that enable hosts experts listeners and other participants to discuss and negotiate the very rules and boundaries of Indonesia's newly acquired media freedom The author argues that these contemporary programmes provide dialogic alternatives to the official New Order discourse dominated by monologism *Islands of Resistance* Andrea Langlois, Ron Sakolsky, Marian van der Zon, 2010-05-14 Since radio's invention some Canadians have been concerned about the increasingly commercialized and centralized nature of medium Sometimes working alone more often in teams and always illegally these activists represent islands of resistance within the ocean of homogenous frequencies pirating radio signals for personal political and artistic expression In the first book published on the subject *Islands of Resistance* gives you a view from the crow's nest of the phenomenon of pirate radio in Canada Here is a collection of seventeen activist manifestos artistic treatises of intent historical essays on the development of radio and its regulatory bodies sociological examination of pirate radio's application in new social movements and personal anecdotes from behind the eyepatch Just as the new media ostensibly renders the old obsolete *Islands of Resistance* unveils the existence of a thriving clandestine counterculture An invaluable addition to an unscrutinized subject in Canadian media studies *Islands of Resistance* appeals to the anarchist anti-authoritarian impulses in all of us Visit the *Islands of Resistance* website for more about the book and to hear audio clips of pirate radio *The Sound Studies Reader* Jonathan Sterne, 2012-11-12 The *Sound Studies Reader* blends recent work that self-consciously describes itself as sound studies along with earlier and lesser known scholarship on sound from across the humanities and social sciences The *Sound Studies Reader* touches on key themes like noise and silence architecture acoustics and space media and reproducibility listening voices and disability culture community power and difference and shifts in the form and meaning of sound across cultures contexts and centuries Writers reflect on crucial historical moments difficult definitions and competing accounts of the role of sound in culture and everyday life Across the essays readers will gain a sense of the range and history of key debates and discussions in sound studies The collection begins with an introduction to welcome novice readers to the field and acquaint them the main issues in sound studies Individual section introductions give readers further background on the essays and an extensive up to date bibliography for further reading in sound studies make this an original and accessible guide to the field Contributors Rick Altman Jacques Attali Roland Barthes Jody Berland Karin Bijsterveld Barry Blesser Georgina Born Michael Bull Adriana Cavarero Michel Chion Kate Crawford Richard Cullen Rath Jacques Derrida Mladen Dolar John Durham Peters Kodwo Eshun Frantz Fanon Lisa Gitelman Gerard Goggin Steve Goodman Stefan Helmreich Michelle Hilmes Charles Hirschkind Shuhei Hosokawa Don Ihde Douglas Kahn Friedrich Kittler Brandon LaBelle James Lastra Richard Leppert Michel Le Martin Louise Meintjes Mara Mills John Mowitt R Murray Schafer Ana María Ochoa Gautier John Picker Benjamin Piekut Trevor Pinch Tara Rodgers Linda Ruth Salter Jacob Smith Jason Stanyek Jonathan Sterne Emily Thompson Frank Trocco Michael Veal Alexander Weheliye *Technotopia* Clemens Apprich, 2017-10-05 Many technologies and practices that define the Internet today date back to the 1990s such as user generated content participatory platforms

and social media Indeed many early ideas about the future of the Internet have been implemented albeit without fulfilling the envisioned political utopias By tracing back the technotopian vision Clemens Apprich develops a media genealogical perspective that helps us to better understand how digital networks have transformed over the last 30 years and therefore to think beyond the current state of our socio technical reality This highly original book informs our understanding of new forms of media and social practices such that have become part of our everyday culture Apprich revisits a critical time when the Internet was not yet an everyday reality but when its potential was already understood and fiercely debated The historical context of net cultures provides the basis from which the author critically engages with current debates about the weal and woe of the Internet and challenges today's predominant network model *Tuning in to the neo-avant-garde* Inge Arteel, Lars Bernaerts, Siebe Bluijs, Pim Verhulst, 2021-07-06 Bringing together an international and diverse group of scholars *Tuning in to the neo avant garde* offers the first in depth study of the radio medium's significance as a site of artistic experimentation for the literary neo avant garde in the postwar period Covering radio works from the 1950s until the 2010s the collection charts how artists across the UK Europe and North America continued as well as reacted to the legacies of the historical avant garde and modernism operating within different national broadcasting contexts by placing radio in an intermedial dialogue with prose poetry theatre music and film In doing so the volume explores a wide variety of acoustic genres radio play feature electroacoustic music radiophonic poem radio opera to show that the medium deserves to occupy a more central place than it currently does in studies of literature inter media lity and the neo avant garde *Radio in the Global Age* David Hendy, 2013-04-24 *Radio in the Global Age* offers a fresh up to date and wide ranging introduction to the role of radio in contemporary society It places radio for the first time in a global context and pays special attention to the impact of the Internet digitalization and globalization on the political economy of radio It also provides a new emphasis on the links between music and radio the impact of formatting and the broader cultural roles the medium plays in constructing identities and nurturing musical tastes Individual chapters explore the changing structures of the radio industry the way programmes are produced the act of listening and the construction of audiences the different meanings attached to programmes and the cultural impact of radio across the globe David Hendy portrays a medium of extraordinary contradictions a cheap and accessible means of communication but also one increasingly dominated by rigid formats and multinational companies a highly intimate medium but one capable of building large communities of listeners scattered across huge spaces a force for nourishing regional identity but also a pervasive broadcaster of globalized music products a stimulus to the imagination but a purveyor of the banal and of the routine Drawing on recent research from as far afield as Africa Australasia and Latin America as well as from the UK and US the book aims to explore and to explain these paradoxes and in the process to offer an imaginative reworking of Marshall McLuhan's famous dictum that radio is one of the world's hot media *Radio in the Global Age* is an invaluable text for undergraduates and researchers in media studies communication studies journalism

cultural studies and musicology It will also be of interest to practitioners and policy makers in the radio industry
