for inspiring the continued evolution of a nation in which all citizens realize our shared aspiration of direct democracy informed participatory democracy Open Source Everything is a cultural and philosophical concept that is essential to creating a prosperous world at peace a world that works for one hundred percent of humanity The future of intelligence is not secret not federal and not expensive It is about transparency truth and trust among our local to global collective Only open is scalable As we strive to recover from the closed world corruption and secrecy that has enabled massive fraud within governments banks corporations and even non profits and universities this timely book is a manifesto for liberation not just open technology but open everything
