Children's

Publishing and Black Britain, 1965-2015 Karen Sands-O'Connor, 2017-06-23 This book examines a critical period in British children's publishing from the earliest days of dedicated publishing firms for Black British audiences to the beginnings of the Black Lives Matter movement in the UK. Taking a historical approach that includes education, acts of Black protest, community publishing, and children's literature, the study investigates the motivation behind both independent and mainstream publishing firm decisions to produce books for a specifically Black British audience. Beginning with a consideration of early reading schemes that incorporated Black and Asian characters, the book continues with a history of one of the earliest presses to publish for children, Bogle-L'Ouverture. Other chapters look at the influence of community-based and independent presses, the era of multiculturalism and anti-racism, the effect of racially motivated violence on children's publishing, and the dubious benefit of awards for Black British publishing. The volume will appeal to children's literature scholars, librarians, teachers, education policy makers, and Black British historians.

Discourses of Antiracism in France Catherine Lloyd, 2018-10-26 First published in 1998, this book is an examination of antiracist discourses and practices in France. It sets out to trace the development of post-war French antiracism through the life of antiracist organizations, setting this within a broader historical, political, and social context. It breaks new ground in that it analyses antiracism as a body of ideas in its own right, rather than as a mirror image of racism. The author uses previously unpublished archival material from French organizations, combined with observations from current events. She argues that antiracist discourses and practices are structured around four main themes: discrimination, representation, solidarity, and hegemony. While perceptions of discrimination have evolved into complex understandings of social exclusion, the representational functions of antiracist groups were challenged by immigrant workers' movements themselves. Solidarity remained central to antiracist practices in different political contexts. Underpinning these features lies a hegemonic social project through which antiracists have sought to promote a common sense through political and educational campaigns. The author concludes that French antiracism, although constantly changing and refocusing, is now a pluralist, transversal, hegemonic movement and an important component of civil society.

Transnational Ties Michael Peter Smith, John Eade, 2017-09-08 Cities are key sites of the transnational ties that increasingly connect people, places, and projects across the globe. They provide opportunities and constraints within which transnational actors and networks operate, and nodes linking wider social formations traverse national borders. This book brings together a series of richly textured ethnographic studies that suggest new ways to situate and historicize transnationalism, identify new pathways to transnational urbanism, and map

the contours of translocal interregional and diasporic connections not previously studied The transnational ties treated in this book truly span the globe giving concrete meaning to the phrase globalization from below How have the contributors to this book conceptualized the wider context informing the conduct of their ethnographically grounded multi sited research on the relationship between cities migration and transnationalism Several interrelated contextual dimensions have been singled out as affecting the opportunities and constraints experienced by transnational migrant subjects Socio spatially in several of these chapters the political economic context now called neoliberal globalization is shown to be a key driving force creating conditions that necessitate facilitate or impede migration foster trans local economic ties and create new inter regional interdependencies e g new South South and East East transnational ties The changing historical context of both migrating groups and the cities and regions they move across are central to the study of the interplay of urban change and migrant transnationalism The historical particularities of migrant recruitment migration histories migratory narratives and changing gender and class relations all affect the character and geography of transnational migration with an impact on the social structures of community formation This is a pioneering effort in the Comparative Urban and Community Research series
