## **Roots Of The Italian School Of Economics And Finance From Ferrara 1857 To Einaudi 1944:**

*Roots of the Italian School of Economics and Finance*, 1998      *Roots of the Italian School of Economics and Finance*  
Mario Baldassarri, Pierluigi Ciocca, 2001 Since the late 19th century the Italian school of economics and finance has produced contributions of great importance and originality which include some of the most significant milestones of economic theory. However, the publication of these works in only Italy was a serious impediment to their broader European and international context. This volume, the third in a set of three, collects some of these important contributions and publishes them in English.

**Roots of the Italian School of Economics and Finance** Mario Baldassarri, Pierluigi Ciocca, 2001 Since the late 19th century the Italian school of economics and finance has produced contributions of great importance and originality which include some of the most significant milestones of economic theory. However, the publication of these works in only Italy was a serious impediment to their broader European and international context. This volume, the first in a set of three, collects some of these important contributions.      *Roots of the Italian School of Economics and Finance* Mario Baldassarri

(economista.), Pierluigi Ciocca, 2001      **The Paretian School and Italian Fiscal Sociology** M. McLure, 2007-01-31 In the 1930s a Pareto vogue emerged in the English speaking world. In Italy, however, the Paretian episode was already well established with many Italian economists investigating the relationship between economics and sociology based on Pareto's contributions. This is a study of the Paretian school and its fiscal sociology.      *Handbook on the History of Economic Analysis Volume III* Gilbert Faccarello, Heinz D. Kurz, 2016-07-27 This unique troika of Handbooks provides indispensable coverage of the history of economic analysis. Edited by two of the foremost academics in the field, the volumes gather together insightful and original contributions from scholars across the world. The encyclopaedic breadth and scope of the original entries will make these Handbooks an invaluable source of knowledge for all serious students and scholars of the history of economic thought.      **The Origins of International Economics: Neoclassical theory of international trade** Robert William

Dimand, 2004 A collection of materials reprinted from various sources.      *From Galileo to Modern Economics* Gianfranco Tusset, 2018-09-08 Empirical laws are rare in economics. This book describes efforts to anchor economic knowledge to invariant empirical laws. It links 17th and 18th century Galilean monetary economists to econophysics, a field that emerged in the mid 1990s. This virtual journey from past to present is charted by episodes on aggregates and empirical primacy. It includes the virtually unknown story of 19th century scholars who, by searching for a stricter mathematical approach, paved the way to an engineering view of economics. Then there are celebrities like Pareto and his first empirical law governing the distribution of wealth. Pareto and Amoroso sparked a debate on the skewed distribution that spanned decades, ranging from finance to market transformations to econophysics with its concepts and tools inherited from statistical physics. The last stage of the journey goes through econophysics and the recent gradual advances it has made, which show how its position vis-à-vis economics has been changing.      **Monopoly Power and Competition** Manuela Mosca, 2018-07-27 The innovative

contributions of the Italian Marginalists Pareto, Pantaleoni, De Viti de Marco and Barone to economic theory have previously been overlooked. This is the first book to deal with the history of the theory of market power and of its relation with competition, focusing on the distinct intellectual tradition that is Italian Marginalist economic thought. *Monopoly Power and Competition* is a vital resource for historians of economic thought as it explores a relatively untouched area of microeconomics that sheds light on the theories surrounding monopoly power and barriers to entry. **Antonio de Viti de Marco** Manuela Mosca, 2016-05-27 This book provides insight into the remarkable life and work of the Italian economist Antonio de Viti de Marco 1858-1943. This book presents eleven interviews with American and Italian scholars from various disciplines that provide a profile of this major intellectual as an economic theorist, politician, and individual. He was the founder of the pure theory of Public Finance, played an important role in the foundation of Public Choice, and was also a staunch liberal and radical politician. An English translation of one of his books, made as early as 1936, greatly influenced James M. Buchanan, Nobel prize winner for economics. **Economic Analyses in Historical Perspective** José Luís Cardoso, Heinz D. Kurz, Philippe Steiner, 2017-11-13 This book brings together leading scholars of the history of economic thought to demonstrate the vitality and richness of a discipline that welcomes both practitioners of intellectual contextual history as well as specialists in the historical explanation of the analytical and theoretical dimension of economic science. They shed new light on a variety of themes and problems and move the frontier of knowledge in the areas covered. *Economic Analyses in Historical Perspective* is presented in three parts. The first deals with French traditions in economics, a field that Gilbert Faccarello has tilled for many years and to which he has made numerous contributions. The second turns to the dissemination and diffusion of economic ideas and theories across national borders and thus to the European and even global level. Finally, the third part deals with analytical developments in some selected fields of economics: public economics, monetary policy, trade theory, and spatial economics. This volume is of great importance to those who study history of economic thought, political economy, and monetary economics. The chapters centre around the work of Gilbert Faccarello, making this book a fitting tribute to his academic career on the history of economic theory and ideas. *The Restructuring of Banks and Financial Systems in the Euro Area and the Financing of SMEs* F. Calcianno, F. Fiordelisi, G. Scarano, 2015-05-26 The 2007-2009 financial crisis has had a worldwide impact on banks and financial systems. It has also brought about major changes in Europe's financial regulatory framework, which could lead to financing problems for SMEs. The book explores the restructuring process of banking and financial systems to its impact on the financing of SMEs. *Power in Economic Thought* Manuela Mosca, 2018-10-17 This book offers a pluralistic vision of the way economists have dealt with the question of power in society over the last two centuries. Economists' ideas about power are examined from political, theoretical, and policy-making points of view, with additional discussion of the active participation of economists in the management of power. The book is organized into four main conceptions of power relations: i) Power as embedded in political institutions; ii) Power as

emerging from the asymmetric relations caused by the unequal distribution of income and wealth iii Power as associated to the monopolistic or oligopolistic position held by some firms in the market and iv Power as the management of economic policies by the state Mosca brings together contributions from a range of scholars to analyse how economists have considered the role of power putting the discussion into a much needed historical context Firms' Objectives and Internal Organisation in a Global Economy L. Lambertini, 2009-10-09 The interplay between firms internal organization and market behaviour is a long standing issue in industrial economics This book examines firms objectives in the comparatively new perspective shaped by globalization The positive and normative aspects of theoretical analysis are developed and richly complemented by empirical studies **Environmental Taxes and Fiscal Reform** L. Castellucci, A. Markandya, Gustavo Piga, 2012-11-30 A review of the literature on environmental taxes focusing on European experiences and analysing how such taxes can contribute to green causes as well as reducing the tax burden from ordinary taxation The authors examine the potential double dividend from tax reform for helping the environment reducing unemployment and encouraging growth

**New Essays on Pareto's Economic Theory** Luigino Bruni, Aldo Montesano, 2009-05-07 This collection brings together major Pareto scholars who examined the various aspects of Pareto's thinking from the point of view both of the history of economics and economic theory **A Collection of Surveys on Savings and Wealth Accumulation** Edda Claus, Iris Claus, 2016-02-23 In this collection of critical surveys the reader is provided with a range of up to date work from some of the leading scholars in the area writing on private and public sector aspects of savings and wealth accumulation A survey of savings and wealth accumulation which are important dimensions of research and policy debates Discusses the measurement of genuine savings and sustainability the estimation of wealth inequality and recent developments in consumer credit and defaults Evaluates the impact of student loans on financial well being people's retirement decisions and the impact of pension reform Considers the distribution of wealth across generations and the importance of accurately measuring government debt the rise of sovereign wealth funds and Islamic banking and finance *A Female Activist Elite in Italy (1890-1920)* Elena Laurenzi, Manuela Mosca, 2021-11-30 This book explores and traces the progressive activism and radical ideas of several elite women in Italy beginning in the early 20th century It discusses the shared political culture that shaped the thinking and the activity of these women mainly oriented towards political philanthropy and work seen as the cornerstone of a comprehensive redefinition of gender relations It also discusses the connections linking them to an international network of women involved in similar political actions and economic initiatives addressing women's interests as well as their legacy for the next generations With essays from a range of scholars this book provides an interdisciplinary framework for understanding these activists and deals with methodological and historiographical issues in reconstructing women's contribution to history *Public Procurement's Place in the World* G. Piga, F. Decarolis, M. Frey, 2014-08-17 This volume addresses different issues related to green innovation procurement as well as exploring the challenges involved in public

procurement It offers a broad array of perspectives addressing both general abstract problems of optimal public procurement and concrete cases of national or even local public procurement systems      **Measuring Inequality** Frank Alan Cowell, 2011-01-27 This book deals with the theoretical and practical problems involved in measuring the extent of inequality The book covers modern theoretical developments in inequality analysis and shows how the way we think about inequality has been shaped by classic contributions in economics and related disciplines
