Npg Germanys Uncertain Power:

Power, Discrimination, and Privilege in Individuals and Institutions Sonya Faber, Monnica T. Williams, Matthew D. Skinta, Bia Labate, 2024-04-01 Individuals and systems are rife with prejudices leading to discrimination and inequities. Examples of this include rejection of stigmatized groups e.g. Black Americans, Indigenous people in Canada, Roma peoples in Europe, structural racism e.g. inequitable distribution of resources for public schools, disenfranchisement of women, employees e.g. the glass ceiling, barriers to higher education e.g. biased admissions requirements, heterosexism, economic oppression and colonization. When we take a closer look, we find the core of the problem is imbalance in the distribution of power and its misuse.

Atomic Assurance Alexander Lanoszka, 2018-11-15 Do alliances curb efforts by states to develop nuclear weapons? Atomic Assurance looks at what makes alliances sufficiently credible to prevent nuclear proliferation, how alliances can break down and so encourage nuclear proliferation, and whether security guarantors like the United States can use alliance ties to end the nuclear efforts of their allies. Alexander Lanoszka finds that military alliances are less useful in preventing allies from acquiring nuclear weapons than conventional wisdom suggests. Through intensive case studies of West Germany, Japan, and South Korea, as well as a series of smaller cases on Great Britain, France, Norway, Australia, and Taiwan, Atomic Assurance shows that it is easier to prevent an ally from initiating a nuclear program than to stop an ally that has already started one. In theater, conventional forces are crucial in making American nuclear guarantees credible; the American coercion of allies who started or were tempted to start a nuclear weapons program has played less of a role in forestalling nuclear proliferation than analysts have assumed, and the economic or technological reliance of a security-dependent ally on the United States works better to reverse or to halt that ally's nuclear bid than anything else. Crossing diplomatic history, international relations, foreign policy, grand strategy, and nuclear strategy, Lanoszka's book reworks our understanding of the power and importance of alliances in stopping nuclear proliferation.

The Kaiser Wilhelm Society Under National Socialism Susanne Heim, Carola Sachse, Mark Walker, 2009-04-27 This book examines the Kaiser Wilhelm Institutes under Hitler, illustrating the cooperation between scientists and National Socialists in service of autarky, racial hygiene, war, and genocide.

Maximum Entropy and Bayesian Methods Garching, Germany 1998 Wolfgang von der Linden, Volker Dose, Rainer Fischer, Roland Preuss, 2012-12-06 In 1978, Edwin T. Jaynes and Myron Tribus initiated a series of workshops to exchange ideas and recent developments in technical aspects and applications of Bayesian probability theory. The first workshop was held at the University of Wyoming in 1981, organized by C. R. Smith and W. T. Grandy. Due to its success, the workshop was held annually during the last 18 years. Over the years, the emphasis of the workshop shifted gradually from fundamental concepts of Bayesian probability theory to increasingly realistic and challenging applications. The 18th international workshop on Maximum Entropy and Bayesian Methods was held in Garching, Munich, Germany, 27-31 July 1998. Opening lectures by G. Larry Bretthorst and by Myron Tribus were dedicated to one of the pioneers of Bayesian probability theory who died on

the 30 of April 1998 Edwin Thompson Jaynes revealed and advocated the correct meaning of probability as the state of knowledge rather than a physical property This interpretation allowed him to unravel longstanding mysteries and paradoxes Bayesian probability theory the logic of science as E T Jaynes called it provides the framework to make the best possible scientific inference given all available experimental and theoretical information We gratefully acknowledge the efforts of Tribus and Bretthorst in commemorating the outstanding contributions of E T Jaynes to the development of probability theory

Britain and Germany in Europe, 1949-1990 Jeremy Noakes, Peter Wende, Jonathan Wright, 2002 Anglo German relations since 1945 have been generally cordial but subject to bouts of acute tension This volume by leading historians from both countries examines major political issues and broader contacts between the two societies It suggests that British perceptions have remained coloured by fears of German dominance aggravated by the success of the Federal Republic and the relative decline of Britain in the post war period

Germany and Nuclear Weapons in the 21st Century Ulrich Kühn, 2024-03-12 This book is the first scholarly book to take a comprehensive look at Germany's nuclear weapons policies in the 21st century German foreign and security policy is facing a profound reorientation Great power competition between the United States and both a revanchist Russia and a rising China the return of war and nuclear threats to Europe and the emergence of new technologies all force Germany to adapt German policymakers and scholars increasingly speak of a pivotal *Zeitenwende* an epochal turning point in history How does Germany adapt its nuclear policies to these changing conditions The volume brings together internationally renowned nuclear scholars and policy analysts from Germany and abroad Focussing on German nuclear deterrence arms control and

disarmament as well as nonproliferation policies the contributors assess how German leaders have navigated continuity and change domestically and abroad The volume concludes that Germany remains bound by dependence on the United States and its own conservatism Within these parameters German leaders have adapted slowly to change and continue to balance seemingly contradictory deterrence and disarmament goals This book will be of much interest to students of nuclear proliferation security studies German politics and International Relations as well as policymakers
