Kathryn Anne Morey,2013-12-12 Whether re-creating an actual event or simply being set in a bygone era films have long taken liberties with the truth While some members of the audience can appreciate a movie without being distracted by historical inaccuracies other viewers are more discerning From revered classics like *Gone with the Wind* to recent award winners like *Argo* Hollywood films often are taken to task for their loose adherence to the facts But what obligation do filmmakers have to the truth when trying to create a two hour piece of

Third World Film Making and the West Roy Armes,1987-07-29 This volume is the first fully comprehensive account of film production in the Third World Although they are usually ignored or marginalized in histories of world cinema Third World countries now produce well over half of the world s films Roy Armes sets out initially to place this huge output in a wider context examining the forces of tradition and colonialism that have shaped the Third World defined as those countries that have emerged from Western control but have not fully developed their economic potential or rejected the capitalist system in favor of some socialist alternative He then considers the paradoxes of social structure and cultural life in the post independence world where even such basic concepts as nation national culture and language are problematic The first experience of cinema for such countries has invariably been that of imported Western films which created the audience and in most cases still dominate the market today Thus Third World film makers have had to assert their identity against formidable outside pressures The later sections of the book look at their output from a number of angles in terms of the stages of overall growth and corresponding stages of cinematic development from the point of view of regional evolution in

Asia Africa and Latin America and through a detailed examination of the work of some of the Third World's most striking film innovators. In addition to charting the broad outlines of filmic developments too little known in Europe and the United States, the book calls into question many of the assumptions that shape conventional film history. It stresses the role of distribution in defining and limiting production, queries simplistic notions of independent national cinemas, and points to the need to take social and economic factors into account when considering authorship in cinema. Above all, the book celebrates the achievements of a mass of largely unknown film makers who in difficult circumstances have distinctively expanded our definitions of the art of cinema.

Roy Armes, who lives in London, has written nine books on film, his most recent being *French Cinema*. He spent more than three years researching this volume.
