in Bee Culture ,1878 **Motion Picture Story Magazine** ,1915 Character Reading ,1927 **The Publishers' Trade List Annual** ,1990 **Root of Thought** Henry Kong, 2010-05-12 Consciousness is a clever adaptation for life as a social ape But like all adaptations it has its limits Lion claws and butterfly wings are made of tissue and proteins that require proper diet and maintenance to keep their integrity Likewise a fully functioning conscious system is a phenomenon that requires a well nourished neural substrate to keep it going It is important to point out that a healthy brain is necessary but not sufficient for consciousness because not all of the brain is conscious There are great swaths of brain that are crucially important for maintaining the vegetative functions of homeostasis such as breathing heartbeat temperature and sleep With a hundred billion neurons and a hundred trillion synapses the brain is the most complex adaptation known Yet we know shockingly little about how it enables the human mind to become conscious make decisions believe in God and behave morally However recent discoveries in cognitive neuroscience behavioral genetics and evolutionary psychology are beginning to revolutionize old conceptions of nature and nurture reason and passion and automatic versus willfully chosen actions Root of Thought will take readers on a remarkable journey through the landscape of the mind in search of its biological basis
