Noun Phrases and Nominalization in Basque Urtzi Etxebarria, Ricardo Etxepare, Myriam Uribe-Etxebarria, 2012-06-20 This collective volume on nominal expressions in Basque a language isolate with no known relatives comprises original papers on the syntactic structure and the interpretation of both Noun Phrases and nominalization constructions a traditionally neglected aspect of Basque linguistics The minute attention to properties and paradigms previously overlooked and the analyses of them in the light of recent advances in syntactic theory make this book a valuable tool for syntacticians semanticists and morphologists This work fills a gap in the theoretical study of Basque and the richness of data presented makes it interesting for any researcher from whatever particular theoretical persuasion This volume is especially useful for researchers graduate students and advanced undergraduate students of comparative grammar typology and theoretical linguistics Noun Phrase in the Generative Perspective Artemis Alexiadou, Liliane Haegeman, Melita Stavrou, 2008-09-25 The goal of this book is twofold On the one hand we want to offer a discussion of some of the more important properties of the nominal projection on the other hand we want to provide the reader with tools for syntactic analysis which apply to the structure of DP but which are also relevant for other domains of syntax In order to achieve this dual goal we will discuss phenomena which are related to the nominal projection in relation to other syntactic phenomena e g pro drop will be related to N ellipsis the classification of pronouns will be applied to the syntax of possessive pronouns N movement will be compared to V movement the syntax of the genitive construction will be related to that of predicate inversion etc In the various chapters we will show how recent theoretical proposals distributed morphology anti symmetry checking theory can cast light on aspects of the syntax of the NP When necessary we will provide a brief introduction of these theoretical proposals We will

also indicate problems with these analyses whether they be inherent to the theories as such e.g. what is the trigger for movement in antisymmetric approaches or to the particular instantiations. The book cannot and will not provide the definitive analysis of the syntax of noun phrases. We consider that this would not be possible given the current flux in generative syntax with many new theoretical proposals being developed and explored but the book aims at giving the reader the tools with which to conduct research and to evaluate proposals in the literature. In the discussion of various issues we will apply the framework that is most adequate to deal with problems at hand. We will therefore not necessarily use the same approach throughout the discussion. Though proposals in the literature will be referred to when relevant we cannot attempt to provide a critical survey of the literature. We feel that such a survey would be guided too strongly by theoretical choices which would not be compatible with the pedagogical purposes this book has. The book is comparative in its approach and data from different languages will be examined including English, German, Dutch, West Flemish, Greek, Romance, Semitic, Slavic, Albanian, Hungarian, Gungbe.

The Semantics of Nominalizations across Languages and Frameworks Monika Rathert, Artemis Alexiadou, 2010-08-31

The volume explores the semantics of nominalizations from different theoretical points of view: formal and lexical semantics, cognitive functional grammar, lexical functional grammar, discourse representation theory. Data from a variety of languages are taken into account including Hungarian, Italian, French, German, and English. The papers discuss the semantics of distinct readings of nominalizations and meaning differences observed between competing affixes.

Theory of Nouns Anil Thakur, 2015-02-20

This book studies the nouns at their syntactic level and compares their internal structure with that of the verbs. The major part of the book is drawn from my doctoral work on the structure of the Hindi nouns within the theoretical approach of determiner phrase analysis in the generative linguistics framework. The book investigates the structure of the nominal phrase in Hindi under the theoretical assumptions that nouns and verbs parallel in their internal structure. That is, nouns and verbs and for that matter other words

that either associate with the nouns or the verbs are identical inside in their internal world This assumption has been called determiner phrase analysis of the nominal elements in the existing literature Abney 1987 I draw upon evidence from the different phenomena of the nominal phrases such as the genitive constructions in definiteness focus and topic inside them displacement phenomenon within the noun and the gerund constructions The study is reported in three chapters

Agreement and the Internal Syntax of Bafut DPs Pius Ngwa Tamanji, 1999 *The Navajo Sound System* J.M.

McDonough, 2012-12-06 The Navajo language is spoken by the Navajo people who live in the Navajo Nation located in Arizona and New Mexico in the southwestern United States The Navajo language belongs to the Southern or Apachean branch of the Athabaskan language family Athabaskan languages are closely related by their shared morphological structure these languages have a productive and extensive inflectional morphology The Northern Athabaskan languages are primarily spoken by people indigenous to the sub arctic stretches of North America Related Apachean languages are the Athabaskan languages of the Southwest Chiricahua Jicarilla White Mountain and Mescalero Apache While many other languages like English have benefited from decades of research on their sound and speech systems instrumental analyses of indigenous languages are relatively rare There is a great deal of work to do before a chapter on the acoustics of Navajo comparable to the standard acoustic description of English can be produced The kind of detailed phonetic description required for instance to synthesize natural sounding speech or to provide a background for clinical studies in a language is well beyond the scope of a single study but it is necessary to begin this greater work with a fundamental description of the sounds and supra segmental structure of the language In keeping with this the goal of this project is to provide a baseline description of the phonetic structure of Navajo as it is spoken on the Navajo reservation today to provide a foundation for further work on the language
