Fifty-two years later Han Hyun-kyu is on a plane flying back to Korea leaving behind his own wife in America. It is his daughter Jane a war photographer recently injured in a bombing in Baghdad and forced to return to New York who journeys to find him in the small town in South Korea where his brothers have settled. Here father and daughter take refuge from their demons flirt with passion and in the wake of tragedy discover something deeper and more enduring than they could have imagined. accounts are newly translated from Arabic Persian Hebrew and Spanish and include such authors as Rabindranath Tagore V S Naipaul and Octavio Paz *A World at Sea* Lauren Benton, Nathan Perl-Rosenthal, 2020-10-09 The past twenty five years have brought a dramatic expansion of scholarship in maritime history including new research on piracy long distance trade and seafaring cultures Yet maritime history still inhabits an isolated corner of world history according to editors Lauren Benton and Nathan Perl Rosenthal Benton and Perl Rosenthal urge historians to place the relationship between maritime and terrestrial processes at the center of the field and to analyze the links between global maritime practices and major transformations in world history *A World at Sea* consists of nine original essays that sharpen and expand our understanding of practices and processes across the land sea divide and the way they influenced global change The first section highlights the regulatory order of the seas as shaped by strategies of land based politics and their agents and by conflicts at sea The second section studies documentary practices that aggregated and conveyed information about sea voyages and encounters and it traces the wide ranging impact of the explosion of new information about the maritime world Probing the political symbolism of the land sea divide as a threshold of power the last section features essays that examine the relationship between littoral geographies and sociolegal practices spanning land and sea Maritime history the contributors show matters because the oceans were key sites of experimentation innovation and disruption that reflected and sparked wide ranging global change Contributors Lauren Benton Adam Clulow Xing Hang David Igler Jeppe Mulich Lisa Norling Nathan Perl Rosenthal Carla Rahn Phillips Catherine Phipps Matthew Raffety Margaret Schotte *The Family in the Western World from the Black Death to the Industrial Age* Beatrice Gottlieb, 1994-06-02 Although the history of the family was long ignored by serious scholars research has flourished in recent decades and this new field of study has told us much more than we knew even thirty years ago In the process many myths about what life was like two or three centuries ago have been debunked For example contrary to popular belief we now know that most women in the preindustrial West did not marry before they were twenty five Most households consisted of no more than four or five people usually including unrelated young people working as servants And perhaps most surprising of all multi generational households were not very common This timely synthesis of a vast and complex literature makes accessible to general readers the story of the family in the preindustrial Western world Pulling together much fascinating information Beatrice Gottlieb presents every aspect of a rich subject with clarity and fairness Her generously illustrated book deals with the households of the wealthy and the poor courtship and marriage the care and training of children and the bonds and strains of kinship The matter of inheritance receives special attention as it played a substantial role in a world permeated by rank and status and its importance gave the family a peculiar social and economic significance The book also deals with ideas about the family and the values it embodied As Gottlieb says What you and I usually mean when we say family is something that comes to us from the nineteenth century not from time immemorial She makes the point that the so called traditional world before the Industrial Revolution was

awash in traditions that collided with each other Marriage for example appeared to many as natural and inevitable to others as burdensome and repellant And while both medical and religious authorities always strongly advised mothers to nurse their children upper class women almost never did instead using lower class wet nurses The famous people and events of history make brief walk on appearances in this book Henry VIII s divorce Louis XIV s mistresses Benjamin Franklin s apprenticeship to his brother Mary Wollstonecraft s death in childbirth But the author s emphasis is on the more ordinary people whose everyday lives strike a responsive chord in all of us This remarkable eminently readable work brings to vivid life the wives and husbands servants and masters children and parents of a not too distant past **The Bertrams** Anthony Trollope, 1880
