Agricultural Libraries Information Notes, 1987 Recent Translational Research in HIV/AIDS Yi-Wei Tang, 2011-11-02 The collective efforts of HIV AIDS research scientists from over 16 countries in the world are included in the book This 27 chapter Open Access book well covers HIV AIDS translational researches on pathogenesis diagnosis treatment prevention and also those beyond conventional fields These are by no means inclusive but they do offer a good foundation for the development of clinical patient care The translational model forms the basis for progressing HIV AIDS clinical research When linked to the care of the patients translational researches should result in a direct benefit for HIV AIDS patients Crosstalk and Integration of Membrane Trafficking Pathways Roberto Weigert, 2012-04-11 Membrane traffic is a broad field that studies the complex exchange of membranes that occurs inside the cell Protein lipids and other molecules traffic among intracellular organelles and are delivered to or transported from the cell surface by virtue of membranous carriers generally referred as transport intermediates These carriers have different shapes and sizes and their biogenesis modality of transport and delivery to the final destination are regulated by a multitude of very complex molecular machineries A concept that has clearly emerged in the last decade is that each membrane pathway does not represent a close system but is fully integrated with all the other trafficking pathways The aim of this book is to provide a general overview of the extent of this crosstalk **Protein Kinases** Gabriela Da Silva Xavier, 2012-06-05 Proteins are the work horses of the cell As regulators of protein function protein kinases are involved in the control of cellular functions via intricate signalling pathways allowing for fine tuning of physiological functions This book is a collaborative effort with contribution from experts in their respective fields reflecting the spirit of collaboration across disciplines and borders that exists in modern science Here we review the existing literature and on occasions provide novel data on the function of protein kinases in various systems We also discuss the implications of these findings in the context of disease treatment and drug development **An Introduction to Biological Membranes** William Stillwell, 2013-04-20 An Introduction to Biological Membranes From Bilayers to Rafts covers many aspects of membrane structure function that bridges membrane biophysics and cell biology Offering cohesive foundational information this publication is valuable for advanced undergraduate students graduate students and membranologists who seek a broad overview of membrane science Brings together different facets of membrane research in a universally understandable manner Emphasis on the historical development of the field Topics include membrane sugars membrane models membrane isolation methods and membrane transport **Index to Conferences Relating to Nuclear Science** Willie E. Clark, Carol B. Patterson, Margaret L. Pflueger, 1966 **List of Journals Indexed in Index Medicus** National Library of Medicine (U.S.), 2004 Issues for 1977 1979 include also Special List journals being indexed in cooperation with other institutions Citations from these journals appear in other MEDLARS bibliographies and in MEDLING but not in Index medicus *Intercellular Communication* Feliksas Bukauskas, 1991 Vocal

Bacteriophages İpek Kurtböke, 2012-03-14 Bacteriophages have received attention as biological control agents since their discovery and recently their value as tools has been further emphasized in many different fields of microbiology. Particularly in drug design and development programs phage and prophage genomics provide the field with new insights. Bacteriophages reveal information on the organisms ranging from their biology to their applications in agriculture and medicine.

Contributors address a variety of topics capturing information on advancing technologies in the field. The book starts with the biology and classification of bacteriophages with subsequent chapters addressing phage infections in industrial processes and their use as therapeutic or biocontrol agents. Microbiologists, biotechnologists, agricultural, biomedical and sanitary engineers will find Bacteriophages invaluable as a solid resource and reference book.

Research Grants Index National Institutes of Health (U.S.). Division of Research Grants, 1973 *Research Awards Index*, 1987 **Characterization of Biological Membranes** Mu-Ping Nieh, Frederick A. Heberle, John Katsaras, 2019-07-22 The study of membranes has become of high importance in the fields of biology, pharmaceutical chemistry and medicine since much of what happens in a cell or in a virus involves biological membranes. The current book is an excellent introduction to the area which explains how modern analytical methods can be applied to study biological membranes and membrane proteins and the bioprocesses they are involved to.

Life Sciences, Information Sciences Thierry Gaudin, Dominique Lacroix, Marie-Christine Maurel, Jean-Charles Pomerol, 2018-03-15 Developed from presentations given at the Cerisy SVSI Sciences de la vie sciences de l'information conference held in 2016, this book presents a broad overview of thought and research at the intersection of life sciences and information sciences. The contributors to this edited volume explore life and information on an equal footing with each considered as crucial to the other. In the first part of the book the relation of life and information in the functioning of genes at both the phylogenetic and ontogenetic levels is articulated and the common understanding of DNA as code is problematized from a range of perspectives. The second part of the book homes in on the algorithmic nature of information questioning the fit between life and automaton and the accompanying division between individualization and invariance. Consisting of both philosophical speculation and ethological research, the explorations in this book are a timely intervention into prevailing understandings of the relation between information and life.

Biology of the Chemotactic Response Society for General Microbiology. Symposium, Society for General Microbiology, 1990 The tendency of a living organism to move to a more favourable environment is a natural but complex reaction involving the integration of sometimes conflicting environmental stimuli as well as a coordinated mechanical response. The response of motile single cell organisms to environmental stimuli provides a useful model for understanding first of all how the environment is monitored and sensed and secondly how this information is processed to result in an integrated and coordinated response. The volume looks at a

large number of well studied examples of the chemotactic response in prokaryotes and eukaryotes and casts new light on how cells process information and react to their environment This fundamental response is of great importance in understanding one of the characteristic features of living organisms Subject Guide to Books in Print ,1997 Serials in the British Library ,2006 **Membrane Transport** ,1981-01-01 Membrane Transport Medicinal Chemistry and Drug Design Deniz Ekin,2012-05-16 Over the recent years medicinal chemistry has become responsible for explaining interactions of chemical molecules processes such that many scientists in the life sciences from agronomy to medicine are engaged in medicinal research This book contains an overview focusing on the research area of enzyme inhibitors molecular aspects of drug metabolism organic synthesis prodrug synthesis in silico studies and chemical compounds used in relevant approaches The book deals with basic issues and some of the recent developments in medicinal chemistry and drug design Particular emphasis is devoted to both theoretical and experimental aspect of modern drug design The primary target audience for the book includes students researchers biologists chemists chemical engineers and professionals who are interested in associated areas The textbook is written by international scientists with expertise in chemistry protein biochemistry enzymology molecular biology and genetics many of which are active in biochemical and biomedical research We hope that the textbook will enhance the knowledge of scientists in the complexities of some medicinal approaches it will stimulate both professionals and students to dedicate part of their future research in understanding relevant mechanisms and applications of medicinal chemistry and drug design **Serials Updating Service** ,1977 **Supported Lipid Bilayer as a Biomimetic Platform for Neuronal Cell Culture** Dzmitry Afanasenkau,2013
