development of new technology that has greatly affected people's lives. Formerly to seek information people can get it through conventional radio, media, newspapers, and television. But now only use the smartphone we can get very much information that can be obtained by accessing the online media portal or sharing and socializing through social media. For decades it has been stated that the media has the power to shape public opinion. Media not only can form a worldview of society but also able to create awareness and individual belief in reality, a reality that has been defined by the media. Media has a powerful and direct effect to the audience market. Including how then the media formed an opinion in the community about gender roles through the content provided by the new media. Global Radio Shaheed Nick Mohammed, 2019-09-25. *Global Radio: From Shortwave to Streaming* chronicles the development of radio as a global medium. In this book, Shaheed Nick Mohammed examines the evolution of radio from its early uses as little more than a novelty into a set of powerful systems for international exchanges of news, culture, and political influence. In doing so, the book follows the development of radio as a wireless form of the telegraph, its evolution into a medium for sound transmission across the air, and its adaptation to digital networked audio and transmissions technologies. Mohammed also outlines the myriad changes in the radio industry in numerous contexts around the globe and over time, including the early development of commercial and non-commercial broadcasting in the United States, Europe, India, and China, and the evolution of so-called international broadcasters. As radio played a part in colonial politics, it also figured prominently in the politics of the post-colonial. Within the broader context of global radio, this book examines several former colonies and the transformation of radio from a tool of empire into an instrument of national development. It also focuses on instances in which developing nations have used radio to bridge the gap between rural audiences and digital networked technologies connecting them to the global information superstructure. Scholars of media studies, communication, radio studies, international relations, and political science will find this book particularly useful.
