Sacred Landscapes in Antiquity Ralph Haussler, Gian Franco Chiai, 2020-07-31 From generation to generation people experience their landscapes differently Humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased We presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred Individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths Throughout human history people have also felt the need to monumentalize their sacred landscape But this is where the similarities end as different societies had very different understandings believes and practices The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it We see the role of performance ritual orality textuality and memory in

people's sacred landscapes A diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and religious understandings not to mention the impact of urbanism on people's understandings A key question is how was the landscape manipulated transformed and monumentalized especially the colossal investments in monumental architecture we see in certain socio historic contexts or the creation of an alternative humanmade seemingly non natural landscape with perfectly astronomically aligned buildings that define a cosmological order Sacred Landscapes therefore aims to analyze the complex links between landscape religiosity and society developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic holistic contextual and historical perspective Visions of the Roman North: Art and Identity in Northern Roman Britain Iain Ferris, 2021-04-22 This is the first book to analyse art from the northern frontier zones of Roman Britain and to interpret the meaning and significance of this art in terms of the formation of a regional identity It argues that a distinct and vibrant visual culture flourished in the north primarily due to its status as a heavily militarized frontier zone **Ancient Greece and Rome** Keith Hopwood, 1995 Sir Thomas Fairfax not Oliver Cromwell was creator and commander of Parliament's New Model Army from 1645 to 1650 Although Fairfax emerged as England's most successful commander of the 1640s this book challenges the orthodoxy that he was purely a military figure showing how he was not apolitical or disinterested in politics The book combines narrative and thematic approaches to explore the wider issues of popular allegiance puritan religion concepts of honour image reputation memory gender literature and Fairfax's relationship with Cromwell Black Tom delivers a groundbreaking examination of the transformative experience of the English revolution from the viewpoint of one of its leading yet most neglected participants It is the first modern academic study of Fairfax making it essential reading for university students as well as historians of the seventeenth century Its accessible style will appeal to a wider audience of those interested in the civil wars and interregnum more generally The Art of Empire Lee M. Jefferson, Robin M. Jensen, 2015-10-01 In recent years art historians such as Johannes Deckers *Picturing the Bible* 2009 have argued for a significant transition in fourth and fifth century images of Jesus following the conversion of Constantine Broadly speaking they perceive the image of a peaceful benevolent shepherd transformed into a powerful enthroned Jesus mimicking and mirroring the dominance and authority of the emperor The powers of church and state are thus conveniently synthesized in such a potent image This deeply rooted position assumes that ante pacem images of Jesus were uniformly humble while post Constantinian images exuded the grandeur of power and glory The Art of Empire contends that the art and imagery of Late Antiquity merits a more nuanced understanding of the context of the imperial period before and after Constantine The chapters in this collection each treat an aspect of the relationship between early Christian art and the rituals practices or imagery of the Empire and offer a new and fresh perspective on the development of Christian art in its imperial background *The Roman House in Britain* Dominic Perring, 2002-09-11 This authoritative and original work sets the results of recent archaeological research in the context of

classical scholarship as it explores three main aspects of Romano British buildings general characteristics of form and structure the ways in which they were built and decorated the range of activities for which they were designed This evidence is then used to discuss the social practices and domestic arrangements that characterised Romano British elite society Fully illustrated this volume is the essential guide to how houses were built used and understood in Roman Britain King Arthur Nicholas J. context of Roman Britain By applying the theoretical framework of sensory archaeology Savani examines issues of receptivity social acceptance and cultural interaction broadening our understanding of the cultural and social transformations occurring in the province Focusing on two regions South East and Central South West England Savani uncovers the previously underappreciated role of rural baths in connecting a more diverse range of people than has been traditionally acknowledged It also underscores the critical importance of sensory experience in the acceptance of bathing practices in rural areas and the affective connections formed by various social groups around these practices Rural Baths in Roman Britain is an invaluable resource for scholars of both the archaeology and culture of Roman Britain as well as those working on processes of cultural interactions within the Roman provinces more broadly
