Yes You Can Arthur G. Affleck, III, 2008-11-26 YES YOU CAN Finish High School and go to College is a book about possibility At its best it seeks to motivate inspire and empower young people to achieve their goal of going to college This book will be useful and helpful to any student but it will be especially useful to those students who have what it takes to finish high school and go to college but who may be experiencing doubts and lack of motivation The first chapter is titled Why you must go to college It makes a strong argument that any young person wishing to retain the slimmest hope of financial security or even a decent standard of living must get some form of education or training beyond high school The book opens with a quote from Dorothy J Hulst which says in part there are efforts and results and the strength of the effort is the measure of the result I truly believe that dreams can come true and goals can be achieved In fact I know that any young person can finish high school and go to college if that is what they truly desire to do and if they are willing to make some sacrifices and do the work I know that this is possible because there are those of us who faced significant life challenges and who had similar fears and yet we persisted and succeeded With the help of family friends and many caring adults we finished high school enrolled in college and managed to graduate It can happen for young people today as well They really don t know what they are capable of until they commit themselves to a goal and begin working towards its fulfillment In the United States the richest country in the world over one million students drop out of high school each and every year Retired General Colin Powell founder of America s Promise Alliance said this state of affairs is more than a problem it s a catastrophe This book is in part my small attempt to help to change the odds of students dropping out of high school by getting them to think about the consequences of their actions Today we know that the number one predictor of a young person s future success is whether they graduate from high school And for those

who go on to college they will earn a million dollars more than the average high school graduate during their lifetime A college education is even more important today as we see major problems in the U S economy In 2008 over 700 000 Americans lost their jobs Many of these jobs went to workers in other countries like India and China More job losses are projected for 2009 In recent months major banks and other financial institutions have failed or had to be rescued by the Federal Government Across the country many American families have lost their homes to foreclosure I share these facts to underscore the point that young people and adults simply must have some marketable skills to have any chance of getting and keeping a job and making a decent wage in this rapidly changing economy So it is vitally important that teens give themselves a chance in life by finishing high school and by going to college They can do it and this book will help *Playful Parenting* Lawrence J. Cohen, Ph.D.,2008-11-19 Parents have heard that play is a child s work but play is not for kids only As psychologist Lawrence J Cohen Ph D demonstrates in this delightful new book play can be the basis for an innovative and rewarding approach to parenting From eliciting a giggle during baby s first game of peek a boo to cracking jokes with a teenager while hanging out at the mall *Playful Parenting* is a complete guide to using play to raise strong confident children Have you ever stepped back to watch what really goes on when your children play As Dr Cohen points out play is children s complex and fluid way of exploring the world communicating hard to express feelings getting close to those they care about working through stressful situations and simply blowing off steam That s why playful parenting is so important and so successful in building strong close bonds between parents and children Through play we join our kids in their world We help them express and understand deep emotions foster connection aid the process of emotional healing and have a great time ourselves while we re at it Anyone can be a playful parent all it takes is a sense of adventure and a willingness to let down your guard and try something new After identifying why it can be hard for adults to play Dr Cohen discusses how to get down on the floor and join children on their own terms He covers games activities and playful interactions that parents can enjoy with children of all ages whether it s gazing deep into a baby s eyes playing chase with a toddler fantasy play with a grade schooler or reducing a totally cool teenager to helpless laughter *Playful Parenting* also includes illuminating chapters on how to use play to build a child s confidence and self esteem how to play through sibling rivalry and how play can become a part of loving discipline Written with love and humor brimming with good advice and revealing anecdotes and grounded in the latest research *Playful Parenting* will make you laugh even as it makes you wise in the ways of being a happy effective enthusiastic parent *Resilience* Gillian King,Elizabeth G. Brown,Linda K. Smith,2003-10-30 This volume brings to life the nature of resilience and adaptation to change by describing turning points or critical experiences in the lives of people with disabilities People with cerebral palsy spina bifida or attention deficit disorder are interviewed They describe events and experiences that changed their lives and pinpoint which factors helped or hindered their adaptation Interweaving these compelling stories with popular thought and research evidence the authors show how understanding the resilience of people

with disabilities may help all readers create meaning in life and become resilient Rich in personal detail yet strong in its presentation of academic literature and other non fiction works related to resilience this volume will appeal to a wide variety of readers from people who wonder about the meaning of life to the parents of children with disabilities and organizations that deliver services to them to students and professors in the fields of psychology education social work and occupational therapy
