American Indians and State Law Deborah A. Rosen, 2007-01-01 American Indians and State Law examines the history of state and territorial policies laws and judicial decisions pertaining to Native Americans from 1790 to 1880 Belying the common assumption that Indian policy and regulation in the United States were exclusively within the federal government s domain the book reveals how states and territories extended their legislative and judicial authority over American Indians during this period Deborah A Rosen uses discussions of nationwide patterns complemented by case studies focusing on New York Georgia New Mexico Michigan Minnesota Louisiana and Massachusetts to demonstrate the decentralized nature of much of early American Indian policy This study details how state and territorial governments regulated American Indians and brought them into local criminal courts as well as how Indians contested the actions of states and asserted tribal sovereignty Assessing the racial conditions of incorporation into the American civic community Rosen examines the ways in which state legislatures treated Indians as a distinct racial group explores racial issues arising in state courts and analyzes shifts in the rhetoric of race culture and political status during state constitutional conventions She also describes the politics of Indian citizenship rights in the states and territories Rosen concludes that state and territorial governments played an important role in extending direct rule over Indians and in defining the limits and the meaning of citizenship

Race and U.S. Foreign Policy from Colonial Times Through the Age of Jackson E. Nathaniel Gates,2021-12-24 First published in 1998 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate

that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source *Whitaker's Books in Print*, 1998 Forthcoming Books Rose Arny, 2003-04 **America, History and Life**, 1996 Provides historical coverage of the United States and Canada from prehistory to the present Includes information abstracted from over 2 000 journals published worldwide **Teaching History**, 1996 **Countering Islamophobia in North America** el-Sayed el-Aswad, 2021-11-13 This book puts together grounded research on the discourses that counter Islamophobic tropes in North America Dealing with an important and urgent issue of human rights it explores how public policies new conceptualizations and social movements can transform Islamophobia into a positive and healthy discourse Surprisingly and apart from selected media studies empirical investigations about countering xenophobia and hate are rare The book proposes effective means and mechanisms to help generate debate dialogue and discussion concerning policy issues to mitigate Islamophobia Written in uncomplicated language this topical book will attract specialist and non specialist readers interested in the topic of Islamophobia understanding the roots of Islamophobic hate rhetoric and how to counter it **Resources in Education**, 1997 The American Historical Association's Guide to Historical Literature American Historical Association, 1995 Contains nearly 2 000 annotated citations primarily English language works divided into forth eight sections citations refer chiefly to works published between 1961 and 1992 *New Mexico Historical Review* Lansing Bartlett Bloom, Paul A. F. Walter, 2019 Rainbow Theology Patrick S. Cheng, 2013-04-01 To date no book has systematically examined the theological writings of LGBT people of color Nor has any book explored how such writings might actually transform contemporary theological reflections on race and sexuality This book remedies these gaps by constructing a rainbow theology around the theme of bridging or mediation Rainbow Theology is the first book to reflect upon the theological significance of the intersections of race and queer sexuality across multiple ethnic and cultural groups This is particularly important in light of the current polarizing debates over issues of race sexuality and religion within churches and communities of faith around the world **African American Communication** Ronald L. Jackson II, Amber L. Johnson, Michael L. Hecht, Sidney A. Ribeau, 2019-11-19 Now in its third edition this text examines how African Americans personally and culturally define

themselves and how that definition informs their communication habits practices and norms This edition includes new chapters that highlight discussions of gender and sexuality intersectional differences contemporary social movements and digital and mediated communication The book is ideally suited for advanced students and scholars in intercultural communication interpersonal communication communication theory African American Black studies gender studies and family studies
