Nous Avons Mange La Foret:

Nous avons mangé la forêt de la pierre-génie Gôo Georges Condominas, 1974 **Minority Groups in the Republic of Vietnam** American University (Washington, D.C.). Cultural Information Analysis Center, 1966 **State, Society and the Market in Contemporary Vietnam** Hue-Tam Ho Tai, Mark Sidel, 2012-11-27

Lively debates around property access to resources legal rights and the protection of livelihoods have unfolded in Vietnam since the economic reforms of 1986 Known as Doi Moi changing to the new these have gradually transformed the country from a socialist state to a society in which a communist party presides over a neoliberal economy By exploring the complex relationship between property the state society and the market this book demonstrates how both developmental issues and state society relations in Vietnam can be explored through the prism of property relations and property rights The essays in this collection demonstrate how negotiations over property are deeply enmeshed with dynamics of state formation and covers debates over the role of the state and its relationship to various levels of society the intrusion of global forces into the lives of marginalized communities and individuals and how community norms and standards shape and reshape national policy and laws With contributors from around the world this book will be of great interest to students and scholars of East and Southeast Asian studies including politics culture society and law as well as those interested in the role of the state and property relations more generally

Rice, Agriculture, and the Food Supply in Premodern Japan Charlotte von Verschuer, Wendy Cobcroft, 2016-02-22

The majority of studies on the agricultural history of Japan have focused on the public administration of land and production and rice the principal source of revenue has received the most attention However while this cereal has clearly played a decisive role in the public economy of the Japanese State it has not had a predominant place in agricultural production Far from confining its scope to a study of rice growing for tax purposes this volume looks at the subsistence economy in the plant kingdom as a whole This book examines the history of agriculture in premodern Japan from the 8th to the 17th century dealing with the history of agricultural techniques and food supply of rice wheat millet and other grains Drawing extensively on material from history literature archaeology ethnography and botany it analyses each of the farming operations from sowing to harvesting and the customs pertaining to consumption It also challenges the widespread theory that rice cultivation has been the basis of Japaneseness for two millennia and the foundation of Japanese civilization by focusing on the biodiversity and polycultural traditions of Japan Further it will play a role in the current dialogue on the future of sustainable agricultural production from the viewpoints of ecology biodiversity dietary culture and food security throughout the world as traditional techniques such as crop rotation are explored in connection with the safeguarding of the minerals in the soil Surveying agricultural techniques across the centuries and highlighting the dietary diversity of Japan this book will appeal to students and scholars of Japanese history the history of science and technology medieval history cultural anthropology and agriculture
