Global Justice and International Economic Law Frank J. Garcia, 2013-04-15 For centuries international trade has been seen as essential to the wealth and power of nations More recently we have started to understand its problematic role as an engine of distributive justice In this compelling book Frank J Garcia proposes a new way to evaluate construct and manage international trade one that is based on norms of economic justice comparative advantage and national interest

Garcia examines three ways to conceptualize the problem of trade and global justice drawn from Rawlsian liberalism communitarianism and consent theory These approaches illustrate specific issues of importance to the way global justice has been theorized offering a pluralistic mode of arguing for global justice and highlighting the unique modes of discourse we employ when engaging with global justice and their implications for conceptualizing and arguing the problem Garcia suggests a new direction for trade agreements built around truly consensual trade negotiations and the kind of international economic system they would structure

The Concept of Ius and the Nature of Law in Thomas Aquinas Loïc-Marie Le Bot, Petar Popović, Petar Popović, 2025-01-10 This collection of essays constitutes the fruit of a scholarly conference held in Rome in April 2023 which was organized by the Pontifical University of Saint Thomas Aquinas the Pontifical University of the Holy Cross and the Angelicum Thomistic Institute The essays offer a scholarly reflection on various historical and doctrinal aspects of Aquinas's concept of ius and on the extent to which this concept helps to illuminate his account of the nature of law that is of the juridical phenomenon Each essay addresses from the viewpoint of its specific topic the implications of the Angelic Doctor's description of ius as the object of justice as presented in the *Secunda secundae* of his *Summa theologiae* starting from question 57 article 1 Following Aquinas's own insights the focus on the virtue of justice is thus deemed crucial for understanding the essence or the ontological fabric of law Justice is simultaneously analyzed as always remaining inherently connected to its moral and divine salvific aspects The volume is divided in three parts The first part of the collection contains essays that are dedicated to the analysis of Aquinas's concept of ius in a historical perspective The second group of essays in this collection examine some further doctrinal and contextual issues pertinent to the essence of ius Each attempt to elucidate the ontology of law should be supported by the aptitude of the resulting accounts of law's nature to provide workable platforms for legal practices This line of reasoning represents the rationale for the third part of this collection which focuses on the matters of applying Aquinas's concept of ius in systemic and practical legal settings of State law and canon law

European Legal History Randall Lesaffer, 2009-06-25 The rediscovery of Roman law and the emergence of classical canon law around AD 1100 marked the beginnings of the civil law tradition in Europe Between the twelfth and eighteenth centuries a highly sophisticated legal science of a truly European dimension was developed Since then the different European States have developed their own national legal systems but with the exception of England and Ireland they are all heirs to this tradition of

State and Nature Peter Adamson, Christof Rapp, 2021-04-19 A much maligned feature of ancient and medieval political thought is its tendency to appeal to nature to establish norms for human communities From Aristotle's claim that humans are political animals to Aquinas invocation of natural law it may seem that pre modern philosophers were all too ready to assume that whatever is natural is good and that just political arrangements must somehow be natural The papers in this collection show that this assumption is at best too crude From very early for instance in the ancient sophists contrast between *nomos* and *physis* there was recognition that political arrangements may be precisely artificial not natural and it may be questioned whether even such supposed naturalists as Aristotle in fact adopt the quick inference from natural to good The papers in this volume trace the complex interrelations between nature and such concepts as law legitimacy and justice covering a wide historical range stretching from Plato and the Sophists to Aristotle Hellenistic philosophy Cicero the Neoplatonists Plotinus and Porphyry ancient Christian thinkers and philosophers of both the Islamic and Christian Middle Ages

Political Representation in the Later Middle Ages Hwa-Yong Lee, 2008 This book explores the theory of political representation as articulated by the fourteenth century Italian thinker Marsilius It combines historical research on Marsilius with an analysis of the contemporary theory of representative democracy Modern theorization of political representation identifies the relation between the represented and the representative as a central theme In order to assess how a representative system can reasonably be expected to operate for the benefit of the whole people political representation must be understood through a comprehensive conception of the political process as a whole To this end Marsilius provides us with a perspective from which to examine the philosophical foundations of political representation and to reconsider the nature and significance of political representation that is an understanding of political representation in terms of the transfer of power This book suggests that in modern democratic societies where the people effectively cease to be a political agent and their formal authority becomes increasingly notional Marsilius conception of political representation which rejects the depoliticisation and deauthorisation of ordinary citizens has much to offer It can in principle offer a coherent alternative approach to building political representation as an effective scheme of public action for all

Collectio CCCC Capitulum, the Collection in 400 Chapters Sven Meeder, 2024 Surviving in three ninth century manuscripts the collection of canon law known as the Collectio 400 capitulum is a remarkable and understudied witness to the scholarly vitality of the Carolingian period Its 404 chapters offer ecclesiastical rules and moral guidelines taken from an unusually wide variety of authoritative sources In addition to the customary canonical texts such as the acts of the ecumenical councils and papal letters the compiler of this collection drew his canons from the bible Roman law local Gallic synods the Church Fathers as well as Frankish and Insular penitential works Although the Collectio 400 capitulum is a so called systematic collection eminent scholars of canon law commented on its lack of structure Even with the best will in the world the collection s system eluded them Despite its flaws however there is evidence that the collection gained some popularity in the ninth century apparently providing the basis for the Poenitentiale Martenianum directly or indirectly influencing Hrabanus Maurus and Benedictus Levita The ninth century appreciation is understandable for as one of the many products of the vigorous canonical activity of the eighth and ninth centuries the Collectio 400 capitulum impresses in its handling of the canonical material as well as the breadth of sources and the topics covered This book constitutes the first in depth study of this intriguing canonical collection with a detailed description of the extant manuscript witnesses its sources and its influence The critical edition offers scholars of the early Middle Ages in general and canon law in particular access to an instructive if unpolished product of Carolingian legal thought
