Democratic Education in an Armed Society Samantha Deane,2023-11-21 Democratic Education in an Armed Society Learning to Live with Guns examines the points of intersection between school gun violence and democratic education Samantha Deane explores the connection between how we teach children to think of themselves as democratic actors and the unceasing plague of gun violence Juxtaposing two images of political agency Deane connects an essentialized view of humans as masters of themselves objects and history with discourses that aim to train individuals to be autonomous and rational users of objects like guns This liberal view gives us no way to think about how objects narratives and norms contour the selves we claim to be Deane suggests that we must learn to attend to the ways in which our ability to act in the world is shared and distributed In a society shot through with guns and enamored with individualism the future of associational life depends on whether we learn to do democracy with the objects we hold dear *Annual Report of the Dean [and Director]*

Physiology and Applications M.L. Van Beusichem,2012-12-06 Exactly 35 years after the first Colloquium was held the Eleventh International Plant Nutrition Colloquium took place from 30 July to 4 August 1989 in Wageningen The Netherlands Although impressive progress has been made during the past decades in our understanding of the mechanisms of uptake distribution and assimilation of nutrients in relation to crop yield and quality there are still significant gaps in our insight into many fundamental aspects of plant mineral nutrition and related metabolic processes In spite of improved knowledge of nutrient requirements of crops and improved fertilizer application strategies the world population remains to be burdened with an enormous shortage of plant products for food timber fuel shelter and other purposes The main challenge facing the plant nutrition research community is to at least alleviate the increasing world wide need for applying scientific knowledge to practical problems in agriculture horticulture and forestry It is therefore felt by many scientists that the Plant Nutrition Colloquia which are intended to bring together scientists and to integrate knowledge and approaches acquired in plant physiology biochemis try soil science agronomy and related disciplines have indeed made a significant contribution to the advancement of our knowledge and understanding in this vital and interdisciplinary field of agrobiology About 260 scientists from 40 nations attended the Colloquium in Wageningen **The International Legal Protection of Children in Street**
