**Tropical Rain Forest Ecology, Diversity, and Conservation** Jaboury Ghazoul,Douglas Sheil,2024-03-14 Rain forests represent the world s richest

repository of terrestrial biodiversity and play a major role in regulating the global climate. They support the livelihoods of a substantial proportion of the world's population and are the source of many internationally traded commodities. They remain, despite decades of conservation attention, increasingly vulnerable to degradation and clearance with profound, though often uncertain, future costs to global society. Understanding the ecology of these diverse biomes and peoples' dependencies on them is fundamental to their future management and conservation. *Tropical Rain Forest Ecology: Diversity and Conservation* introduces and explores what rain forests are, how they arose, what they contain, how they function, and how humans use and impact them. The book starts by introducing the variety of rain forest plants, fungi, microorganisms, and animals, emphasizing the spectacular diversity that is the motivation for their conservation. The central chapters describe the origins of rain forest communities, the variety of rain forest formations, and their ecology and dynamics. The challenge of explaining the species richness of rain forest communities lies at the heart of ecological theory and forms a common theme throughout. The book's final section considers historical and current interactions of humans and rain forests. It explores biodiversity conservation as well as livelihood security for the many communities that are dependent on rain forests, inextricable issues that represent urgent priorities for scientists, conservationists, and policy makers.

**Rainforests of the World** Kathlyn Gay, 2001-08-13

This authoritative volume examines the reasons for rainforest destruction, the effects of deforestation on indigenous plant and animal life, and the policies and actions that are currently being taken to protect rainforests. *Rainforests of the World* covers everything from the basic biology and chemistry of rainforests and their geographic location to problems, controversies, and solutions. A section highlights people and events like Gifford Pinchot, Lester Brown, Anita Roddick, the Alaska Native Claims Settlement Act, and the Kyoto Protocol. The documents provided include the Declaration of Curitiba, the Indigenous Peoples Declaration, and the North American Free Trade Agreement. The book includes a chronology, charts, tables, and graphs on rainforest destruction, a list of groups working to protect rainforests, an extensive annotated bibliography, and other references.
