Romantic Texts And Contexts:

Romantic Texts and Contexts Donald H. Reiman, 1987 Reading Romantics Peter J. Manning, 2023 A series of essays which seek to reconnect Romantic literature with the motives from which it springs and the social relations within which it exists Among the writers discussed are Wordsworth and Byron **The Pleasures of Contamination** David C. Greetham, 2010 Through the concept of contamination David Greetham highlights various ways that one text may invade another carrying with it a residue of potential meaning While the focus of this study is on written works the scope ranges widely over music politics art science philosophy religion and social studies Greetham argues that this sort of contamination is not only ubiquitous in contemporary culture but may also be a necessary and beneficial circumstance Tracing contamination from the Middle Ages onward he takes up issues such as the placement of quote marks in Keats's Ode to a Grecian Urn the controversy over the use of evidence for yellowcake uranium in Niger and the reconstitution of reality on YouTube to illustrate that the basic questions of evidence fact and voice have always been slippery concepts **Text, Context and Performance** James A. Kapaló, 2011-09-20 Past scholarship on the Gagauz people has focused on their ethnic origins and the tension between their Christian faith and Turkish linguistic identity This study based on extensive fieldwork in the Republic of Moldova approaches the problem of this central dichotomy in Gagauz identity through the lens of daily religious practices This empirical approach reveals how scholarly discourses on folk religion guide the local fieldworker's identification of what are folk religious practices and thus actualises folk religion in a given context The book offers a fresh methodological perspective on folk religion as discourse and object of study and is the first monograph in a Western European language on the religion history and identity of this under studied European people **Comparing Texts** Nicola Onyett, 2005-02-25 Routledge A Level English Guides equip AS and A2 Level students with the skills they need to explore evaluate and enjoy English Books in the series are built around the various skills specified in the assessment objectives AOs for all AS and A2 Level English courses Focusing on the AOs most relevant to their topic the books help students to develop their knowledge and abilities through analysis of lively texts and contemporary data Each book in the series covers a different area of language and literary study and offers accessible explanations examples exercises summaries suggested answers and a glossary of key terms Comparing Texts provides students with the skills they need to compare and contrast texts explores and compares texts from a wide range of genres and periods draws on a large number of literary and non literary texts from Chaucer's Wife of Bath to The Good Wife's Guide from Frankenstein to poetry by Carol Ann Duffy and from Nigella Lawson to Fast Food Nation introduces the main themes and issues students need to consider when comparing texts themes genre time and place form and structure and intertextuality **Cultural Studies - The Basics** Jeff Lewis, 2002-06-03 To say that the scope of the book's coverage is wide ranging would be an understatement Few texts come to mind that have attempted such a thorough overview of the central tenets of cultural studies Stuart Allan University of

West of England This is a book for anyone who wants an unfussy authoritative critical introduction to Cultural Studies It equips you with all that you need to know about theories of cultural studies what they say how they differ from one another and what are the strengths and weaknesses of each position It provides biographical information on major theorists plus assessments of key texts Unlike other competing books in the field Cultural Studies The Basics demonstrates what a Cultural Studies approach can do to illuminate basic areas of contemporary culture Included are chapters on Feminism The Body Cultural Space Communications Technology Cultural Policy Language and Culture The book is designed to be used and read by students who face the pressures of essay dead lines examinations and dissertations Above all it approaches Cultural Studies as something that needs to be used as well as studied *Handbook of British Romanticism* Ralf Haekel, 2017-09-11

The Handbook of British Romanticism is a state of the art investigation of Romantic literature and theory a field that probably changed more quickly and more fundamentally than any other traditional era in literary studies Since the early 1980s Romantic studies has widened its scope significantly The canon has been expanded hitherto ignored genres have been investigated and new topics of research explored After these profound changes intensified by the general crisis of literary theory since the turn of the millennium traditional concepts such as subjectivity imagination and the creative genius have lost their status as paradigms defining Romanticism The handbook will feature discussions of key concepts such as history class gender science and the use of media as well as a thorough account of the most central literary genres around the turn of the 19th century The focus of the book however will lie on a discussion of key literary texts in the light of the most recent theoretical developments Thus the Handbook of British Romanticism will provide students with an introduction to Romantic literature in general and literary scholars with a discussion of innovative and groundbreaking theoretical developments

Pre-text, Text, Context Robert L. Mitchell, 1980 The nineteenth century in France is a nightmare for literary historians Their thirst for categorization is more easily quenched by prior centuries to which because they seem unified by cohesive preoccupations and common goals such appellations as the Renaissance the Classical Age or le grand siècle and the Enlightenment or Age of Ideas are appropriately applied For the protean nineteenth century for which no such handy tag has been or can be devised is beyond all else distinguished by extreme heterogeneity and eclecticism A period of chaotic social and political instability of scientific and industrial revolution it is in literature a time not of solidarity but of unprecedented individualism Collective social consciousness yields to isolated probings into the uncharted recesses of the human mind and soul and revolt againsts standardized even valorized literary practice is seen in such developments as the slow undermining of the accepted literary lexicon and of the qualities of unity clarity and reason and in a radical overhauling of the system of prosody If such diversity precludes coherence in nineteenth century French literature it can itself be recognized as the organizing element of this literary epoch And it is precisely this paradox that the essays in this volume intend to reflect They are not unified as orthodoxy might dictate by a common approach or theme or author Rather they are marked as was

the century that is their context by divergence and variety not harmony and consistency Multiformity in theme is reflected in discussions of such varied topics as pygmalionism allegory mirage self consciousness plagiarism madness feminism the grotesque dance and alchemy which are addressed in turn from a variety of critical approaches thematic intertextual historical stylistic psychocritical sociological and semiotic Ecclecticism indeed has shaped the basic conception of the collection Part 1 examines themes presented as pretext that inform either authorial motivation or the orientation of a text prior to its actual inscription Part 2 approaches the process of writing from the perspective of the text itself And Part 3 is concerned with those spatial temporal and linguistic elements context that surround the literary text **Poetics of Love in**

the Middle Ages Moshe Lazar,Norris J. Lacy,1989-05-23 This volume examines the treatment and expression of love in medieval literature and art These nineteen essays contributed by recognized authorities on medieval romantic expression consider a wide variety of texts from the following cultures French Arabic Latin Hispanic Hebrew Provencal and German Teachers and students of medieval literature will find in this well researched book cogent contemporary analyses of written expressions of love in the Middle Ages **Studying English Literature in Context** Paul Poplawski,2022-10-13 From early medieval times to the present this diverse collection of thirty one essays sets literary texts in their historical contexts

Text, Context and the Johannine Community David A. Lamb,2014-04-24 Text Context and the Johannine Community adopts a new approach to the social context of the Johannine writings by drawing on modern sociolinguistic theory Sociolinguistics emphasizes language as a social phenomenon which can be analysed with reference not only to its broad context of culture but also through the use of register analysis to its narrower context of situation The Johannine writings have increasingly been seen as the product of a distinct Johannine Community depicted by some scholars as a sectarian group opposed both to wider Jewish society and to other Christian groups This model has largely been constructed on historical critical grounds yet given our lack of reliable external information about the origin of the Johannine writings a more fruitful approach may be to examine their lexico grammatical and discourse features to determine what these imply about interpersonal relationships This study compares selected narrative asides from the Gospel of John with a passage section from 1 John and with the two shorter Johannine Epistles It concludes that register analysis of these texts does not support the idea of a close knit sectarian group **Beyond Romanticism** Stephen Copley,John Whale,2016-04-14 First published in 1992 Beyond Romanticism represents a substantial challenge to traditional views of the Romantic period and provides a sustained critique of Romantic ideology The debates with which it engages had previously been under represented in the study of Romanticism where the claims of history had never had quite the same status as they have had in other periods and where confidence in poetic literary value remains high Individual essays examine the philosophical underpinnings of Romantic discourse they survey analogous and competing discourses of the period such as mesmerism Hellenism orientalism and nationalism and analyse both the manifestations of Romanticism in particular historical and

textual moments and the texts and modes of writing which have been historically marginalized or silenced by the Romantic

This title will be of interest to students of literature **Text, Context and Construction of Identity** Rajesh Kumar, Om Prakash, 2019-04-30 Language is central to our existence and it happens to be the most sophisticated product of the human mind It is inconceivable to think of ourselves our societies our ideas cultures or identities without language It is the primary means of socialization and whatever we know is a result of it It is the primary medium of construction and dissemination of knowledge and structures our thought processes in important ways that constitute our identity In very complex ways it interacts with the social political and economic power structures that remain significant in defining the identities of individuals and societies The essays in this volume create an awareness and understanding about the role of linguistic context in negotiating identity The book explains identity and the complex relations between language and several aspects of our society It explores identity through text and context and will serve to trigger a novel discourse around the centrality of identity in contemporary society **A Companion to Romantic Poetry** Charles Mahoney, 2010-12-21 Through a series of 34 essays by leading and emerging scholars A Companion to Romantic Poetry reveals the rich diversity of Romantic poetry and shows why it continues to hold such a vital and indispensable place in the history of English literature Breaking free from the boundaries of the traditionally studied authors the collection takes a revitalized approach to the field and brings together some of the most exciting work being done at the present time Emphasizes poetic form and technique rather than a biographical approach Features essays on production and distribution and the different schools and movements of Romantic Poetry Introduces contemporary contexts and perspectives as well as the issues and debates that continue to drive scholarship in the field Presents the most comprehensive and compelling collection of essays on British Romantic poetry currently available *Mary Shelley and the Rights of the Child* Eileen M. Hunt, 2017-10-09 From her youth Mary Shelley immersed herself in the social contract tradition particularly the educational and political theories of John Locke and Jean Jacques Rousseau as well as the radical philosophies of her parents the feminist Mary Wollstonecraft and the anarchist William Godwin Against this background Shelley wrote *Frankenstein or the Modern Prometheus* first published in 1818 In the two centuries since her masterpiece has been celebrated as a Gothic classic and its symbolic resonance has driven the global success of its publication translation and adaptation in theater film art and literature However in *Mary Shelley and the Rights of the Child* Eileen Hunt Botting argues that *Frankenstein* is more than an original and paradigmatic work of science fiction it is a profound reflection on a radical moral and political question do children have rights Botting contends that *Frankenstein* invites its readers to reason through the ethical consequences of a counterfactual premise what if a man had used science to create a human life without a woman Immediately after the Creature's birth his scientist father abandons him and the unjust and tragic consequences that follow form the basis of *Frankenstein's* plot Botting finds in the novel's narrative structure a series of interconnected thought experiments that reveal how Shelley viewed *Frankenstein's* Creature for what he

really was a stateless orphan abandoned by family abused by society and ignored by law The novel therefore compels readers to consider whether children have the right to the fundamental means for their development as humans namely rights to food clothing shelter care love education and community In Botting's analysis Frankenstein emerges as a conceptual resource for exploring the rights of children today especially those who are disabled stateless or genetically modified by medical technologies such as three parent in vitro fertilization and perhaps in the near future gene editing Mary Shelley and the Rights of the Child concludes that the right to share love and community especially with parents or fitting substitutes belongs to all children regardless of their genesis membership or social status
