*Intensive Psychotherapy for Persistent Dissociative Processes: The Fear of Feeling Real (Norton Series on Interpersonal Neurobiology)* Richard A. Chefetz, 2015-04-06 Winner of the International Society for the Study of Trauma and Dissociation's ISSTD Pierre Janet Writing Award 2015 What really happens in dissociation Dissociative processes have long burdened trauma survivors with the dilemma of longing to feel real at the same time as they desperately want to avoid the pain that comes with that healing a dilemma that often presents particularly acute difficulties for healing professionals Recent clinical and neurobiological research sheds some light into the dark corners of a mind undergoing persistent dissociation but its integration into the practice of talking therapy has never until now been fully realized Intensive Psychotherapy for Persistent Dissociative Processes brings readers into the consultation room and into the minds of both patient and therapist like no other work on the treatment of trauma and dissociation Richard A Chefetz marries neuroscientific sophistication with a wealth of extended case histories following patients over several years and offering several verbatim session transcripts His unpacking of the emotionally impactful experience of psychodynamic talking therapy is masterfully written clearly accessible and singularly thorough From neurobiological foundations he builds a working understanding of dissociation and its clinical manifestations Drawing on theories of self states and their involvement in dissociative experiences he demonstrates how to identify persistent dissociation and its related psychodynamic processes including repetition compulsion and enactment He then guides readers through the beginning stages of a treatment with particular attention to the psychodynamics of emotion in both patient and therapist The second half of the book immerses readers in emotionally challenging clinical processes offering insight into the neurobiology of fear and depersonalization as well as case examples detailing struggles with histories of incest sexual addiction severe negativity negative therapeutic reactions enactment and object coercive doubting The narrative style of Chefetz's casework is nearly novelistic bringing to life the clinical setting and the struggles in both patient and therapist The only mystery in this clinical exposition as it

explores several cases over a number of years is what will happen next In the depth of his examples and in continual self reflexive analysis of flaws in past treatments Chefetz is both a generous guide and an expert storyteller Intensive Psychotherapy for Persistent Dissociative Processes is unique in its ability to place readers in the consultation room of psychodynamic therapy With an evidence focused approach based in neurobiology and a bold clinical scope it will be indispensable to new and experienced therapists alike as they grapple with the most intractable clinical obstacles **A Theory of Feelings** Agnes Heller,2009-01-01 A Theory of Feelings examines the problem of human feelings widely understood from phenomenological analytic and historical perspectives It begins with an analysis of drives and affects and pursues the nature of feeling itself in all of its variability through a close study of the distinctive categories of emotions emotional dispositions orientive feelings and the passions As such the starting point of the analysis entails an examination of the characteristics of human involvement or our ways of being in the world Building upon this assessment of the conditions of human involvement the philosophical history and emotional economy characteristic of modern relationships is treated and the nature of expression social division suffering and responsibility is evaluated in light of the theory of feeling presented here Book jacket [The Focusing Student's and Companion's Manual, Part Two](#) Barbara McGavin,Ann Weiser Cornell,2002-05 **Lots of Feelings** ,2011 *The Monster Book of Feelings* Amie Taylor,2022-02-21 This book is designed to help children to understand and articulate the emotions they might experience feelings of anxiety and worry pride joy and excitement sadness anger and jealousy and provides simple strategies for managing their mental health Full of monster themed stories activities and downloadable worksheets it is ideal to use individually or in group settings with ages 5 9 Children will meet characters like Thomas the big purple monster who has a heavy backpack full of his worries and Geronimo who inconveniently creates small floods with his tears all around Icicle Island The second part of the book is a detailed guide for adults with explanations of key concepts support for delivering the activities suggested discussion points and drama activities to consolidate learning *A Pocketful of Feelings* Susie Barbaran,2016-08-15 The purpose of this book is to allow children to become familiar with and to hopefully use in their everyday language many adjectives that describe feelings Too many children when they see the face of a character in a book describe what that character may be feeling as good happy sad or mad I have taught Title 1 children from the first to the sixth grade for the past eleven years and these are my findings I also hope that parents and children alike after reading this book will come to realize that being annoyed can end happily that someone who is teasing someone else will realize that all people are important that its okay to be cranky once in a while and that your cranky face probably is not as pretty as your happy face This book A Pocketful of Feelings is a collection of six short stories featuring an adjective describing a feeling These are adjectives that are not as commonly used as they could be I hope you enjoy these stories as much as I do *TMI* Madison Penner,2020-01-09 TMI Truthful Marriage Insights is an intimate candid view into one woman s marriage offered to help others benefit from the lessons she s learned The book is
