distinguish themselves as wealthy cattle ranchers within months of arriving on what was then the western Dakota frontier. The names of both individuals continue to resound through the historical chapters that shaped this part of the American landscape. *Theodore Roosevelt, Naturalist in the Arena* Char Miller, Clay S. Jenkinson, 2020-03 Theodore Roosevelt's scientific curiosity and love of the outdoors proved a defining force throughout his hectic life as a rancher and explorer, police commissioner and governor of New York, vice president and president of the United States. Conservation and natural history were parts of a whole for this driven charismatic public servant, and Roosevelt approached the natural world with joy and a passionate engagement. Drawing on an array of approaches: biographical, ecological, and environmental, literary and political, *Theodore Roosevelt, Naturalist in the Arena* analyzes this energetic man's manifold encounters with the great outdoors. George Bird Grinnell, Gifford Pinchot, John Muir, and William Hornaday were among the many conservationists with whom Roosevelt corresponded, collaborated, hiked, and governed, and in turn inspired. Together, Roosevelt and his contemporaries developed a progressive argument for the conservation of natural resources as a way to construct a more democratic nation-state. This legacy also comes with some troubling domestic and global implications as Roosevelt fused his call for the conservation of resources, natural and human, domestically and internationally with a deep-seated conviction that some were more fit than others to control the world and define its future.
