Torrence,2017-12-13 Molecules of nature are created by living organisms in their quest to survive and thrive in Earth s challenging environments This ages old evolutionary struggle has produced an immense library of chemicals from which humans have selected invaluable therapeutics critical to modern medicine Natural products presently provide half of all prescription medications and 70% of all cancer drugs The success of continued drug development from natural products depends upon the diversity of molecules of nature which in turn depends upon biodiversity Unfortunately human caused damage to the environment from pollution to habitat loss to overexploitation of resources is causing unprecedented ecological damage and death of species a mass extinction event Unless this biotic crisis is obviated humanity will lose a primary source of future novel medicines This book assembles a powerful argument for nature s critical role in providing medicines for humanity and how that

irreplaceable service is threatened by the extinction crisis A sampling of the molecules of nature employed in modern medicine reads like a catalog of biodiversity For example one of the most prescribed drugs in the United States is lisinopril which controls high blood pressure Lisinopril originated from the venom of a deadly viper from the Amazonian forests A denizen of US southwestern deserts provided a therapeutic for type II diabetes The ancient horseshoe crab of the US Atlantic coast enables a critical test for deadly endotoxins in medical products of all kinds Once a diagnosis of acute lymphocytic leukemia in children was a death sentence A tropical flower from Madagascar provided two natural products that changed a 90% fatality rate to a 90% cure rate The Pacific Yew tree from the US northwest was discovered to contain the potent anticancer agent Taxol now vital in the treatment of breast and ovarian cancers and Kaposi s sarcoma This book tells the fascinating story of these and other medicines It also summarizes some of the driving forces of the Sixth Mass Extinction and shows how it threatens at least half of the planet s species with extinction We rightly ask What will be the future of medicine without the contribution of millions of species How many treatments for disease will be forever lost What cures are we asking future generations to forgo As we willy nilly extinguish the future of one organism after another together with all the knowledge they hold we are like the looters of the Great Library of Alexandria The final chapter challenges readers to pursue a different outcome By uniting our efforts we can still preserve many of the remaining species on our blue green planet and the invaluable gifts they offer

*Light at the Edge of the World* Wade Davis, 2009-12-01 For more than 30 years renowned anthropologist Wade Davis has traveled the globe studying the mysteries of sacred plants and celebrating the world s traditional cultures His passion as an ethnobotanist has brought him to the very center of indigenous life in places as remote and diverse as the Canadian Arctic the deserts of North Africa the rain forests of Borneo the mountains of Tibet and the surreal cultural landscape of Haiti In *Light at the Edge of the World* Davis explores the idea that these distinct cultures represent unique visions of life itself and have much to teach

the rest of the world about different ways of living and thinking As he investigates the dark undercurrents tearing people from their past and propelling them into an uncertain future Davis reiterates that the threats faced by indigenous cultures endanger and diminish all cultures      Acorns: Windows High-Tide Foghat Joshua Morris,2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around      The Maximum of Wilderness Kelly Enright,2012 Locating a new wilderness nature and conservation at the start of the twentieth century Tame adventures and wild homes encountering the jungle with Martin and Osa Johnson Discovering jungle peace the prolonged observations of William Beebe Ingesting the jungle the botanical experiences of David Fairchild and Richard Evans Schultes      *Shamanism and Vulnerability on the North and South American Great Plains* Kathleen Bolling Lowrey,2020-12-01 In Shamanism and Vulnerability on the North and South American Great Plains Kathleen Bolling Lowrey provides an innovative and expansive study of indigenous shamanism and the ways in which it has been misinterpreted and dismissed by white settlers NGO workers policymakers government administrators and historians and anthropologists Employing a wide range of theory on masculinity disability dependence domesticity and popular children s literature Lowrey examines the parallels between the cultures and societies of the South American Gran Chaco and those of the North American Great Plains and outlines the kinds of relations that invite suspicion and scrutiny in divergent contexts in the Americas power and autonomy in the case of Amerindian societies and weakness and dependence in the case of settler societies She also demonstrates that where stigmatized or repressed in practice dependence and power manifest and intersect in unexpected ways in storytelling fantasy and myth The book reveals the various ways in which anthropologists historians folklorists and other writers have often misrepresented indigenous shamanism and revitalization movements by unconsciously projecting ideologies and assumptions derived from modern contract societies onto ethnographic and historical realities Lowrey also provides alternative ways of understanding indigenous American communities and their long histories of interethnic relations with expanding colonial and national states in the Americas A creative historical and ethnographical reevaluation of the last few decades of scholarship on shamanism disability and dependence Shamanism and Vulnerability on the North and South American Great Plains will be of interest to scholars of North and South American anthropology indigenous history American studies and feminism      The Architecture of Luxury Annette Condello,2016-03-16 Over the past century luxury has been increasingly celebrated in the sense that it is no longer a privilege or attitude of the European elite or America s leisure class It has become more ubiquitous and now practically everyone can experience luxury even luxury in architecture Focusing on various contexts within Western Europe Latin America and the United States this book traces the myths and application of luxury within architecture interiors and

designed landscapes Spanning from antiquity to the modern era it sets out six historical categories of luxury Sybaritic Lucullan architectural excess rustic neoEuropean and modern and relates these to the built and unbuilt environment taking different cultural contexts and historical periods into consideration It studies some of the ethical questions raised by the nature of luxury in architecture and discusses whether architectural luxury is an unqualified benefit or something which should only be present within strict limits The author argues how the ideas of permissible and impermissible luxury have informed architecture and how these notions of ethical approval have changed from one context to another Providing voluptuous settings for the nobles and the leisure class luxury took the form of not only grand palaces but also follies country and suburban houses private or public entertainment venues and ornate skyscrapers with fast lifts The Architecture of Luxury proposes that in Western societies the growth of the leisure classes and their desire for various settings for pleasure resulted in a constantly increasing level of luxury sought within everyday architecture
