The ROOTS OF READING Writing is the ability to leave information through symbols while reading is the ability to retrieve information previously written Writing is transcribing words we speak into understandable symbols that we see We are not born speaking but we are wired to acquire the speech that we hear in a relatively short time flawlessly We have the inherent capacity to form concepts and label concepts with words Reading is an outgrowth of speaking It follows that to be a good reader one must be a fluent speaker and commands a wide range of vocabulary Unlike speaking we need to be taught to read and write We build a vocabulary of using symbols to represent the sounds that make up words Similarly we represent auditory signs with visual signs These signs are represented by the letters of the alphabet We communicate verbally through speaking and listening For written communication we use writing sending a message and reading retrieving message The method of representing sounds that make up words with signs is called phonics Writing is simply representing the sounds letters we use in saying a word Reading is retrieving the message we wrote Analyzing the sounds that make up a word is called decoding Choosing letters to represent the sounds of the word we want to say is encoding Decoding and encoding are the cornerstones of reading and writing At first the process of decoding is slow but with practice automaticity sets in and decoding is faster Decoding then is reading To be an effective reader one needs to develop a subset of skills as follows phonemic awareness phonics fluency vocabulary comprehension      *Phonics for Dummies* Susan M. Leaving Johnny Behind Anthony Pedriana, 2010-10-16 In the tradition of Why Johnny Can t Read written by Rudolph Flesch in the 1950s Leaving Johnny Behind provides a comprehensive examination of the barriers that deny children adequate literacy training This book describes the obstacles faced by a school principal from Milwaukee s central city when he attempted to implement research based reading practices Upon further examination he discovered that the reading establishment generally rejects the product of legitimate science choosing instead to engage in a never ending interfusion of the latest innovations modifications and gimmicks This condition Anthony Pedriana observes has a disparate impact on poor and minorities those who suffer from dyslexia and other forms of reading disability and those for whom English is a second language But unlike Flesch who stressed the differences between phonics and holistic practices Pedriana seeks common ground among reading practitioners He notes that there is plenty in

the data for both sides to love and that failing to take advantage of that convergence is to mock our high minded expressions of children first
