a society will be better prepared to harness the economic and cultural changes related to globalization rather than be hurt or divided by these same forces of economic and cultural restructuring

Planning for the Unplanned Aseem Inam, 2013-11-26 How do cities plan for the unplanned Do cities plan for recovery from every possible sudden shock How does one prepare a plan for the recovery after a tragedy like the September 11 2001 terrorist attacks on New York The book discovers the systematic features that contribute to the success of planning institutions In cities filled with uncertainty and complexity planning institutions effectively tackle unexpected and sudden change by relying on the old and the familiar rather than the new and the innovative The author argues that planning programs institutions were successful because they were bureaucratic and relied on standardized routines rigorous sets of established regimes familiar programs and institutionalized hierarchies Also contrary to popular perception neither the leaders at the top of the institutions nor those workers at the grassroots level were the most important in the implementation of such routines The key actors were middle managers because they knew the institutional structures inside out what the routines were and how to use them and were successful go between between national governments and grassroots community groups Case studies from Mexico City Los Angeles and New York provide a deeper understanding of urban planning processes The case studies reveal that systematic institutional analysis helps us understand what works in planning and why They also demonstrate the manner in which institutional routines serve as powerful and effective tools for addressing novel situations

Coleman, 2017-08-08 A fully revised and updated new edition of the classic history of western America The newly revised second edition of this concise engaging and unorthodox history of America's West has been updated to incorporate new research including recent scholarship on Native American lives and cultures An ideal text for course work it presents the West as both frontier and region examining the clashing of different cultures and ethnic groups that occurred in the western territories from the first Columbian contacts between Native Americans and Europeans up to the end of the twentieth century Rethinking Development Geographies Marcus Power, 2004-08-02 Development as a concept is notoriously imprecise vague and presumptuous Struggles over the meaning of this fiercely contested term have had profound implications on the destinies of people and places across the globe Rethinking Development Geographies offers a stimulating and critical introduction to the study of geography and development In doing so it sets out to explore the spatiality of development thinking and practices The book highlights the geopolitical nature of development and its origins in Empire and the Cold War It also reflects critically on the historical engagement of geographers with the Tropics the Third World and the South The dominant economic and political philosophies that shape the policies and perspectives of major institutions are discussed The interconnections between globalization and development are highlighted through an examination of local national and transnational resistance to various forms of development The text provides an accessible introduction to the complex and confusing world of contemporary global development Informative diagrams cartoons and case studies are used throughout While exploring global geographies of economic and political change Rethinking Development Geographies is also grounded in a concern with people and places the view from below the views of women and the view from the South Hatreds Zillah Eisenstein, 2014-04-23 Eisenstein tracks developments such as racialized ethnic and gender conflict the new male democracies of eastern Europe the new Democrats of the Clinton era exploring the politics of hate In HATREDS Zillah Eisenstein charts the plural politics of the twenty first century which she defines as having begun with the fall of communism and the gulf war Exploring the politics of hate on both global and local levels Eisenstein tracks developments such as racialized ethnic and gender conflict the new male democracies of eastern Europe and the new Democrats of the Clinton era the sexual exploitation of the west and the sexual violence of nationalisms and the importance of western feminisms promissory standpoint of freedom to women in the third world **The Seven States of California** Philip L. Fradkin, 1997-05-12 Philip Fradkin's work is full of foresight good sense and an understanding of the ties between social and environmental dilemmas Taking Fradkin's writing seriously is an important step in figuring out the American West today Patricia Nelson Limerick **Behind the Label** Edna Bonacich, Richard Appelbaum, 2000-06-28 In a study crucial to our understanding of American social inequality Edna Bonacich and Richard Appelbaum investigate the return of sweatshops to the apparel industry especially in Los Angeles The new sweatshops they say need to be understood in terms of the decline in

the American welfare state and its strong unions and the rise in global and flexible production Apparel manufacturers now have the incentive to move production to wherever low wage labor can be found while maintaining arm s length contractual relations that protect them from responsibility The flight of the industry has led to a huge rise in apparel imports to the United States and to a decline in employment Los Angeles however remains a puzzling exception in that its industry employment has continued to grow to the point where L A is the largest center of apparel production in the nation Not only the availability of low wage immigrant often undocumented workers but also the focus on moderately priced fashion sensitive women s wear makes this possible Behind the Label examines the players in the L A apparel industry including manufacturers retailers contractors and workers evaluating the maldistribution of wealth and power The authors explore government and union efforts to eradicate sweatshops while limiting the flight to Mexico and elsewhere and they conclude with a description of the growing antisweatshop movement Los Angeles Times Best Nonfiction Book of 2000 Urban Sociolinguistics Dick Smakman,Patrick Heinrich,2017-08-29 From Los Angeles to Tokyo Urban Sociolinguistics is a sociolinguistic study of twelve urban settings around the world Building on William Labov s famous New York Study the authors demonstrate how language use in these areas is changing based on belief systems behavioural norms day to day rituals and linguistic practices All chapters are written by key figures in sociolinguistics and presents the personal stories of individuals using linguistic means to go about their daily communications in diverse sociolinguistic systems such as extremely large urban conurbations like Cairo Tokyo and Mexico City smaller settings like Paris and Sydney less urbanised places such as the Western Netherlands Randstad area and Kohima in India Providing new perspectives on crucial themes such as language choice and language contact code switching and mixing language and identity language policy and planning and social networks this is key reading for students and researchers in the areas of multilingualism and super diversity within sociolinguistics applied linguistics and urban studies **Crossing Borders** Tapan Basu,Tasneem Shahnaaz,2017-05-04 Crossing Borders is a gathering of twenty original interdisciplinary essays on the paradigm of borders in African American literature multi ethnic U S studies and South Asian studies These essays by established and mid career scholars from around the globe employ a variety of approaches to the idea of border crossings and represent important contributions to the discourses on modernity diasporic mobility populism migration exile sub nation trans nation as well as the formation of nationalities communities and identities Borders in these contexts signify social and national inequities and hierarchies and also the ways to challenge and transgress entrenched barriers sanctioned by habit custom and law The volume also honors and celebrates the life and work of Amritjit Singh as a teacher mentor author scholar and editor over half a century Black Arts West Daniel Widener,2010-03-08 A social and cultural history of African American arts activity in Los Angeles between the Second World War and the 1992 riots **Street Level: Los Angeles in the Twenty-First Century** Rob Sullivan,2016-04-01 In the latter part of the C20th a series of seminal books were written which examined Los

Angeles by the likes of Reyner Banham Mike Davis Edward Soja Allen Scott Michael Dear Frederick Jameson Umberto Eco Bernard Henri Levy and Jean Baudrillard which have been hugely influential in thinking about cities more broadly The debates which were generated by these works have tended to be very heated and either defensive or offensive in approach A sufficient amount of time has since passed that a more measured approach to evaluating this work can now be taken The first section of this book Contra This and Contra That provides such a critique of the various theories applied to Los Angeles during the last century balancing the positive with the negative The second part of the book is an investigation of L A as it exists on the ground today While political the theoretical stance taken in this investigation is not mounted as a platform from which to advocate a particular ideology Instead it encompasses cultural as well as economic issues to put forth a view of L A which is coherent and cogent while at the same time considering its multi layered complex and ever changing qualities It concludes by arguing that sectorised off and totalizing visions of the city will not do as instruments of urban analysis and that only a theory as mobile as its target will do one that replicates the polymer nature of this place It proposes that extending that theory to the world beyond this particular city only a theory that models itself on the mobile and polymer nature of the world while still retaining a sense of the actual and the real will do as an instrument with which to comprehend the world In doing so this book is not only a model by which to think through Los Angeles but as a model by which to think through other world cities
