Nowy Swiat I Okolice:

The Columbia Guide to the Literatures of Eastern Europe Since 1945 Harold B. Segel, 2003 The Iron Curtain concealed from western eyes a vital group of national and regional writers Marked by not only geographical proximity but also by the shared experience of communism and its collapse the countries of Eastern Europe Poland Hungary Albania Romania Bulgaria and the former states of Yugoslavia Czechoslovakia and East Germany share literatures that reveal many common themes when examined together Compiled by a leading scholar the guide includes an overview of literary trends in historical context a listing of some 700 authors by country and an A to Z section of articles on the most influential writers

The Sociology of the Artist in the Postmodern Era Marian Golka, 2013 This book examines the artistic profession which can be a challenge to characterize Various fields of artistic work are coupled with a range of different artistic attitudes and these in turn with a variety of social positions assumed by artists various historical conditions in which the profession functions as well as the diverse courses of artistic careers There are those who say that this profession is not an occupation but a vocation of an almost mystical nature Yet it is still tempting to examine the phenomenon of the artist at least to the extent that it is possible in light of the scarcity of historical data Series Development in Humanities Vol 8 Mapping Warsaw Ewa Wampuszyc, 2018-10-15 Inspired by the spatial turn in the humanities and social sciences Mapping Warsaw is an interdisciplinary study that combines urban studies cinema studies cultural studies history literature and photography It examines Warsaw s post World War II reconstruction through images and language Juxtaposing close readings of photo books socialist era newsreels called the Polska Kronika Filmowa the comedies of Leonard Buczkowski and Jan Fethke the writing and films of Tadeusz Konwicki and a case study on the Palace of Culture and Science a gift from none other than Stalin this study investigates the rhetorical and visual rather than physical reconstruction of Warsaw in various medias and genres Ewa Wampuszyc roots her analysis in the historical context of the postwar decade and shows how and why Poland s capital became an essential part of a propaganda program inspired by communist ideology and the needs of a newly established socialist People s Republic Mapping Warsaw demonstrates how physical space manifests itself in culture and how culture history and politics leave an indelible mark on places It points out ways in which we take for granted our perception of space and the meanings we assign to it *Historical Memory of Central and East European Communism* Agnieszka Mrozik, Stanislav Holubec, 2018-03-19 Every political movement creates its own historical memory The communist movement though originally oriented towards the future was no exception The theory of human history constitutes a substantial part of Karl Marx s and Friedrich Engels s writings and the movement inspired by them very soon developed its own strong historical identity combining the Marxist theory of history with the movement s victorious milestones such as the October Revolution and later the Great Patriotic War which served as communist legitimization myths throughout almost the entire twentieth century During the Stalinist period however the movement s history became strongly reinterpreted to suit Joseph

Stalin's political goals After 1956 this reinterpretation lost most of its legitimating power and instead began to be a burden The unwanted memory of Stalinism and subsequent examples of violence the Gulag Katy the 1956 Budapest uprising and the 1968 Prague Spring contributed to the crisis of Eastern European state socialism in the late 1980s and led to attempts at reformulating or even rejecting communist self identity This book's first section analyzes the post 1989 memory of communism and state socialism and the self identity of the Eastern and Western European left The second section examines the state socialist and post socialist memorial landscapes in the former German Democratic Republic Czechoslovakia Czech Republic Poland Lithuania Ukraine and Russia The final section concentrates on the narratives the movement established when in power about its own past with the examples of the Soviet Union Poland Romania and Czechoslovakia

Polish Paradoxes Stanisław Gomułka, Antony Polonsky, 2025-08-01 Paradox is no new feature of Polish political life A Slavnation fiercely Catholic yet looking towards the non Slavonic largely non Catholic west a people whose sense of nationhood is uniquely strong yet who have spent much of their history under foreign rule Poland remains headline news and her present is as full of paradoxes as her past First published in 1990 *Polish Paradoxes* explains how Poles themselves look at their problems and opportunities and provides a unique insight into the real and perceived pressures on Poland As well as examining the historical and political roots of the Polish crisis the contributors analyse the Polish culture and a national psyche which has equipped Poles to resist foreign domination whilst often inhibiting them from resolving persistent political and economic crises This book will be of interest to students and researchers of history and politics
