Roots Of Consciousness:

The Roots of Consciousness Jeffrey Mishlove, 1993 The title for The Roots of Consciousness was inspired by a statement of cosmologist Arthur M Young who cautioned against seeking only the flowers of consciousness such as clairvoyance and telepathy considering them no more than the intriguing foliage of psychology Author Jeffrey Mishlove however believes that these and other psychic powers are not just for show but are rooted in the essential core of our existence Throughout the book Mishlove presents the viewpoints of both believers and nonbelievers as a further means of introducing the language and concepts of psychic functioning

McClelland, 1993-12-01 [The Roots of Consciousness](#) David Clarence McClelland, 1964 **The Roots of Consciousness** Jeffrey Mishlove, 1975 [The Roots of Jewish Consciousness, Volume Two](#) Erich Neumann, 2019-04-24 The Roots of Jewish Consciousness Volume Two Hasidism is the second volume fully annotated of a major previously unpublished two part work by Erich Neumann 1905 1960 It was written between 1940 and 1945 after Neumann then a young philosopher and physician and freshly trained as a disciple of Jung fled Berlin to settle in Tel Aviv He finished this work at the end of World War II Although he never published it he kept it the rest of his life Volume Two Hasidism is devoted to the psychological and spiritual wisdom embodied in Jewish spiritual tradition Relying on Jung's concepts and Buber's Hasidic interpretations Neumann seeks alternatives to the legalism and anti feminine bias that he says have dominated collective Judaism since the Second Temple He argues that modern Jews can develop psychological wholeness through an appropriation of Hasidic legends Talmudic texts and Kabbalistic mysteries including especially the Zohar Exclusively this volume includes a foreword by Moshe Idel An appendix Neumann's four lecture series from the 1940s gives a glimpse of his intended unpublished Part Three These volumes anticipate Neumann's later works including Depth Psychology and a New Ethic The Origins and History of Consciousness and The Great Mother In Volume Two Hasidism his concept of the ego Self axis is developed in clearly psychological terms Four previously unpublished essays appended to Volume Two illustrate Neumann's developmental psychology including his theme of primary and secondary personalization This unique work will appeal to Jungian analysts and psychotherapists in training and in practice historians of psychology Jewish scholars biblical historians teachers of comparative religion as well as academics and students

Conscious Life John S. Torday, Rob G. Sacco, 2025-07-17 Understanding consciousness is the most important scientific principle left to be understood That is particularly true with the ready availability of software for Artificial Intelligence The conventional way of thinking about evolution is focused on materiality whereas a true understanding of evolution can only be understood by re focusing on the flow of energy in service to Symbiogenesis This book focuses on the role of quantum mechanics in the process of evolution based on the perspective of energy flow rather than the description of biologic materiality A basic understanding of that frame shift is comparable to the Periodic Table of Elements showing the interrelationship between the

alchemical description of matter and its energetic origin in the Big Bang Based on the author's earlier works going back 25 years regarding the role of cell-cell communication in development and speciation this book is designed to encourage an across space-time perspective on how and why we have evolved Energy and Evolution posits that the flow of energy is the primary force driving evolution in our Universe This perspective offers a superior framework for understanding biological complexity and environmental adaptability Evolution is presented not as a series of random mutations and adaptations but as a cohesive and purposeful progression toward enhanced communication and efficiency within and between organisms Central to this thesis are symbiogenesis and quantum entanglement which highlight the Universe's interconnectedness and emphasize collaboration and energy synergy over Darwinian competition The book explores the Fibonacci sequence and the golden ratio as self-organizing principles inherent in complex systems ranging from the micro to the macro from the periodic table to the cosmos and even in consciousness human development and aging Fibonacci spirals are described as symbolizing the constant oscillation between conscious and unconscious states akin to the balance between gravitational and radiant forces While speculative and ambitious in scope Energy and Evolution represents a sincere effort to integrate mathematics cosmology biology consciousness research and modern physics into a comprehensive theory that holds profound implications for understanding humanity's origins and future paths Diane Hennacy Powell MD Author of *The ESP Enigma A Scientific Case for Psychic Phenomena* *The Origin of Consciousness in the Breakdown of the Bicameral Mind* Julian Jaynes, 1976

What is human consciousness where did it come from and how does it determine who we are and how we live in the world At the heart of this book is the theory that human consciousness did not develop over time that in fact ancient peoples from Mesopotamia to Peru did not think as we do and therefore were not conscious Drawing on laboratory studies of the brain and close examination of archaeological evidence the author concludes that consciousness is not a product of evolution but of catastrophic events in our own history events that occurred as recently as three thousand years ago

Roots of Consciousness David C. McClelland, 1987-12-01 [The Roots of Reality](#) Ernest Belfort Bax, 1907 **Intelligence and Wisdom** Bing Song, 2021-09-08

This book centers on rethinking foundational values in the era of frontier technologies by tapping into the wisdom of Chinese philosophical traditions It tries to answer the following questions How is the essence underpinning humans nature and machines changing in this age of frontier technologies What is the appropriate ethical framework for regulating human-machine relationships What human values should be embedded in or learnt by AI Some interesting points emerged from the discussions For example the three dominant schools of Chinese thinking Confucianism Daoism and Buddhism invariably reflect non-anthropocentric perspectives and none of them places humanity in a supreme position in the universe While many Chinese philosophers are not convinced by the prospect of machine intelligence exceeding that of humans the strong influence of non-anthropocentrism in the Chinese thinking contributed to much less panic in China than in the West about the existential risks of AI The thinking is that as human beings have always lived with

other forms of existence living with programs or other forms of beings which may become more capable than humans will not inevitably lead to a dystopia Second all three schools emphasize self restraint constant introspection and the pursuit of sage hood or enlightenment These views therefore see the potential risks posed by frontier technologies as an opportunity for the humanity to engage in introspection on the lessons learned from our social and political history It is long overdue that humanity shall rethink its foundational values to take into account a multi being planetary outlook This book consists of nine leading Chinese philosophers reflections on AI s impact on human nature and the human society This is a groundbreaking work which has pioneered the in depth intellectual exploration involving traditional Chinese philosophy and frontier technologies and has inspired multidisciplinary and across area studies on AI philosophy and ethical implications Chapters 1 3 5 7 and 10 are available open access under a Creative Commons Attribution NonCommercial NoDerivatives 4 0

Mallatt, 2016-03-25 How consciousness appeared much earlier in evolutionary history than is commonly assumed and why all vertebrates and perhaps even some invertebrates are conscious How is consciousness created When did it first appear on Earth and how did it evolve What constitutes consciousness and which animals can be said to be sentient In this book Todd Feinberg and Jon Mallatt draw on recent scientific findings to answer these questions and to tackle the most fundamental question about the nature of consciousness how does the material brain create subjective experience After assembling a list of the biological and neurobiological features that seem responsible for consciousness and considering the fossil record of evolution Feinberg and Mallatt argue that consciousness appeared much earlier in evolutionary history than is commonly assumed About 520 to 560 million years ago they explain the great Cambrian explosion of animal diversity produced the first complex brains which were accompanied by the first appearance of consciousness simple reflexive behaviors evolved into a unified inner world of subjective experiences From this they deduce that all vertebrates are and have always been conscious not just humans and other mammals but also every fish reptile amphibian and bird Considering invertebrates they find that arthropods including insects and probably crustaceans and cephalopods including the octopus meet many of the criteria for consciousness The obvious and conventional wisdom shattering implication is that consciousness evolved simultaneously but independently in the first vertebrates and possibly arthropods more than half a billion years ago Combining evolutionary neurobiological and philosophical approaches allows Feinberg and Mallatt to offer an original solution to the hard problem of consciousness **The Expositor (Atthasālinī)** Buddhaghosa, 1921 *Natural Science and the Culture of Sages and*
