Breaks in the Air John Klaess, 2022-08-22 In Breaks in the Air John

Klaess tells the story of rap's emergence on New York City's airwaves by examining how artists and broadcasters adapted hip hop's performance culture to radio. Initially, artists and DJs brought their live practice to radio by buying time on low bandwidth community stations and building new communities around their shows. Later, stations owned by New York's African American elite such as WBLS reluctantly began airing rap even as they pursued a sound rooted in respectability, urban sophistication, and polish. At the same time, large commercial stations like WRKS programmed rap once it became clear that the music attracted a demographic that was valuable to advertisers. Moving between intimate portraits of single radio shows and broader examinations of the legal, financial, cultural, and political forces that indelibly shaped the sound of rap radio, Klaess shows how early rap radio provides a lens through which to better understand the development of rap music as well as the intertwined histories of sounds, institutions, communities, and legal formations that converged in the post-Civil Rights era.

Tunes for All? Iben Høge, Steen Kaargaard Nielsen, Mads Krogh, Morten Michelsen, 2018-12-31 In ten original essays, Danish music and media scholars discuss aspects of music on the radio from the 1920s until today. Understanding music radio as a distributed phenomenon or as a multiplicity, the authors draw upon anthropology, cultural studies, and media studies along with sociological and historiographical theory. The intention is to further develop interdisciplinary approaches that may grasp the complex interrelations between radio as an institution and as practices on the one hand and music, musical practices, and musical life on the other. The essays' examples and cases are all related to the Danish Broadcasting Corporation (DR) and offer a music radio production perspective. They span the period from when broadcast music was only live to today, where almost all of it is prerecorded and digitized. Some of the essays approach broad topics like early music radio's contributions to the regulation of national centres and peripheries, the debates on music radio as mechanical music, and the general changes in music repertoires and in the status of the institution's live ensembles. Music radio's roles as gatekeeper through automatic music programming are discussed in several articles, as are the many ways music genres and radio formats interact. Some of the authors turn to detailed analyses at programme level in order to explain aspects of modern music radio and to suggest analytical models. The essays come with an introduction consisting of an extended overview of international music radio studies since the 1930s and an overview of the development of Danish music radio and a theoretical preamble.
