Radioactive Waste Disposal At Sea Public Ideas Transnational Policy Entrepreneurs And Environmental Regimes:

Radioactive Waste Disposal at Sea Lasse Ringius, 2000-11-20 Most studies of environmental regimes focus on the use of power the pursuit of rational self interest and the influence of scientific knowledge Lasse Ringius focuses instead on the influence of public ideas and policy entrepreneurs He shows how transnational coalitions of policy entrepreneurs can build environmental regimes and how global environmental nongovernmental organizations can act as catalysts for regime change This is the first book length empirical study of the formation of the global ocean dumping regime in 1972 and its subsequent development which culminated in the 1993 global ban on the dumping of low level radioactive waste at sea Ringius describes the structure within which global ocean dumping policy particularly policy with regard to the disposal of radioactive waste is embedded He also examines the political construction of ocean dumping as a global environmental problem the role of persuasion and communication in an international setting and the formation of international public opinion He does not argue that the influence of ideas alone explains how regimes develop but claims that it is necessary to understand how actors interests and ideas together influence regimes and international environmental policy Policy Entrepreneurship at the

Street Level Nissim Cohen, 2021-05-13 This Element aims to connect the literature of street level bureaucrats with that of policy entrepreneurship in order to analyze why and how bureaucrats operating at the street level can promote policy change in public administration at the individual level I demonstrate how street level bureaucrats act as policy entrepreneurs in different contexts around the globe to promote policy change and analyze what they think of policy entrepreneurship and what they do about it in practice For this purpose I use multiple research methods a survey in depth interviews focus groups and textual analyses I also offer recommendations to decision makers to promote street level policy entrepreneurship highlighting the benefits of doing so Lastly I critically discuss the normative aspects of street level policy entrepreneurship ultimately is it desirable *Handbook of Public Policy Agenda Setting* Nikolaos Zahariadis, Kristin Taylor, 2025-09-10 This thoroughly revised and updated second edition explores how and why private matters become public issues and occasionally government priorities drawing on updated contextual studies that speak to more recent scholarship It builds upon the previous edition s comprehensive overview of the perspectives and institutions involved in setting the government s agenda

Environmental Regime Effectiveness Edward L. Miles, Steinar Andresen, Elaine M. Carlin, Jon Birger Skjaerseth, Arild Underdal, 2001-11-09 This book examines why some international environmental regimes succeed while others fail Confronting theory with evidence and combining qualitative and quantitative analysis it compares fourteen case studies of international regimes It considers what effectiveness in a regime would look like what factors might contribute to effectiveness and how to measure the variables It determines that environmental regimes actually do better than the collective model of the book predicts The effective regimes examined involve the End of Dumping in the North Sea Sea Dumping of Low Level Radioactive Waste Management of Tuna Fisheries in the Pacific and the Vienna Convention and

Montreal Protocol on Ozone Layer Depletion Mixed performance regimes include Land Based Pollution Control in the North Sea the Convention on Long Range Transboundary Air Pollution Satellite Telecommunication and Management of High Seas Salmon in the North Pacific Ineffective regimes are the Mediterranean Action Plan Oil Pollution from Ships at Sea International Trade in Endangered Species the International Whaling Commission and the Convention for the Conservation of Antarctic Marine Living Resources

The Business of Global Environmental Governance David L. Levy, Peter John Newell, 2005 Theoretical and empirical accounts of the role of business in shaping international environmental policies

Contemporary Issues in International Environmental Law M. Fitzmaurice, 2009-01-01 Highly recommended as a key contribution to the literature It fulfils its title in being contemporaneous but more than that it also provides a subtle critique of how many international environmental lawyers have approached their subject this book will

be an essential read for anyone interested in the subject British Yearbook of International Law This book presents an interesting scholarly read an invaluable reference asset to law students researchers policy makers and non state actors with interest in environmental regulation and governance Priscilla Schwartz Journal of Environmental Law This is a thoughtful and well researched study of current issues in international environmental law Malgosia Fitzmaurice s collection of essays is a welcome addition to the literature in this rapidly developing area of the law it provides perspective on the environmental law issues discussed but always against the background of the broader concepts and principles of general international law James Crawford University of Cambridge UK The central aim of this insightful book is to illuminate how many concepts in international environmental law such as the precautionary principle and sustainable development are taken for granted These problematic issues are very much still evolving and subject to heated debate between scholars as well as between states The author explores these controversies viewing them as a positive development within a field that is in a constant state of flux Areas discussed include the convergence of human rights with environmental issues and the quest for the human right to a clean environment The book also clearly demonstrates that international environmental law cannot be analysed in isolation since it greatly influences the development of general international law Taking full account of the most recent decisions of international courts and tribunals as well as the most up to date scholarly analysis Contemporary Issues in International Environmental Law is a timely and important resource for legal scholars under and post graduates and practitioners alike

Toxic Timescapes Simone M. Müller, May-Brith Ohman Nielsen, 2023-01-17 An interdisciplinary environmental humanities volume that explores human environment relationships on our permanently polluted planet While toxicity and pollution are ever present in modern daily life politicians juridical systems media outlets scholars and the public alike show great difficulty in detecting defining monitoring or generally coming to terms with them This volume s contributors argue that the source of this difficulty lies in the struggle to make sense of the intersecting temporal and spatial scales working on the human and more than human body while continuing to acknowledge race class and gender in terms of global environmental justice and social inequality The term toxic timescapes refers to this intricate intersectionality of time space and bodies in relation to toxic exposure As a tool of analysis it unpacks linear understandings of time and explores how harmful substances permeate temporal and physical space as both event and process It equips scholars with new ways of creating data and conceptualizing the past present and future presence and possible effects of harmful substances and provides a theoretical framework for new environmental narratives To think in terms of toxic timescapes is to radically shift our understanding of toxicants in the complex web of life Toxicity pollution and

modes of exposure are never static therefore dose timing velocity mixture frequency and chronology matter as much as the geographic location and societal position of those exposed Together these factors create a specific toxic timescape that lies at the heart of each contributor s narrative Contributors from the disciplines of history human geography science and technology studies philosophy and political ecology come together to demonstrate the complex reality of a toxic existence Their case studies span the globe as they observe the intersection of multiple times and spaces at such diverse locations as former battlefields in Vietnam aging nuclear weapon storage facilities in Greenland waste deposits in southern Italy chemical facilities along the Gulf of Mexico and coral breeding laboratories across the world

Living in a Nuclear World

Bernadette Bensaude-Vincent, Soraya Boudia, Kyoko Sato, 2022-03-10 The Fukushima disaster invites us to look back and probe how nuclear technology has shaped the world we live in and how we have come to live with it Since the first nuclear detonation Trinity test and the bombings of Hiroshima and Nagasaki all in 1945 nuclear technology has profoundly affected world history and geopolitics as well as our daily life and natural world It has always been an instrument for national security a marker of national sovereignty a site of technological innovation and a promise of energy abundance It has also introduced permanent pollution and the age of the Anthropocene This volume presents a new perspective on nuclear history and politics by focusing on four interconnected themes violence and survival control and containment normalizing through denial and presumptions memories and futures and exploring their relationships and consequences It proposes an original reflection on nuclear technology from a long term comparative and transnational perspective It brings together contributions from researchers from different disciplines anthropology history STS and countries US France Japan on a variety of local national and transnational subjects Finally this book offers an important and valuable insight into other global and Anthropocene challenges such as climate change

Adaptive Governance D. G. Webster, 2009 Develops and applies an innovative theoretical framework that links domestic economic vulnerabilities to national policy positions and international management in the context of Atlantic fisheries The rapid expansion of the fishing industry in the last century has raised major concerns over the long term viability of many fish species International fisheries organizations have failed to prevent the overfishing of many stocks but succeeded in curtailing harvests for some key fisheries In Adaptive Governance D G Webster proposes a new perspective to improve our understanding of both success and failure in international resource regimes She develops a theoretical approach the vulnerability response framework which can increase understanding of countries positions on the management of international fisheries based on linkages between domestic vulnerabilities and national policy positions Vulnerability mainly economic in this context acts as an indicator for domestic susceptibility to the increasing competition associated with open

access and related stock declines Because of this relationship vulnerability can also be used to trace the trajectory of nations positions on fisheries management as they seek political alternatives to economic problems Webster tests this framework by using it to predict national positions for eight cases drawn from the International Commission for the Conservation of Atlantic Tunas ICCAT These studies reveal that there is considerable variance in the management measures ICCAT has adopted both between different species and in dealing with the same species over time and that much of this variance can be traced to vulnerability response behavior Little attention has been paid to the ways in which international regimes change over time Webster s innovative approach illuminates the pressures for change that are generated by economic competition and overexploitation in Atlantic fisheries Her work also identifies patterns of adaptive governance as national responses to such pressures culminate in patterns of change in international management **High Seas Governance** Robert C.

Beckman,Millicent McCreath,J. Ashley Roach,Zhen Sun,2018-11-26 High Seas Governance Gaps and Challenges identifies gaps in and challenges to the existing legal regime in the protection and preservation of the marine environment of the high seas including sensitive marine areas The gaps identified in the book include the failure of liability and compensation schemes to cover pollution of the high seas and the fact that no state has the responsibility to clean up pollution of the high seas One common theme of the book is that it is necessary to identify a state other than flag states port states or coastal states which should have an obligation to exercise jurisdiction and control over certain activities on the high seas Beyond Resource Wars Shlomi Dinar,2011-03-18 An argument that resource scarcity and environmental degradation can provide an impetus for cooperation among countries Common wisdom holds that the earth s dwindling natural resources and increasing environmental degradation will inevitably lead to inter state conflict and possibly even set off resource wars Many scholars and policymakers have considered the environmental roots of violent conflict and instability but little attention has been paid to the idea that scarcity and degradation may actually play a role in fostering inter state cooperation Beyond Resource Wars fills this gap offering a different perspective on the links between environmental problems and inter state conflict Although the contributors do not deny that resource scarcity and environmental degradation may become sources of contention they argue that these conditions also provide the impetus for cooperation coordination and negotiation between states The book examines aspects of environmental conflict and cooperation in detail across a number of natural resources and issues including oil water climate change ocean pollution and biodiversity conservation The contributors argue that increasing scarcity and degradation generally induce cooperation across states but when conditions worsen and a problem becomes too costly or a resource becomes too scarce cooperation becomes more difficult Similarly low levels of scarcity may discourage cooperation because problems seem less urgent With contributions from scholars in international relations economics and political science Beyond Resource Wars offers a comprehensive and robust investigation of the links among scarcity environmental degradation cooperation and conflict Global Environmental Assessments Ronald Bruce Mitchell,2006 A

comparative analysis of global environmental assessments shows the importance of policy salience scientific credibility and social and political legitimacy in determining the influence of scientific assessments on global environmental policy
