How to Measure Anything Douglas W. Hubbard, 2007-08-03 Publisher Description **Coats: how to Cut and Try Them on** Thomas Hiram Holding, 1885 [Biophysical Measurement in Experimental Social Science Research](#) Gigi Foster, 2019-02-08 Biophysical Measurement in Experimental Social Science Research is an ideal primer for the experimental social scientist wishing to update their knowledge and skillset in the area of laboratory based biophysical measurement Many behavioral laboratories across the globe have acquired increasingly sophisticated biophysical measurement equipment sometimes for particular research projects or for financial or institutional reasons Yet the expertise required to use this technology and integrate the measures it can generate on human subjects into successful social science research endeavors is often scarce and concentrated amongst a small minority of researchers This book aims to open the door to wider and more productive use of biophysical measurement in laboratory based experimental social science research Suitable for doctoral students through to established researchers the volume presents examples of the successful integration of biophysical measures into analyses of human behavior discussions of the academic and practical limitations of laboratory based biophysical measurement and hands on guidance about how different biophysical measurement devices are used A foreword and concluding chapters comprehensively synthesize and compare biophysical measurement options address academic ethical and practical matters and address the broader historical and scientific context Research chapters demonstrate the academic potential of biophysical measurement ranging fully across galvanic skin response heart rate monitoring eye tracking and direct neurological measurements An extended Appendix showcases specific examples of device adoption in experimental social science lab settings Demonstrates the strengths and limitations of different tools in terms of both research objectives and practicality Provides hands on guidance for device usage and data integration and assessment Compares and contrasts the use of different biophysical data options for different research objectives and in different disciplines **The Practical Designer for Women's and Misses' Underwear** Isidor Rosenfeld, 2022-07-20 When this book was published in 1918 the availability of off the peg ready made lingerie was limited to the very wealthy Most women had to make their own This book provides the knowledge to measure and fit correctly and to then make the patterns required for the various garments needed **Historicizing the Enlightenment, Volume 2** Michael McKeon, 2023-07-14 Enlightenment critics from Dryden through Johnson and Wordsworth conceived the modern view that art and especially literature entails a double reflection a reflection of the world and a reflection on the process by which that reflection is accomplished Instead neoclassicism and Augustanism have been falsely construed as involving a one dimensional imitation of classical texts and an unselfconscious representation of the world In fact these Enlightenment movements adopted an oblique perspective that registers the distance between past tradition and its present reenactment between representation and presence Two modern movements Romanticism and modernism have appropriated as their own these innovations which

derive from Enlightenment thought Both of these movements ground their error in a misreading of imitation as understood by Aristotle and his Enlightenment proponents Rightly understood neoclassical imitation constitutively aware of the difference between what it knows and how it knows it is an experimental inquiry that generates a range of prefixes counter mock anti neo that mark formal degrees of its epistemological detachment Romantic ideology has denied the role of the imagination in Enlightenment imitation imposing on the eighteenth century a dichotomous periodization duplication versus imagination the mirror versus the lamp Structuralist ideology has dichotomized narration and description form and content structure and history Poststructuralist ideology has propounded for the novel a contradictory novel tradition realism modernism postmodernism postcolonialism whose stages both constitute a sequence and collapse it each stage claiming the innovation of the stage that precedes it Published by Bucknell University Press Distributed worldwide by Rutgers University Press
